Interfaces Between Language And Cognition Yury Y. Shtyrov, Andriy Myachykov, Christoph Scheepers, 2013-06-28 Cognitive mechanisms underlying linguistic communication do not only rely upon retrieval and processing of linguistic information they also involve constant updating

and organizing of this linguistic information in relation with other more general cognitive mechanisms Some existing theoretical models assume such a tight interactive link between domain general and domain specific sources of information in the cognitive organization of the linguistic faculty and during language use Domain specific constraints may include for example grammatical as well as lexical and pragmatic knowledge Domain general constraints comprise processing limitations imposed by the cognitive mechanisms of memory attention learning and social interaction However much of the existing research tends to focus on one or the other of the aforementioned areas while integrative accounts are still rather sparse at present Therefore the aim of this Research Topic of Frontiers in Cognition is to bring together researchers who with in their respective research fields and by using different methodologies represent integrative approaches to the study of language We invite submissions from a wide range of interrelated areas of research cognitive architectures of language aspects of language processing linguistic development bilingualism language embodiment neuropsychology of linguistic function among others We would like to solicit original research contributions discussing behavioral neurophysiological and computational evidence as well as papers on methodological and or theoretical aspects of the interplay between linguistic and non linguistic cognitive processes
