A User's Guide to the Meade LXD55 and LXD75 Telescopes Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade s Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope

Popular Photography ,2005-06 **Retro Camera Buying Guide & How to Pack a Gadget Bag** Shawn M. Tomlinson,2015-07-03 Photographer and writer Shawn M Tomlinson author of the Photo Curmudgeon column and books gives the budding photographer an inexpensive way to move into serious photography with good equipment Tomlinson considers the financial restrictions of novice photographers in this how to book that gives detailed step by step help He illustrates his points with many photographs shot with the cameras he recommends As a bonus this book also contains Volume 2 of the Shawn M Tomlinson s Guide to Photography series How to Pack a Camera Gadget Bag

Vol. 26: Medium-Format Photography: Getting Started Shawn M. Tomlinson,2018-12-14

Simply put medium format photography is quite a bit more complex than shooting with 35mm film SLRs or 35mm style DSLRs. It takes a bit more skill and experience to handle medium format cameras. Not only do you need to learn to think differently about how you shoot but you also have a whole new type of equipment to learn. Medium format cameras produce bigger images which allows for more detail and greater enlargement. And because they in general were designed for professional photographers the lenses tend to be of better quality than most 35mm lenses which also adds to the detail in the images. In this book we'll take a look at medium format SLRs and TLRs and we'll even touch upon some other types. We'll also consider a few lenses although these largely are a matter of choice. And there are far fewer choices for medium format cameras than for other types. Time to do some weight training and heft those medium format cameras and lenses into position. Let's go.

American Photo, 2004-07. Photography: Choosing Your Film SLR Shawn M. Tomlinson, 2018-02-22. Film cameras the bodies themselves have little to do with image quality. Lenses are far more important to image quality than camera bodies. So as long as your camera has accurate shutter speeds, aperture settings and metering the brand you pick doesn't really have much of an effect upon the final image. So then it appears the model camera you choose is irrelevant. Well no. The type of film SLR camera you choose is most important to you as the photographer in features and convenience. Comfort has a lot to do with how good you are as a photographer. What

I mean by that is that you choose a camera that feels comfortable in your hands and becomes an extension of your brain as a photographer This makes it easier to capture the types of images you want Time Book 6: Ice Time Shawn M.
