Technologies of Kinship LiLi Johnson,2025-11-25 Technologies of Kinship traces how technology and technological systems have shaped the co constitution of Asian American racial formation and family and kinship in American culture Provided by publisher American Claimants Sarah Meer,2020 This volume identifies a transatlantic literary form the American Claimant narrative The book traces the origins of the American claimant back to lost heir romance and then demonstrates its importance and pervasiveness in the nineteenth century *Intersectionality and Decolonisation in Contemporary British Crime Fiction* Charlotte Beyer,2023-01-24 Intersectionality and decolonisation are prominent themes in contemporary British crime fiction Through an in depth critical and contextual analysis of selected contemporary British crime fiction novels from the 1990s to 2018 this distinctive book examines representations of race class sexuality and gender by John Harvey Stella Duffy M Y Alam and Dorothy Koomson It argues that contemporary British crime fiction is a field of contestation where urgent cultural and social questions are debated and the politics of representation explored A significant resource which will be valuable to researchers and scholars of the crime genre as well as British literature this book offers timely critical engagement with intersectionality and decolonisation and their representation in contemporary British crime fiction *Jews and Science* Sander L. Gilman,2022-12-15 Jews and Science examines the complicated relationship between Jewish identities and the evolving meanings of science throughout the history of Western academic culture Jews have been not only the agents for study of things Jewish but also the subject of examination by scientists across a range of disciplines from biology and bioethics to anthropology and genetics Even the most recent iteration of Jewish studies as an academic discipline Israel studies stresses the global cultural economic and social impact of Israeli science and medicine The 2022 volume of the Casden Institute s Jewish Role in American Life series tackles a range of issues that have evolved with the rise of Jewish studies throughout its evolution from interdisciplinary to transdisciplinary and now finally as a discipline itself with its own degrees and departments in universities across the world This book gathers contributions by scholars from various disciplines to discuss the complexity in defining science across multiple fields within Jewish studies The scholars examine the role of the self defined Jewish scholar discerning if their identification with the object of study whether that study be economics criminology medicine or another field entirely changes their perception or status as scientists They interrogate whether the myriad ways to study Jews and their relationship to science including the role of Jews in science and scientific training the science of the Jews however defined and Jews as objects of scientific study alter our understanding of science itself The contributors of Jews and Science take on the challenge to confront these central problems **Logics of Genocide** Anne O'Byrne,Martin Shuster,2020-05-27 This book is concerned with the connection between the formal structure of agency and the formal structure of genocide The contributors employ philosophical approaches to explore the idea of genocidal violence as a structural element in the world Do mechanisms or structures in nation states produce types of national citizens

that are more susceptible to genocidal projects There are powerful arguments within philosophy that in order to be the subjects of our own lives we must constitute ourselves specifically as national subjects and organize ourselves into nation states Additionally there are other genocidal structures of human society that spill beyond historically limited episodes The chapters in this volume address the significance moral ethical political of the fact that our very form of agency suggests or requires these structures The contributors touch on topics including birthright citizenship contemporary mass incarceration anti black racism and late capitalism Logics of Genocide will be of interest to scholars and advanced students working in philosophy critical theory genocide studies Holocaust and Jewish studies history and anthropology

Theory for the Working Sociologist Fabio Rojas, 2017-04-04 Theory for the Working Sociologist makes social theory easy to understand by revealing sociology's hidden playbook Fabio Rojas argues that sociologists use four different theoretical moves when they try to explain the social world how groups defend their status how people strategically pursue their goals how values and institutions support each other and how people create their social reality Rojas uses famous sociological studies to illustrate these four types of theory and show how students and researchers may apply them to their interests The guiding light of the book is the concept of the social mechanism which clearly and succinctly links causes and effects in social life Drawing on dozens of empirical studies that define modern sociology and focusing on the nuts and bolts of social explanation Rojas reveals how areas of study within the field of sociology that at first glance seem dissimilar are in fact linked by shared theoretical underpinnings In doing so he elucidates classical and contemporary theory and connects both to essential sociological findings made throughout the history of the field Aimed at undergraduate students graduate students journalists and interested general readers who want a more formal way to understand social life Theory for the Working Sociologist presents the underlying themes of sociological thought using contemporary research and plain language

[The Routledge Handbook of Waste Studies](#) Zsuzsa Gille, Josh Lepawsky, 2021-12-27 The Routledge Handbook of Waste Studies offers a comprehensive survey of the new field of waste studies critically interrogating the cultural social economic and political systems within which waste is created managed and circulated While scholars have not settled on a definitive categorization of what waste studies is more and more researchers claim that there is a distinct cluster of inquiries concepts theories and key themes that constitute this field In this handbook the editors and contributors explore the research questions methods and case studies preoccupying academics working in this field in an attempt to develop a set of criteria by which to define and understand waste studies as an interdisciplinary field of study This handbook will be invaluable to those wishing to broaden their understanding of waste studies and to students and practitioners of geography sociology anthropology history environment and sustainability studies

Subprime Health Nadine Ehlers, Leslie R. Hinkson, 2017-07-15 From race based pharmaceutical prescriptions and marketing to race targeted medical hot spotting and the Affordable Care Act to stem cell trial recruitment discourse Subprime Health is a timely examination of race based medicine as it intersects with the concept

of debt The contributors to this volume propose that race based medicine is inextricable from debt in two key senses They first demonstrate how the financial costs related to race based medicine disproportionately burden minorities as well as how monetary debt and race are conditioned by broader relations of power Second the contributors investigate how race based medicine is related to the concept of indebtedness and is often positioned as a way to pay back the debt that the medical establishment and society at large owes for the past and present neglect and abuses of many communities of color By approaching the subject of race based medicine from an interdisciplinary perspective critical race studies science and technology studies public health sociology geography and law this volume moves the discussion beyond narrow and familiar debates over racial genomics and suggests fruitful new directions for future research Contributors Ruha Benjamin Princeton U Catherine Bliss U of California San Francisco Khiara M Bridges Boston U Shiloh Krupar Georgetown U Jenna M Loyd U of Wisconsin Milwaukee Anne Pollock Georgia Tech

Forgotten Clones Nathan Crowe, 2021-12-07 Long before scientists at the Roslin Institute in Scotland cloned Dolly the sheep in 1996 American embryologist and aspiring cancer researcher Robert Briggs successfully developed the technique of nuclear transplantation using frogs in 1952 Although the history of cloning is often associated with contemporary ethical controversies *Forgotten Clones* revisits the influential work of scientists like Briggs Thomas King and Marie DiBerardino before the possibility of human cloning and its ethical implications first registered as a concern in public consciousness and when many thought the very idea of cloning was experimentally impossible By focusing instead on new laboratory techniques and practices and their place in Anglo American science and society in the mid twentieth century Nathan Crowe demonstrates how embryos constructed in the lab were only later reconstructed as ethical problems in the 1960s and 1970s with the emergence of what was then referred to as the Biological Revolution His book illuminates the importance of the early history of cloning for the biosciences and their institutional disciplinary and intellectual contexts as well as providing new insights into the changing cultural perceptions of the biological sciences after Second World War

The Palgrave Handbook of Biology and Society Maurizio Meloni, John Cromby, Des Fitzgerald, Stephanie Lloyd, 2017-10-27 This comprehensive handbook synthesizes the often fractured relationship between the study of biology and the study of society Bringing together a compelling array of interdisciplinary contributions the authors demonstrate how nuanced attention to both the biological and social sciences opens up novel perspectives upon some of the most significant sociological anthropological philosophical and biological questions of our era The six sections cover topics ranging from genomics and epigenetics to neuroscience and psychology to social epidemiology and medicine The authors collaboratively present state of the art research and perspectives in some of the most intriguing areas of what can be called biosocial and biocultural approaches demonstrating how quickly we are moving beyond the

acrimonious debates that characterized the border between biology and society for most of the twentieth century This landmark volume will be an extremely valuable resource for scholars and practitioners in all areas of the social and biological sciences The chapter Ten Theses on the Subject of Biology and Politics Conceptual Methodological and Biopolitical Considerations is open access under a CC BY 4 0 license via link [springer com](https://www.springer.com) Versions of the chapters The Transcendence of the Social Scrutinizing the Epigenetics Revolution Species of Biocapital 2008 and Speciating Biocapital 2017 and Experimental Entanglements Social Science and Neuroscience Beyond Interdisciplinarity are available open access via third parties For further information please see license information in the chapters or on link [springer com](https://www.springer.com)

Biofictions Josie Gill, 2020-02-20 This book is open access and available on www.bloomsburycollections.com It is funded by Knowledge Unlatched Winner of the 2020 British Society for Literature and Science book prize In this important interdisciplinary study Josie Gill explores how the contemporary novel has drawn upon and intervened in debates about race in late 20th and 21st century genetic science Reading works by leading contemporary writers including Zadie Smith Kazuo Ishiguro Octavia Butler and Colson Whitehead Biofictions demonstrates how ideas of race are produced at the intersection of science and fiction which together create the stories about identity racism ancestry and kinship which characterize our understanding of race today By highlighting the role of narrative in the formation of racial ideas in science this book calls into question the apparent anti racism of contemporary genetics which functions narratively rather than factually or objectively within the racialized contexts in which it is embedded In so doing Biofictions compels us to rethink the long asked question of whether race is a biological fact or a fiction calling instead for a new understanding of the relationship between race science and fiction

The Remnants of Race Science Sebastián Gil-Riaño, 2023-08-29 After World War II UNESCO launched an ambitious international campaign against race prejudice Casting racism as a problem of ignorance it sought to reduce

prejudice by spreading the latest scientific knowledge about human diversity to instill mutual understanding between groups of people This campaign has often been understood as a response led by British and U S scientists to the extreme ideas that informed Nazi Germany Yet many of its key figures were social scientists either raised in or closely involved with South America and the South Pacific The Remnants of Race Science traces the influence of ideas from the Global South on UNESCO s race campaign illuminating its relationship to notions of modernization and economic development Sebasti n Gil Ria o examines the campaign participants involvement in some of the most ambitious development projects of the postwar period In challenging race prejudice these experts drew on ideas about race that emphasized plasticity and mutability in contrast to the fixed categories of scientific racism Gil Ria o argues that these same ideas legitimated projects of economic development and social integration aimed at bringing ostensibly backward indigenous and non European peoples into the modern world He also shows how these experts promotion of studies of race relations inadvertently spurred a deeper reckoning with the structural and imperial sources of racism as well as the aftermath of the transatlantic slave trade Shedding new light on the postwar refashioning of ideas about race this book reveals how internationalist efforts to dismantle racism paved the way for postcolonial modernization projects

Racism and Racial Surveillance Sheila Khan, Nazir Ahmed Can, Helena Machado, 2021-09-28 Based on the premise that the project of Western Modernity is a structuring element of our societies *Racism and Racial Surveillance* explores in detail its legacies of coloniality and racialization that interfere in a subtle and perverse way in the current social cultural and political systems Guided by an interdisciplinary methodology the various contributions privilege historical contexts of colonial formation and offer a thorough and intersectional analysis on the specters of coloniality in the upsurge of racism surveillance and criminalization as well as the presence of the phantom of the race in spaces of knowledge production such as that of artistic field forensic genetics and criminal identification Drawing on multi case studies the book then proffers key concepts and historical background that will be of interest to researchers students and professionals in a broad range of areas of social sciences and humanities research including fields such as criminology and policing science and technology studies arts studies literary studies race and ethnic studies and finally memory studies Chapters 8 9 and 10 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
