## **Middle Ages Zoom In On:**

**Rural Space in the Middle Ages and Early Modern Age** Albrecht Classen, 2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic

**Illuminating the Word in the Early Middle Ages** Lawrence Nees, 2023-10-05 This richly illustrated study shows how modern systems of textual presentation grew from techniques developed in the medieval period *The Medieval World* Peter Linehan, Janet L. Nelson, 2013-09-13 This groundbreaking collection brings the Middle Ages to life and conveys the distinctiveness of this diverse constantly changing period Thirty eight scholars bring together one medieval world from many disparate worlds from Connacht to Constantinople and from Tynemouth to Timbuktu This extraordinary set of reconstructions presents the reader with a vivid re drawing of the medieval past offering fresh appraisals of the evidence and modern historical writing Chapters are thematically linked in four sections identities beliefs social values and symbolic order power and power structures elites organizations and groups Packed full of original scholarship The Medieval World is essential reading for anyone studying medieval history

**Urban Space in the Middle Ages and the Early Modern Age** Albrecht Classen, 2009-12-15 Although the city as a central entity did not simply disappear with the Fall of the Roman Empire the development of urban space at least since the twelfth century played a major role in the history of medieval and early modern mentality within a social economic and religious framework Whereas some poets projected urban space as a new utopia others simply reflected the new significance of the urban environment as a stage where their characters operate very successfully As today the premodern city was the locus where different social groups and classes got together sometimes peacefully sometimes in hostile terms The historical development of the relationship between Christians and Jews for instance was deeply determined by the living conditions within a city By the late Middle Ages nobility and bourgeoisie began to intermingle within the urban space which set the stage for dramatic and far reaching changes in the social and economic make up of society Legal historical aspects also find as much consideration as practical questions concerning water supply and sewer systems

Moreover the early modern city within the Ottoman and Middle Eastern world likewise finds consideration Finally as some contributors observe the urban space provided considerable opportunities for women to carve out a niche for themselves in economic terms

**Zoom in on the Middle Ages**, 1998 This book describes daily life for the rich and the poor in the medieval world from costumes and castles to farming and jousting Readers can also enjoy the story about the true identity of a knight returning from the crusades

*Atlas of Medieval Europe* David Ditchburn, Angus Mackay, 2002-09-11 Covering the period from the fall of the Roman Empire through to the beginnings of the Renaissance this is an indispensable volume which brings the complex and colourful history of the Middle Ages to life Key features geographical coverage extends to the broadest definition of Europe from the Atlantic coast to the Russian steppes each map approaches a separate issue or series of events in Medieval history whilst a commentary locates it in its broader context as a body the maps provide a vivid representation of the development of nations peoples and social structures With over 140 maps expert commentaries and an extensive bibliography this is the essential reference for those who are striving to understand the fundamental issues of this period

**Mezzi di scambio non monetari. Merci e servizi come monete alternative nelle economie dei secoli XIII-XVIII / Alternative currencies. Commodities and services as exchange currencies in the monetarized economies of the 13th to 18th centuries** Angela Orlandi, 2024-05-08 The volume focuses on the importance and placement of alternative exchange practices in the 13th to 18th centuries specifically examining goods and services used as means of payment in barter or in kind transactions Despite monetary theory emphasizing credit and real currency coins or paper money did not prevent in kind transactions Barter isn't merely a result of a lack of money but rather an economic choice with diverse reasons meanings and consequences found in both rural and urban areas These alternative exchange methods go beyond mere stopgaps and impact all economic activities from production to consumption

Nature in the Middle Ages and the Early Modern Times Albrecht Classen, 2024-07-01 The study of pre modern anthropology requires the close examination of the relationship between nature and human society which has been both precarious and threatening as well as productive soothing inviting and pleasurable Much depends on the specific circumstances as the works by philosophers theologians poets artists and medical practitioners have regularly demonstrated It would not be good enough as previous scholarship has commonly done to examine simply what the various writers or artists had to say about nature While modern scientists consider just the hard core data of the objective world cultural historians and literary scholars endeavor to comprehend the deeper meaning of the concept of nature presented by countless writers and artists Only when we have a good grasp of the interactions between people and their natural environment are we in a position to identify and interpret mental structures social and economic relationships medical and scientific concepts of human health and the messages about all existence as depicted in major art works In light of the current conditions threatening to bring upon us a global crisis it matters centrally to take into consideration pre modern discourses on nature and its enormous powers to understand the

topoi and tropes determining the concepts through which we perceive nature Nature thus proves to be a force far beyond all human comprehensibility being both material and spiritual depending on our critical approaches

**Fear and Fantasy in a Global World**, 2015-09-01 At a time when the mass media insist on bombarding us with news about natural political and economic disasters words ideas and images associated with such crises and catastrophes shape to a great extent collective memory and current imagination Fear and Fantasy in a Global World seeks to stir the debate on the processes and meanings of as well as on the relations between fear and fantasy in the globalized world Collective fears and fantasies are analysed from a number of cross disciplinary perspectives promoted by the epistemological underpinnings of comparative literature In various ways and from different disciplinary angles the 17 essays here gathered respond to and scrutinize key questions related to the imaginaries of fear and fantasy as well as their relations to trauma crisis anxiety and representations of both the conscious and the unconscious Contributors Alexandra Hills Ana Filipa Prata Brecht de Groote Christin Grunert Christopher Bollas Daniela Di Pasquale David Vichnar Edith Beltr n Gero Guttzeit Hande Gurses Harriet Hulme James Rushing Daniel Jo o Pedro da Costa Margarita Garc a Candeira Marija Sruk Martijn Boven and Ortwin de Graef

**Erasmus and the Middle Ages** István Bejczy, 2001-08-06 The aim of this book is to examine Erasmus attitude toward the medieval past and to relate it to his historical consciousness More than any other Renaissance humanist Erasmus was committed to the goal of building an alternative to medieval civilisation In his view the restoration and study of ancient pagan and Christian literature would result in an elevation of cultural and intellectual as well as moral and spiritual standards Yet these very assumptions appear to be challenged by Erasmus specific observations on the course of history up to his own day The present study is the first to show a fault line between the basic ideas of Erasmus Christian humanism and his view of the actual development of humanity through the ages

**Eye for Detail** Florike Egmond, 2021-09-20 Image transforming techniques such as close up time lapse and layering are generally associated with the age of photography but as Florike Egmond shows in this book they were already being used half a millennium ago Exploring the world of natural history drawings from the Renaissance Eye for Detail shows how the function of identification led to image manipulation techniques that will look uncannily familiar to the modern viewer Egmond shows how the format of images in nature studies changed dramatically during the Renaissance period as high definition naturalistic representation became the rule during a robust output of plant and animal drawings She examines what visual techniques like magnification can tell us about how early modern Europeans studied and ordered living nature and she focuses on how attention to visual detail was motivated by an overriding question the secret of the origins of life Beautifully and precisely illustrated throughout this volume serves as an arresting guide to the massive European collections of nature drawings and an absorbing study of natural history art of the sixteenth century

**Disruption in the Arts** Lars Koch, Tobias Nanz, Johannes Pause, 2018-08-21 The volume examines from a comparative perspective the phenomenon of aesthetic disruption within the various arts in contemporary culture It assumes

that the political potential of contemporary art is not solely derived from presenting its audiences with openly political content but rather from creating a space of perception and interaction using formal means a space that makes hegemonic structures of action and communication observable thus problematizing their self evidence The contributions conceptualize historical and contemporary politics of form in the media which aim to be more than mere shock strategies which are concerned not just with the narcissistic exhibition of art as art but also with the creation of a new common horizon of experience They combine the analysis of paradigmatic works procedures and actions with reference to theoretical debates in the fields of literature media and art of the twentieth and twenty first centuries The essay collection shows how textual visual auditive or performative strategies disclose their own ways of functioning intervene in automated processes of reception and thus work on stimulating a sense of political possibilities The editors acknowledge support from the European Union s Seventh Framework Program FP 7 2007 2013 ERC grant agreement no 312454

**log linear analysis wikipedia** - Sep 15 2023

log linear analysis is a technique used in statistics to examine the relationship between more than two categorical variables the technique is used for both hypothesis testing and model building in both these uses models are tested to find the most parsimonious i e least complex model that best accounts for the variance in the observed frequencies a pearson s chi square test could be used instead of log linear analysis but that technique only allows for two of the variables to be c
