The landmasses are depicted with warm, textured colors like ochre, terracotta, and sienna, while the surrounding waters are in deep, dark blues and blacks. The style is expressive, with visible brushstrokes and a torn-paper-like edge effect.

Imagining God Humberto Casanova,2020-02-05 An ever growing number of Christians are becoming more and more uncomfortable with the tenets of the church the stories of the Bible and the church's worldview Statistics show that these feelings easily escalate into a crisis of faith and for now their predicament is being resolved by leaving the church This book will certainly help dealing with the crisis by showing that the language of faith is built by a web of metaphors taken from the Ancient Near East We do not need to take biblical language literally but as parables for human values in need to be assessed critically *The Role of Law in Transboundary River Basin Disputes* Chukwuebuka Edum,2023-12-22 This book examines the role legal rules play in the resolution of disputes in transboundary river basins When states fail to resolve disputes over shared water resources many cast such failures on inadequate or ineffective legal rules With this view in mind this book examines the role that legal rules do and can play in aiding the peaceful settlement of disputes and furthering cooperation between different parties Building on the interactional theory of law this book formulates three analytical frameworks the effect of norm generating processes the effects of water related agreements and or arrangements in the basins and the effect

of international water It uses these frameworks to assess the role of law in the processes of cooperation and peaceful settlement of disputes on transboundary river basin by drawing on four illustrative case studies the Jordan River Basin the Nile River Basin the Mekong River Basin and the Indus River Basin In doing so this book presents a unique perspective on the multi functional role of legal rules in those processes Tapping into the global discussion on water security and water related conflicts this book stimulates readers to explore broader or interdisciplinary perspectives for understanding water related issues This book will be of great interest to students and scholars interested in water resource management water law environmental politics conflict resolution and sustainable development more generally

Slavery, Agriculture, and Malaria in the Arabian Peninsula Benjamin Reilly, 2015-10-29 In *Slavery Agriculture and Malaria in the Arabian Peninsula* Benjamin Reilly illuminates a previously unstudied phenomenon the large scale employment of people of African ancestry as slaves in agricultural oases within the Arabian Peninsula The key to understanding this unusual system Reilly argues is the prevalence of malaria within Arabian Peninsula oases and drainage basins which rendered agricultural lands in Arabia extremely unhealthy for people without genetic or acquired resistance to malarial fevers In this way Arabian slave agriculture had unexpected similarities to slavery as practiced in the Caribbean and Brazil This book synthesizes for the first time a body of historical and ethnographic data about slave based agriculture in the Arabian Peninsula Reilly uses an innovative methodology to analyze the limited historical record and a multidisciplinary approach to complicate our understandings of the nature of work in an area that is popularly thought of solely as desert This work makes significant contributions both to the global literature on slavery and to the environmental history of the Middle East an area that has thus far received little attention from scholars
