The National Children's Study 2014 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on the Design of the National Children's Study and Implications for the Generalizability of Results, 2014-08-26 The National Children's Study NCS was authorized by the Children's Health Act of 2000 and is being implemented by a dedicated Program Office in the Eunice Kennedy Shriver National Institute of Child Health and Human Development NICHD The NCS is planned to be a longitudinal observational birth cohort study to evaluate the effects of chronic and intermittent exposures on child health and development in the U S The NCS would be the first study to collect a broad range of environmental exposure measures for a national probability sample of about 100 000 children followed from birth or before birth to age 21 Detailed plans for the NCS were developed by 2007 and reviewed by a National Research Council Institute of Medicine panel At that time sample recruitment for the NCS Main Study was scheduled to begin in 2009 and to be completed within about 5 years However results from the initial seven pilot locations which recruited sample cases in 2009 2010 indicated that the proposed household based recruitment approach would be more costly and time consuming than planned In response the Program Office implemented a number of pilot tests in 2011 to evaluate alternative recruitment methods and pilot testing continues to date At the request of Congress The National Children's Study 2014 reviews the revised study design and proposed methodologies for the NCS Main Study This report assesses the study's plan to determine whether it is likely to produce scientifically sound results that are generalizable to the United States population and appropriate subpopulations The report makes recommendations about the overall study framework sample design timing content and need for scientific expertise and oversight The National Children's Study has the potential to add immeasurably to scientific knowledge about the impact of environmental exposures broadly defined on children's health and development in the United States The recommendations of this report will help the NCS will achieve its intended objective to examine the effects of environmental influences on the health and development of American children

Posthuman Bliss? Susan B. Levin, 2020-12-03 A tightly argued and expansive examination of the pitfalls of transhumanism that reacquaints us with what it means to live well Advocates of transhumanism or radical enhancement urge us to pursue the biotechnological heightening of select capacities above all cognitive ability so far beyond any human limit that the beings with those capacities would exist on a higher ontological plane For proponents of such views humanity's self transcendence through advancements in science and technology may even be morally required Consequently the human stakes of how we respond to transhumanism are immeasurably high In *Posthuman Bliss* The Failed Promise of Transhumanism Susan B Levin challenges transhumanists' overarching commitments regarding the mind and brain ethics liberal democracy knowledge and reality showing their notion of humanity's self transcendence into posthumanity to be little more than fantasy Uniting philosophical with scientific arguments Levin mounts a significant

challenge to transhumanists claim that science and technology support their vision of posthumanity In a clear and engaging style she dismantles transhumanists breezy assurances that posthumans will emerge if we but allocate sufficient resources to that end Far from offering theoretical and practical proof of concept for the vision that they urge upon us Levin argues transhumanists engage inadequately with cognitive psychology biology and neuroscience often relying on questionable or outdated views within those fields Having shown in depth why transhumanism should be rejected Levin argues forcefully for a holistic perspective on living well that is rooted in Aristotle s virtue ethics but that is adapted to liberal democracy This holism is thoroughly human in the best of senses It directs us to consider worthy ends for us as human beings and to do the irreplaceable work of understanding ourselves rather than relying on technology and science to be our salvation

Exemplars, Imitation, and Character Formation Eric Yang, 2024-08-22 This volume examines the role and relevance of exemplars and the practice of imitation in character development and formation While the role of exemplars and imitation in spiritual and moral formation has been an integral part of many religious and wisdom traditions in recent times there has been limited theological and philosophical investigation into it and a dearth of interdisciplinary discussion The book brings together relevant research and insights from leading experts within philosophy psychology and theology with a slight emphasis on Christian approaches to exemplars and imitation especially given the reflection on these themes throughout the history of the Christian intellectual and mystical tradition Many of the contributions display an interdisciplinary approach into these issues hence this volume will be of interest to philosophers psychologists theologians and others who work in moral psychology and character formation

Exemplars of Truth Keith Lehrer, 2019-01-08 This monograph is both an intellectual summation as well as a philosophical advancement of key themes of the work of Keith Lehrer on several key topics including knowledge self trust autonomy and consciousness He here attempts to integrate these themes and develop an intellectual system that can constructively solve philosophical problems The system is indebted to the modern work of Sellars Quine and Chisholm as well as historically to Hume and Reid At the core of this system lies Lehrer s theory of knowledge which he previously called a coherence theory of knowledge but now calls a defensibility theory Lehrer argues that knowledge requires the capacity to justify or defend the target claim of knowledge in terms of a background system Defensibility is an internal capacity supplied by that system to meet objections to the claim This theory however leaves open the problem of experience noted by other philosophers i e how to explain the special role of experience in a background system even granted we are fallible in describing it Lehrer offers a solution to the problem of experience arguing that reflection on experience converts the experience itself into an exemplar something like a sample that becomes a vehicle or term of representation The exemplar represents itself and extends to represent the external world It exhibits something about evidence and truth concerning experience that as Wittgenstein noted cannot be fully described but can only be shown Exemplar representation is the missing link of a background system to truth about the world

The Fundamental

Principles of Finance Robert Irons, 2019-07-25 Finance is the study of value and how it is determined. Individuals, small businesses, and corporations regularly make use of value determinations for making strategic decisions that affect the future outcomes of their endeavors. The importance of accurate valuations cannot be overestimated; valuing assets too highly will lead to investing in assets whose costs are greater than their returns, while undervaluing assets will lead to missed opportunities for growth. In some situations, such as a merger or an acquisition, the outcome of the decision can make or break the investor. The need for solid financial skills has never been more pressing than in today's global economy. The *Fundamental Principles of Finance* offers a new and innovative approach to financial theory. The book introduces three fundamental principles of finance that flow throughout the theoretical material covered in most corporate finance textbooks. These fundamental principles are developed in their own chapter of the book, then referred to in each chapter introducing financial theory. In this way, the theory is able to be mastered at a fundamental level. The interactions among the principles are introduced through the three precepts, which help show the impact of the three principles on financial decision making. This fresh and original approach to finance will be key reading for undergraduate students of introduction to finance, corporate finance, capital markets, financial management, and related courses, as well as managers undertaking MBAs.

High-Level Adaptation and Aftereffects Rocco Palumbo, Stefania D'Ascenzo, Luca Tommasi, 2017-04-28 Aftereffects generally occur after a prolonged exposure to a first stimulus possessing one given property, followed by presentation of a stimulus bearing a neutral value of that property. The aftereffect consists in a change in appearance of the neutral stimulus following the adapter, compared to the appearance of the neutral stimulus when it is perceived without any previous exposure to the adapter. The transient phenomena of perceptual aftereffects are believed to depend on the activation of neuron populations that respond selectively to a given property of the stimuli. Studying how adaptation occurs, which stimulus properties are sensitive to it, which timings are necessary, whether individual differences modulate its occurrence, has thus become an indirect way to probe the plasticity of sensory functions in the nervous system, recently extending to more cognitive and representational aspects of neural coding. In the last two decades, indeed, it has been demonstrated that aftereffects occur not only for low-level properties of stimuli, such as motion, color, or orientation, but also for high-level properties. Many studies have proven that high-level properties of the stimuli, e.g., gender, identity, ethnicity, or age of a face, or a voice, are sensitive to this phenomenon. It has been shown, for example, that the prolonged exposure to a female or male face produces a gender misperception in the opposite direction when an androgynous face is shown after the adapter. Furthermore, recent studies have also shown that aftereffects are not strictly contingent upon the physical features that make up stimuli, but they seem to run across the high-level properties subjects are adapted to. These evidences are supported by cross-category adaptation studies, which underlie how aftereffects occur even across stimuli that do not share physical features, e.g., bodies and faces, but that instead share common higher-level properties, such as gender. Given the

growing body of research focused on adaptation and aftereffects in high level perception at the boundaries with perceptual learning attention and cognition the purpose of this topic is to provide a picture of the state of the art relative to the specific phenomena of adaptation in high level perceptual processing

levels *Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria* Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students. Sometimes it is required for accountability purposes; at other times criteria are used as a means to communicate expectations to students. However, the idea that explicit assessment criteria should be shared with students has been contested. On the one hand, research has shown that explicit criteria may positively affect student performance, reduce their anxiety, as well as support students' use of self-regulated learning strategies. On the other hand, there are fears that explicit criteria may have a restraining influence on students' learning, as well as limiting their autonomy and creativity. There are also indications of students becoming more performance-oriented as opposed to learning-oriented when being provided with explicit assessment criteria. Taken together, it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria, and under which circumstances it is not. In particular, empirical research on the proposed negative effects of sharing criteria with learners is limited, and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book, we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation, and learning is equally imperative for future research and educational practice, both of which need to go beyond individual opinions and convictions.

Categoriality and continuity in prosodic prominence
Simon Roessig, 2020-09-08 Prosody has been characterised as a half-tamed savage, being shaped by both discrete categorical aspects as well as gradient continuous phenomena. This book is concerned with the relation of the wild and the tamed sides of prosodic prominence. It reviews problems that arise from a strict separation of categorical and continuous representations in models of phonetics and phonology, and it explores the potential role of descriptions aimed at reconciling the two domains. In doing so, the book offers an introduction to dynamical systems, a framework that has been studied extensively in the last decades to model speech production and perception. The reported acoustic and articulatory data presented in this book show that categorical and continuous modulations used to enhance prosodic prominence are deeply intertwined and even exhibit a kind of symbiosis. A multi-dimensional dynamical model of prosodic prominence is sketched based on the empirical data, combining tonal and articulatory aspects of prosodic focus marking. The model demonstrates how categorical and continuous aspects can be integrated in a joint theoretical treatment that overcomes a strict separation of phonetics and phonology.

Category Change from a Constructional Perspective Kristel Van Goethem, Muriel Norde, Evie Coussé, Gudrun Vanderbauwhede, 2018-03-15 Category change, broadly defined as the shift from one word class to another, is often studied as part of other changes such as grammaticalization or lexicalization, but not in its own right. This volume offers a survey of different types of category change and their properties, e.g. abrupt versus gradual changes, morphological versus syntactic

changes or context independent versus context sensitive changes The purpose of this collection of papers is to explore the concepts of linguistic category and category change from the perspective of Construction Grammar Using data from a variety of languages the authors address a number of themes that are central to current theorizing about category change such as the question of whether or not categories should be considered discrete entities how new categories arise or whether category change can be considered as the emergence of a new construction i e a new form meaning pairing The novel approach advanced in this volume will be of interest to historical linguists as well as to general linguists working on the nature of linguistic categories
