Profundity Jean Gabbert Harrell,2010-11 The crisis or death of philosophy currently identified both within and outside professional circles is commonly attributed to the failure to find universals in metaphysics epistemology and most obviously in valuational judgment Profundity concentrates on an

assumption uniformly upheld in the theory of value that all human values are contextually dependent Harrell contends to the contrary that there exists one major value that is universal to humans regardless of context That value is profundity or depth Considering how profundity is used in our language leads Harrell to identify two fundamental sensory patterns that are common to all human life at its origin an auditory pattern that is first experienced before birth and a visual one that is experienced immediately after birth From analysis of these patterns as they recur in music and the visual arts Harrell moves on to discuss their related manifestations in religious doctrine ceremony and experience and also in works of literature Overall her theory entails a radical revamping of the concept of creativity since no artist can create profundity as a universal value and provides the first full scale treatment of profundity in the history of Western philosophy      **Wedding Performer:**
