private and no matter what their ostensible purpose _ to increase and safety and prosperity of the kingdom The design and building of ships and harbour facilities the development of navigation ship handling and the world of the seaman are all described while comparisons with the navies of England s closest neighbours with particular focus on France and Scotland are made and notable battles including Damme Dover Sluys and La Rochelle included to explain the development of battle tactics and the use of arms during the period The author shows in this lucid and enlightening narrative how the unspoken aim of successive monarchs was to begin to build the wall of England its naval defences with a success which was to become so apparent in later centuries
