Federal Register, 2013-11 **Role of Reservoir Operation in Sustainable Water Supply to Subak Irrigation Schemes in Yeh Ho River Basin** Mawiti Infantri Yekti, 2017-07-12. Quantitative research with respect to the combination of engineering and social/cultural/religious aspects based on the Tri Hita Karana philosophy in Subak irrigation schemes is original in the field of land and water development. A scenario analysis needs a good and careful system approach. Based on a Generic Algorithm, the RIBASIM model was applied using the dependable 80% of discharge and shifting the start of land preparation. The results provide evidence that the cropping pattern of the fifth scenario results in an overall optimal agriculture production of the Subak schemes. The recoverable flow considered in the river basin scheme model plays an important role in the optimisation. Nevertheless, if a normal hydro-climate occurs, the other scenarios, especially the first scenario, can be applied as well. When the indigenous knowledge of farmers is compromised with present-day knowledge of agricultural and technological developments, capability of these farmers increases, thus reflecting the applicability of the Tri Hita Karana philosophy on harmony among people and harmony among people and nature.

The Life and Times of George Fernandes Rahul Ramagundam, 2022-07-25. The Militant Trade Union Leader, The Dauntless Political Rebel, The Passionate Socialist Dreamer. This is a biography of India's George Fernandes. George Fernandes (1930-2019), a firebrand trade union leader, socialist politician and incredibly powerful orator, is popularly known for leading the All India Railwaymen's Federation (AIRF) in May 1974 and calling upon its approximately 1.7 million employees to strike, which brought India to a halt for twenty days. Often described as a rebel, he pursued every cause he took up with passionate devotion, heedless of the many ups and downs in his life. From the early years of fighting for the rights of dock and municipal workers of Bombay (now Mumbai) through the Emergency, which he resisted by going underground, to his last private decade as a bed-ridden Alzheimer's patient, his fights were always persistent and single-handed. George could call Bombay to be shut down and rose from its streets to become India's Defence Minister. The Life and Times of George Fernandes chronicles the story of George who rose from the streets of Bombay to stride the corridors of power. In this extraordinary biography, Rahul Ramagundam opens a window to George's political evolution and traces the course of the Socialist Party in India from its

inception in 1930s to its dissolution into the Janata Party in the late 1970s In the process this book explores the trail of India's opposition parties that worked to displace the long ruling Congress Party from its preeminent position Comprehensive evocative and fascinating this first definitive biography of George Fernandes is an unputdownable tour de force

Integration of Legume Crops with Cereal Crops Under Changing Climate Samiha Ouda, Abd El-Hafeez Zohry, 2024-09-02 The world population is steadily increases with high rate in the past decade from 7 126 billion inhabitants in 2012 to 8 095 billion inhabitants in 2024 with 14% increase In the meantime the number of severely food insecure people were 604 5 million in 2014 which increased by 53% in 2020 to reach 927 6 million people These numbers raise large concerns about the future of food production to feed these continually growing population Lately many developing countries rely on importing large quantities of crops such as wheat maize and rice to meet their food and feed needs The negative impact of climate change and its consequences namely high temperature causing low crops productivity and water scarcity which causing great disruptions in food production systems Therefore increasing the production of cereal crops worldwide can be achieved through increasing average yield per unit area or expanding the area devoted to cereals into more marginal lands Moreover breeding for more resilient cultivars which can release its potential yield could play an important role in increasing total production under the adverse growth conditions Inclusion of legume crops such as soybean peanut and cowpea in cereal based cropping systems is a viable strategy to increase production of cereal crops It also helps in reducing the use of chemical fertilizer It has been reported that intercropping legume crops with cereal crops can increase the productivity of both crops Additionally an increase in soil nitrogen phosphorus and potassium has been also reported when legume crops were included in cereal based cropping system It has been also reported that inclusion of legume crops increases the soil

water holding capacity and water used efficiency Thus inclusion of legume crops in cereal based cropping systems can increase its productivity as well as attains the sustainable use of soil and water resources In this book we will thoroughly tackle the benefits of the integration of legume crops within cereal based cropping system namely wheat maize and rice paddy and upland under the changing climate current and future We also reviewed the innovations and interventions that could sustainably intensify the production of cereals to reduce hunger and poverty We will use both modeling and simulation approaches to assess the impact of climate change using CMIP6 mean projection of two future scenarios namely SSP1 2 6 and SSP5 8 5 in two time intervals 2060 2079 and 2080 2099 on the yield and water requirements of wheat maize and rice paddy and upland

The Revaluation of Women's Work Sheila Lewenhak,2013-11-05 This book provides a survey and analysis of the different ways in which women s work is valued throughout the world It challenges the narrow definition of work as paid work as that excludes so many of women s activities It looks at ways in which women s worth has been consistently undervalued in industrial as well as non industrial countries in socialist as well as free enterprise economies These practices distort the national product of countries

heavily dependent on women's labour but above all they are among the most obvious marks of the exploitation of women. Technological changes are already altering established female-male divisions of labour. Transnational enterprises often located in Special Economic Zones are reducing differences between industrial and nonindustrial countries. Valuing women's work correctly, whether unpaid in the home or underpaid outside it, is part of the battle against discrimination and poverty. Men who do similar work also benefit. It is the crucial step towards the achievement of male-female equality. The book will be particularly valuable for those concerned with the issues in trade unions, women's groups, international agencies and NGOs and for course in economics and social studies.
