

# Forensic Psychology Reconsidered: A Critique of Mental Illness and the Courts

**DOWNLOAD**

## Description :

*Forensic psychology is where psychology meets the criminal justice system. An understanding of the intersection of criminal law and psychological issues relating to criminal responsibility is critical for criminal justice students. This accessible text focuses on the criminal law implications of forensic psychology as it relates to topics such as competency to stand trial, state of mind at the time of the crime, suicide by cop, and involuntary psychiatric medication administered in custody. Unlike more traditional texts on this topic, which are primarily concerned with the clinical practice of forensic psychology, this book focuses on critical thinking as it relates to these topics. Each chapter presents a critical analysis of the topic under study, going beyond merely identifying the legal parameters of criminal responsibility to explore the ethical, philosophical, and theoretical foundations of that concept.*

Monstrous Crimes and the Failure of Forensic Psychiatry John Douard, Pamela D. Schultz, 2012-11-13 The metaphor of the monster or predator usually a sexual predator drug dealer in areas frequented by children or psychopathic murderer is a powerful framing device in public discourse about how the criminal justice system should respond to serious violent crimes The cultural history of the monster reveals significant features of the metaphor that raise questions about the extent to which justice can be achieved in both the punishment of what are regarded as monstrous crimes and the treatment of those who commit such crimes This book is the first to address the connections between the history of the monster metaphor the 19th century idea of the criminal as monster and the 20th century conception of the psychopath the new monster The book addresses in particular the ways in which the metaphor is used to scapegoat certain categories of crimes and criminals for anxieties about our own potential for deviant and indeed dangerous interests These interests have long been found to be associated with the fascination people have for monsters in most cultures including the West The book outlines an alternative public health approach to sex offending and crime in general that can incorporate what we know about illness prevention while protecting the rights and humanity of offenders The book concludes with an analysis of the role of forensic psychiatrists and psychologists in

representing criminal defendants as psychopaths or persons with certain personality disorders As psychiatry and psychology have transformed bad behavior into mad behavior these institutions have taken on the legal role of helping to sort out the most dangerous among us for preventive treatment rather than carceral punishment **Crime, mental health, and the law: A psycho-criminological perspective** Heng Choon Chan,Lorraine Sheridan,Samuel Adjorlolo,2023-03-28 Coercive Care Bernadette Mcsherry,Ian Freckelton,2013-06-26 There has been much debate about mental health law reform and mental capacity legislation in recent years with the UN Convention on the Rights of Persons with Disabilities also having a major impact on thinking about the issue This edited volume explores the concept of coercive care in relation to individuals such as those with severe mental illnesses those with intellectual and cognitive disabilities and those with substance use problems With a focus on choice and capacity the book explores the impact of and challenges posed by the provision of care in an involuntary environment The contributors to the book look at mental health capacity and vulnerable adult s care as well as the law related to those areas The book is split into four parts which cover human rights and coercive care legal capacity and coercive care the legal coordination of coercive care and coercive care and individuals with cognitive impairments The book covers new ground by exploring issues arising from the coercion of persons with various disabilities and vulnerabilities helping to illustrate how the capacity to provide consent to treatment and care is impaired by reason of their condition
