He addresses how to shoot in any type of light and looks at color families and how they can work together to make compelling images in commercial and art photography. He also helps readers understand exposure, flash, and other stumbling blocks that beginning and experienced photographers encounter when capturing images, showing how to get the most out of any composition. *The Nikon Autofocus System, 2nd Edition* Mike Hagen, 2017-05-02. With today's advanced camera technology, achieving focus on a photographic subject seems like it should be a straightforward task, but many photographers know that it can be deceptively difficult, especially when shooting moving subjects or in challenging situations. Now there is a complete guide available for Nikon shooters that will help them get tack-sharp photos every time.

**The Nikon Autofocus System, 2nd Edition** photographer Mike Hagen, author of the bestselling *The Nikon Creative Lighting System*, takes his deep knowledge of Nikon technology and concentrates on its focus features. In this book, which covers all current Nikon DSLR models including the D5 and D500, Hagen fully explains how Nikon autofocus works, including detailed discussions of all the autofocus modules, drive systems, and camera buttons and menus. He also devotes an entire chapter to explore how focus works with Nikon's lenses. Armed with this general knowledge, Hagen then dives deep and offers camera setups, settings, and best practices for specific field techniques that address the photographic genres that are notoriously challenging for focus: action and sports, indoor and outdoor wildlife (including birds in flight) and macro photography. He also covers genres such as portrait, landscape, underwater, low light, and street photography. Hagen not only advises on the best ways to set up the camera and focus systems, he gives helpful tips and tricks throughout the book. *The Nikon Autofocus System* also covers Live View autofocus methods and settings, achieving great focus in video, AF tracking, AF shooting styles such as back-button AF and shutter release AF, HDR, panoramas, and other techniques for shooting with a tripod. An entire chapter on additional terms and techniques such as hyperfocal distance, calibrating lenses, focus, and flash photography, and more.
