## **Charting a Course for the 21st Century: A Strategic Plan for Future Health Initiatives in the U.S.-Associated Pacific Basin**

The committee strongly recommends continued U.S. involvement and investment in the region's health care. The nature and scope of this involvement and investment, however, must change. Beyond merely providing health care—a great challenge in its own right—the United States and the island communities must work together with a renewed sense of partnership to produce improved health of Pacific Islanders.

To achieve this goal of improved health the committee recommends a four-pronged approach:

- 1. Adopt a viable system of community-based primary care and preventive services.**
- 2. Improve coordination within and between the jurisdictions and the United States.**
- 3. Increase community involvement and investment in health care.**
- 4. Promote the education and training of the health care workforce.**

The committee believes that priority should be given to the first two goals—adopting a viable system of community-based primary care and preventive services and improving coordination within and between the jurisdictions and the United States. To a certain extent the other two goals of increasing community involvement and strengthening the health care workforce flow naturally from these first two priorities. The committee cautions, however, that if the two main priorities are not given serious attention by all parties involved, the desired goal of improving the health care systems in the region and ultimately the health of the island populations will not be achieved—even if the full set of other recommendations are fully implemented.
