Vandenabeele,Howell Edwards,2018-10-26 Ten years after the first volume this book highlights the important contribution
Raman spectroscopy makes as a non destructive method for characterising the chemical composition of objects with
archaeological and historical importance The original book was ground breaking in its concept but the past ten years have
seen some advancement into new areas consolidation of some of the older ones and novel applications involving portable
instrumentation on site in museums and in the field This new volume maintains the topic at the cutting edge the Editors have
approached prominent contributors to provide case studies sorted into themes Starting with a Foreword from the British
Museum Director of Scientific Research and an Introduction from the Editors which offer general background information
and theoretical context the contributions then provide global perspectives on this powerful analytical tool Aimed at scientists
involved in conservation conservators and curators who want to better understand their collections at a material level and
researchers of cultural heritage *Advances in Computer Vision and Computational Biology* Hamid R. Arabnia,Leonidas
