 based on either views or down loads as a pdf There is some agreement between the two lists What is compelling is that of the
 top papers all except one encompasses research conducted in domesticated birds predominantly with chickens with one
 focused on turkeys It is perhaps not unexpected that research on chickens dominates the top papers because of the following
 Chickens are commercially important being the number one meat animal globally Chickens are used as the model species for
 birds Other possibilities that could be the case include the following There are more researchers working on chickens
 compared to other commercial or wild species There are other avenues to publish wild bird research Lack of funding for open
