Silberman,1993-06 Blending political historical and sociological analysis Bernard S Silberman offers a provocative explanation for the bureaucratic development of the modern state The

study of modern state bureaucracy has its origins in Max Weber's analysis of the modes of social domination which Silberman takes as his starting point. Whereas Weber contends that the administration of all modern nation states would eventually converge in one form characterized by rationality and legal authority, Silberman argues that the process of bureaucratic rationalization took in fact two courses. One path is characterized by permeable organizational boundaries and the allocation of information by professionals. The other features well defined boundaries and the allocation of information by organizational rules. Through case studies of France, Japan, the United States and Great Britain, Silberman demonstrates that this divergence stems from differences in leadership structure and in levels of uncertainty about leadership succession in the nineteenth century. Silberman concludes that the rise of bureaucratic rationality was primarily a response to political problems rather than social and economic concerns. Cages of Reason demonstrates how rationalization can have occurred over a wide range of cultures at various levels of economic development. It will be of considerable interest to readers in a number of disciplines: political science, sociology, history and public administration. Silberman has produced an invaluable, densely packed work that those with deep knowledge of public administrative development will find extremely rewarding. David H. Rosenbloom, *American Political Science Review*. An erudite, incisive and vibrant book, the product of intensive study and careful reflection. Given its innovative theoretical framework and the wealth of historical materials contained in it, this study will generate debate and stimulate research in sociology, political science and organizational theory. It is undoubtedly the best book on the comparative evolution of the modern state published in the last decade. Mauro F. Guillen, *Contemporary Sociology*.

But his money doesn't provide a happy marriage or good relationships with his twin daughters, and it does nothing to protect his family. **Pupil Experience** John F. Schostak, Tom

Logan, 2019-08-13. First published in 1984, this book focuses upon pupil perspectives of schooling from first school to school leaver, taking their thoughts and feelings as accurate assessments of their experience. The study presents what was at the time new thinking and research findings on a wide range of important topics to provide an insight in **The Times Index**
