Persistence and Spacetime Yuri Balashov, 2010-04-29 Material objects persist through time and survive change How do

they manage to do so What are the underlying facts of persistence Do objects persist by being wholly present at all moments of time at which they exist Or do they persist by having distinct temporal segments confined to the corresponding times Are objects three dimensional entities extended in space but not in time Or are they four dimensional spacetime worms These are matters of intense debate which is now driven by concerns about two major issues in fundamental ontology parthood and location It is in this context that broadly empirical considerations are increasingly brought to bear on the debate about persistence Persistence and Spacetime pursues this empirically based approach to the questions Yuri Balashov begins by setting out major rival views of persistence endurance perdurance and exdurance in a spacetime framework and proceeds to investigate the implications of Einstein s theory of relativity for the debate about persistence His overall conclusion that relativistic considerations favour four dimensionalism over three dimensionalism is hardly surprising It is however anything but trivial Contrary to a common misconception there is no straightforward argument from relativity to four dimensionalism The issues involved are complex and the debate is closely entangled with a number of other philosophical disputes including those about the nature and ontology of time parts and wholes material constitution causation and properties and vagueness

Metaphysical Realism and Anti-Realism J. T. M. Miller,2022-07-07 Minimally metaphysical realists hold that there exist some mind independent entities Metaphysical realists also tend to hold that we can speak meaningfully or truthfully about mind independent entities Those who reject metaphysical realism deny one or more of these commitments This Element aims to introduce the reader to the core commitments of metaphysical realism and to illustrate how these commitments have changed over time by surveying some of the main families of views that realism has been contrasted with such as radical scepticism idealism and anti realism [Conceptual Engineering and Conceptual Ethics](#) Alexis

Burgess,Herman Cappelen,David Plunkett,2020 Conceptual engineering is a newly flourishing branch of philosophy which investigates problems with our concepts and considers how they might be ameliorated truth for instance is susceptible to paradox and it s not clear what race stands for This is the first collective exploration of possibilities and problems of conceptual engineering **Porphyry: On Aristotle Categories** S. Strange,2014-04-10 Porphyry AD 232 3 C 305 is of

crucial importance for the history of Aristotelian studies Born in Tyre and a student of Plotinus in Rome he later defended Aristotle s Categories against Plotinus arguing that they were entirely compatible with Platonism His intervention was decisive the Categories became a basic textbook of logic for all subsequent Neoplatonist teaching and influenced both the Arabic and Western Traditions Boethius drew heavily on Porphyry s treatment The full commentary is lost but a shorter version survives and is translated here [The Bloomsbury Companion to Philosophy of Mind](#) James Garvey,2015-06-18 Featuring thirteen specially commissioned chapters on core subjects The Bloomsbury Companion to Philosophy of Mind is an essential tool for all those studying and working in the field purpose built for use on courses in this area of philosophy Beginning with How to Use this Book the Companion includes overviews of perennial problems and new directions in

contemporary philosophy of mind an extended glossary of terms for quick reference a detailed chronology a guide to research for ongoing study and a comprehensive bibliography of key classic and contemporary publications in the philosophy of mind From new questions concerning qualia representation embodiment and cognition to fresh thinking about the long standing problems of physicalism dualism personal identity and mental causation this book is an authoritative survey of the latest research from experts in one of the most active areas of philosophical inquiry Why God Must Do What is Best Justin J. Daeley, 2021-09-09 The idea that God understood as the most perfect being must create the best possible world is often underacknowledged by contemporary theologians and philosophers of religion This book clearly demonstrates the rationale for what Justin J Daeley calls Theistic Optimism and interacts with the existing literature in order to highlight its limitations While locating Theistic Optimism in the thought of Gottfried Leibniz Daeley argues that Theistic Optimism is consistent with divine freedom aseity gratitude and our typical modal intuitions By offering plausible solutions to each of the criticisms levelled against Theistic Optimism he also provides a vigorous and original defence against the charge that it deviates from the Christian tradition Engaging with both the Christian tradition and contemporary theologians and philosophers *Why God Must Do What is Best* positions the idea of Theistic Optimism firmly within the language of contemporary philosophy of religion

A Metaphysics of Platonic Universals and their Instantiations José Tomás Alvarado, 2020-10-27 This book offers a detailed defense of a metaphysics of Platonic universals and a conception of particular objects that is coherent with said metaphysics The work discusses all the main alternatives in metaphysics of properties and tries to show why universals are the entities that best satisfy the theoretical roles required for a property The work also explains the advantages of Platonic over Aristotelian universals in the metaphysics of modality and natural laws Moreover it is argued that only Platonic universals are coherent with the grounding profile required for universals The traditional objections against Platonism are discussed and answered The third part of the book finally offers a conception of particular objects as nuclear bundles of tropes that is coherent with the Platonic ontology of universals This book is of interest to anyone that wants to understand the current and intricate debate in metaphysics of properties and its incidence in many other areas in philosophy

Taking Moral Theorising Seriously Andrew Sneddon, 2025-09-30 This book develops a plausible and novel account of methodology for moral philosophy It focuses on the structural features of moral theories specifically what is taken as input and the process of theorising itself Philosophers have long neglected the difficulties of identifying and using good input for moral theorising The first part of the book argues that we should use contrastively successful judgements as input A moral judgement about a case must be shown to be interpersonally superior to alternatives to qualify as input for moral theorising The next part of the book follows recent work on theoretical virtues in science to develop an account of virtues of moral theories It argues that moral theorists should seek defeasibly parallel maximisation of the virtues of moral theories It then applies this overall account of a method for moral philosophy to the topic of agent relativity and agent neutrality *Taking Moral Theorising*

Seriously will appeal to researchers and graduate students interested in moral philosophy and philosophical methodology
