Nietzsche Emmanuel Salanskis:

Nietzsche Emmanuel Salanskis, 2015 Friedrich Wilhelm Nietzsche 1844 1900 philosophe allemand est connu pour avoir proclamé la mort de Dieu thésorisé la volonté de puissance et enseigné le ternel retour de l'identique Ces formules célèbres ont souvent masqué la nature de l'entreprise que Nietzsche s'est assignée Revisitant toute vérité définitive sa philosophie est une constante expérimentation qui multiplie les perspectives Elle s'organise pourtant à partir d'une unique problématique culturelle qui remet en question le partage entre théorie et pratique il s'agit en mettant profit la connaissance de l'histoire et des sciences de la nature d'élever l'homme tant au sens d'un levage zoologique que d'une élévation de valeur pour en faire un être plus panou et plus puissant qu'il ne l'a été jusqu'présent sous l'emprise des valeurs judéo-chrétiennes Nietzsche propose ainsi une véritable transvaluation de toutes les valeurs qui se veut tout autre chose qu'un retour à la barbarie des origines Après l'analyse des tensions et des ruptures la faveur desquelles Nietzsche devient Nietzsche cet essai présente les concepts qui structurent son projet biológico-culturel L'étude de quelques post-réalistes peut alors montrer pour finir le caractère la fois fécond et dangereux de la réflexion nietzschéenne Celle-ci reste présente dans la pensée philosophique contemporaine en particulier chez les auteurs qui revendiquent une démarche génalogique Page 4 de la couverture **Nietzsche's**

Philosophy of Life Affirmation Michael J. McNeal, 2024-12-23 This anthology broadly examines the interrelated roles of art, science, and experimentation in Nietzsche's philosophical project. It is divided into two parts: the first organized around the theme of experimentally reconceiving our world; the second investigating the aforementioned subjects in Nietzsche's free spirit or middle period works. Together, the essays comprising the book underscore Nietzsche's concern that experimentation with values ultimately provides humankind with a new wherefore or purpose. Wide-ranging in its scope, this volume brings together a diverse group of scholars working in both the analytic and continental traditions to provide original insights into Nietzsche's thought. A unique contribution to the scholarship, it deepens understanding of the relationship between Nietzsche's critiques of art and science, the role this relationship plays in his futuristic thought, and the experimental life-affirming practices that his free spirit project may enable toward the transfiguration of humankind **Knowledge of Life Today** Jean

Gayon, Victor Petit, 2019-04-09 Knowledge of Life Today presents the thoughts of Jean Gayon, a major philosopher of science in France who is recognized across the Atlantic especially for his work in philosophy and the history of life sciences. The book is structured around Gayon's personal answers to questions put forward by Victor Petit. This approach combines scientific rigor and risk-taking in answers that go back to the fundamentals of the subject. As well as the relationship between philosophy and the history of science, Gayon discusses the main questions of the history and philosophy of biology that marked his intellectual journey: Darwin, evolutionary biology, genetics, and molecular biology, human evolution, and various aspects of the relationship between biology and society in contemporary times: racism, eugenics, biotechnology, biomedicine, etc. *Nietzsche on Memory and History* Anthony K. Jensen, Carlotta Santini, 2020-12-07 History and memory rank as central

themes in the philosophy of Friedrich Nietzsche As one of the last philosophers of the 19th century Nietzsche naturally belongs to the so called historical century The contentious exchange with the past and with antiquity as much as the mechanisms the dangers and the lessons of memory and tradition are continually examined and stand in close relationship with Nietzsche's vision of life and his project of human development As Jacob Burckhardt once wrote of the cultural critique to his Basel colleague Fundamentally you are always teaching history 9 13 1882 Following Burckhardt's judgment the contributors focus on the analysis of core questions in the philosophies of history and memory and their respective convergence in the thought of Nietzsche The epistemological relevance of these central concepts will be thematized alongside those concerning tradition and education The discussion of these rich themes unifies a broad spectrum of questions ranging from cultural memory to contemporary philosophy of mind The contributions are revised versions of selected papers presented at the 2018 conference of the annual meeting of the Nietzsche Society in Naumburg Biological Time, Historical Time, 2018-11-26 Biological Time Historical Time presents a new approach to 19th century thought and literature by focussing on the subject of time it offers a new perspective on the exchanges between French and German literary texts on the one hand and scientific disciplines on the other Hence the rivalling influences of the historical sciences and of the life sciences on literary texts are explored texts from various scientific domains medicine natural history biology history and multiple forms of vulgarisation are investigated Literary texts are analysed in their participation in and transformation of the scientific imagination Special attention is accorded to the temporal dimension this allows for an innovative account of key concepts of 19th century culture

Solidarity Between Species Frederic Keck, 2025-05-06 This book examines how the Covid 19 pandemic can be described as a biopolitical crisis taking into account a fact often overlooked by commentators Covid 19 is a zoonosis a disease transmissible between animal species The Sars Cov2 virus causing this respiratory disease circulated in bats before passing to humans under as yet mysterious conditions and it was transmitted from humans to other species notably mink and deer Building on Michel Foucault s revival of the term biopolitics and related notions disciplinary power pastoral power cynegetic power this book traces a set of public health measures taken over the last two centuries to control epidemics It underlines how the need to conserve virus strains in order to identify and anticipate their mutations has given rise to cryopolitics a set of techniques aimed at suspending the living in order to defer death The book then questions the emancipatory scope of this cryopolitics by examining interspecies solidarity built by the warning signals sent by animals to humans about coming threats be they pandemics natural disasters or climate change By blurring the boundaries between the wild and the domestic resulting from the process of domestication the politics of zoonoses relies on sentinels who preserve the memory of signs from the past to prepare living beings for future threats by involving them in a common ideal

Arte, imagen y experiencia: perspectivas estéticas
María Cecilia Salas Guerra, 2021-09-01

El desastre y la guerra obrándose en el arte y la imagen. El cuerpo vivido transformándose en la experiencia performática. El caos y el vacío habitando los gestos y los trazos. El éxtasis dionisiaco dando apertura a la sabiduría. Frente a estos mbitos heterogéneos en apariencia la teoría estética y la historia del arte se formulan preguntas o mejor ser decir las escuchan sin la pretensión de resolverlas sino con el ánimo de mantener abierto el campo entre la imagen y la palabra, entre la creación poética literaria y la teoría crítica porque la experiencia estética es ella misma apertura que acontece en la temporalidad paradójica del deseo, la conmoción y el duelo y en el espacio abierto de la percepción y la mirada de los trazos y los gestos.
