Village Phone Replication Manual David Keogh, Tim Wood, United Nations ICT Task Force, 2005 Why is it such a challenge to provide telecommunications to rural areas High initial infrastructure investment relative low call volumes high maintenance costs due to harsh environments cash box collection needs cash security costs for coin operated phones card availability for prepaid airtime systems technical illiteracy remote locations and high transportation costs are just some of the impediments to providing rural telecommunications access This manual is based on the experiences of the Village Phone Programmes in Bangladesh and Uganda In rural villages where no telecommunications services have previously existed the programme provides cellular phones via a sustainable financing mechanism to poor entrepreneurs who use the phone to operate a business Such has been the success that over 2 000 village phone businesses are now operating in remote villages

of Uganda This manual is a guideline for replicating the programme in a new country It establishes a template for creating sustainable initiatives that bring telecommunications to the poor create viable new businesses for micro entrepreneurs and expand the customer base for telecommunications companies **CIO** ,1991-02 *Languages, Compilers, and Tools for Embedded Systems* Jack Davidson,Sang Lyul Min,2003-06-29 This volume contains the proceedings of the ACM SIGPLAN Workshop on Languages Compilers and Tools for Embedded Systems LCTES 2000 held June 18 2000 in Vancouver Canada

Embedded systems have developed considerably in the past decade and we expect this technology to become even more important in computer science and engineering in the new millennium Interest in the workshop has been confirmed by the submission of papers from all over the world There were 43 submissions representing more than 14 countries Each submitted paper was reviewed by at least three members of the program committee The expert opinions of many outside reviewers were invaluable in making the selections and ensuring the high quality of the program for which we express our sincere gratitude The final program features one invited talk twelve presentations and twelve poster presentations which reflect recent advances in formal systems compilers tools and hardware for embedded systems We owe a great deal of thanks to the authors reviewers and the members of the program committee for making the workshop a success Special thanks to Jim Larus the General Chair of PLDI 2000 and Julie Goetz of ACM for all their help and support Thanks should also be given to Sung Soo Lim at Seoul National University for his help in coordinating the paper submission and review process We also thank Professor Gaetano Borriello of the University of Washington for his invited talk on Chinook a hardware software co-synthesis CAD tool for embedded systems **The Ultimate Guide to Android Mobile Testing** Kostyantyn
