**The End of Development** Andrew Brooks, 2017-05-15 Why did some countries grow rich while others remained poor Human history unfolded differently across the globe The world is separated into places of poverty and prosperity Tracing the long arc of human history from hunter gatherer societies to the early twenty first century in an argument grounded in a deep understanding of geography Andrew Brooks rejects popular explanations for the divergence of nations This accessible and illuminating volume shows how the wealth of the West and poverty of the rest stem not from environmental factors or some unique European cultural social or technological qualities but from the expansion of colonialism and the rise of America Brooks puts the case that international inequality was moulded by capitalist development over the last 500 years After the Second World War international aid projects failed to close the gap between developed and developing nations and millions remain impoverished Rather than address the root causes of inequality overseas development assistance exacerbate the problems of an uneven world by imposing crippling debts and destructive neoliberal policies on poor countries But this flawed form of development is now coming to an end as the emerging economies of Asia and Africa begin to assert themselves on the world stage The End of Development provides a compelling account of how human history unfolded differently in varied regions of the world Brooks argues that we must now seize the opportunity afforded by today's changing economic geography to transform attitudes towards inequality and to develop radical new approaches to addressing global poverty as the alternative is to accept that impoverishment is somehow part of the natural order of things

**Pathways to Peacebuilding** Uchenna D. Anyanwu, 2022-11-30 Given the consistent challenge of Islamist acute violence particularly in Nigeria this monograph attempts to respond to the question How can Jesus's followers pattern response to violence after Jesus's model demonstrated in his triumph over death evil sin and violence through staurocentric pathways And how can Jesus's followers in Nigeria adopt the same staurocentric model in order to not only overcome acute violence within the country but also to extend hands heads hearts and homes of staurocentric forgiveness hospitality and other practices toward Muslims In this study I posit that peacebuilding contextual theology be grounded on the mystery of the cross stauros a theologico theoretical framework that the church in Nigeria should espouse in order to position herself to extend hands heads hearts and homes of staurocentric practices whose appropriation must be undertaken through constructive and critical integration of the God given African peacebuilding concepts autochthonous to Africa's mosaic cultural contexts The pivotal thesis is that the staurocentric model remains the triune God's instrument for triumphing over violence and thus should be espoused by Jesus's followers in every era and context for peacebuilding in contexts of violence through a triadic constructive and critical integration of indigenous peacebuilding concepts

Christianity and Transforming States David Emmanuel Singh, 2024-10 Christians can be both victims and victimizers and herein lies this

volume's unique contribution Offering a two-sided approach this book examines what it means to live as a Christian minority both in non-Christian societies and in societies where other forms of Christianity are dominant **Dictators and Autocrats**

Klaus Larres, 2021-10-31 In order to truly understand the emergence, endurance, and legacy of autocracy, this volume of engaging essays explores how autocratic power is acquired, exercised, and transferred or abruptly ended through the careers and politics of influential figures in more than 20 countries and six regions. The book looks at both traditional hard dictators such as Hitler, Stalin, and Mao, and more modern soft or populist autocrats who are in the process of transforming once fully democratic countries into autocratic states, including Recep Tayyip Erdoğan in Turkey, Brazilian leader Jair Bolsonaro, Rodrigo Duterte in the Philippines, Narendra Modi in India, and Viktor Orbán in Hungary. The authors touch on a wide range of autocratic and dictatorial figures in the past and present, including present-day autocrats such as Vladimir Putin and Xi Jinping, military leaders, and democratic leaders with authoritarian aspirations. They analyze the transition of selected autocrats from democratic or benign semi-democratic systems to harsher forms of autocracy, with either quite disastrous or more successful outcomes. An ideal reader for students and scholars, as well as the general public interested in international affairs, leadership studies, contemporary history and politics, global studies, security studies, economics, psychology, and behavioral studies. *Media Governance*

Sarah Anne Ganter, Hanan Badr, 2022-11-30 The book offers a critical map to navigate the field of media governance. A thread of cosmopolitan critique connects the fourteen chapters to enhance media governance literature beyond the West and regional foci. The first part addresses the epistemological and ontological flaws in the use and adaptation of media governance. The second part opens pathways for critique and provides a thorough understanding of the ambivalences that scholars encounter when addressing media governance as a field of study. The third part highlights shortcomings like geographical narrowness and tensions in the use of media governance concepts. The scholarly contributions show that media governance as a field of study is far from being established; its conceptualizations are in flux and need scholarly self-reflection, and ongoing discussions need to leave behind universalist conceptualizations and methods of analysis. The chapters reflect on hegemony, power, sovereignty, and identity as conceptual center points in media governance research. The book uniquely breaks with self-referential Western academia and is part of ongoing collaborative scholarly efforts towards epistemic transformation through dialogue. **Dictators, Dictatorship and the African Novel**

Robert Spencer, 2021-03-01 This book examines the representation of dictators and dictatorships in African fiction. It examines how the texts clarify the origins of postcolonial dictatorships and explore the shape of the democratic, egalitarian alternatives. The first chapter explains the neoliberal period after the 1970s as an effective recolonization of Africa by Western states and international financial institutions. Dictatorship is theorised as a form of concentrated economic and political power that facilitates Africa's continued dependency in the context of world capitalism. The deepest aspiration of anti-colonial revolution remains the democratization of these authoritarian states inherited from the colonial period. This book
