RUN CHART

REFLECTIONS & LEARNING

- Idea was well received by junior colleagues who noticed they had a prescribing resource when they first started the rotation.
- Producing a prescribing resource for neonatal infections and asthma took several revisions and was time intensive.
- Lessons learnt: To focus on a specific medication and spend more time on the distribution of the resource. In PDCA 2.2, after feedback from members I focused on neonatal infections only alone.
- Limitations: Prescribed confidence likely to be higher at the time of testing as it is closer to the end of the rotation, limited time period for resource to be used regularly.
- Future developments/PDCA: Distributing the resource as a reference card attached to a template displaying it in areas where prescribing occurs i.e. neonatal unit.
