and Part IV contains the mathematical reviews which range from linear algebra to point to set mappings *In Our Image* Stephen H. Smith, 2016-03-29 The thesis of *In Our Image* is that the traditional Christian assertion that God made man in his image Gen 1 26 has been turned on its head by Christian orthodoxy and that it is most often the believer who makes God in his image It is true that the Bible as a whole seems to support the traditional Christian theist view of a God out there who creates mankind according to his will and demands high standards of holiness but a too superficial reading of the text will tend to overlook the significance of myth and symbol thereby missing the point that the Bible is essentially a human document expressing human concerns Holiness although of the essence is not primarily a top down affair imposed or demanded from above but a bottom up one which is created by and lies at the heart of human experience Christian fundamentalists read the Bible with black and white literalism while liberals often reduce religious experience to the merely human Smith here argues for a via media which appeals to the harmonious existence of faith and reason as the chief means of addressing man's modern existential situation **Functions 2: solids** Alexander P. M. van den Bosch, 2017-10-21 So you have read *Functions* part 1 now have you So you trained your enlightened and imagining self up to level 9 now this book goes beyond that up to level 16 If you master that well you can interact with imaginations of solids and machines
