**The Solar House** Daniel D. Chiras, 2002-10-01 Passive solar heating and passive cooling approaches known as natural conditioning provide comfort throughout the year by reducing or eliminating the need for fossil fuel Yet while heat from sunlight and ventilation from breezes is free for the taking few modern architects or builders really understand the principles involved Now Dan Chiras author of the popular book The Natural House brings those principles up to date for a new generation of solar enthusiasts The techniques required to heat and cool a building passively have been used for thousands of years Early societies such as the Native American Anasazis and the ancient Greeks perfected designs that effectively exploited these natural processes. The Greeks considered anyone who didn t use passive solar to heat a home to be a barbarian In the United States passive solar architecture experienced a major resurgence of interest in the 1970s in response to crippling oil embargoes With grand enthusiasm but with scant knowledge and sometimes little common sense architects and builders created a wide variety of solar homes Some worked pretty well but looked more like laboratories than houses Others performed poorly overheating in the summer because of excessive or misplaced windows and skylights and growing chilly in the colder months because of insufficient thermal mass and insulation and poor siting In The Solar House Dan Chiras sets the record straight on the vast potential for passive heating and cooling Acknowledging the good intentions of misguided solar designers in the past he highlights certain egregious and entirely avoidable errors More importantly Chiras explains in methodical detail how today s home builders can succeed with solar designs Now that energy efficiency measures including higher levels of insulation and multi layered glazing have become standard it is easier than ever before to create a comfortable and affordable passive solar house that will provide year round comfort in any climate Moreover since modern building materials and airtight construction methods sometimes result in air quality and even toxicity problems Chiras explains state of the art ventilation and filtering techniques that complement the ancient solar strategies of thermal mass and daylighting Chiras also explains the new diagnostic aids available in printed worksheet or software formats allowing readers *Urban and Transit Planning (Vol 1): Strategies, Innovations and Climate* to generate their own design schemes Management Francesco Alberti, Simon Elias Bibri, Cristina Piselli, Paola Gallo, Abraham R. Vasey, Sarah E. Fredericks, Lei Shen, Shirley resilience Thompson, 2011-12-08 Natural Resources and Sustainability explores how human needs and desires from sustenance and shelter to recreation and travel have spurred the consumption of Earth's material resources Scientists ecologists and other expert authors present the historical impact of commercial activities in industries as varied as fisheries agriculture energy and mineral extraction discuss the global distribution and use of renewable and nonrenewable resources and focus on innovative approaches for the future Readers will learn why renewal doesn t necessarily put a resource beyond harm and why the no free lunch adage applies to all natural resources **Agroecology** Stephen R. Gliessman, 2014-12-09 Agroecology is a science a productive practice and part of a social movement that is at the forefront of transforming food systems to sustainability Building upon the ecological foundation of the agroecosystem Agroecology The Ecology of Sustainable Food Systems Third Edition provides the essential foundation for understanding sustainability i Monthly Catalog of United Environmental Management Uberoi, 2004-05 Environmental Management with few States Government Publications ,1995 exceptions is not taught in colleges universities technical and management institutions The result is that the students of these institutions lack knowledge and sensitisation to environmental issues They lack the awareness of environmental consequences of human actions To fill this void Environmental Management is timely The book provides background material

to various environmental problems It surveys a range of topics from sustainable development and ecological imperatives to strategies for managing environmental issues The problem of pollution waste management biological diversity and forest management have been analysed in the light of laws and international conventions and treaties. The book brings out the realities about the damage being inflicted on the environment and our exploitive attitude to nature It concludes with discussion and debate about values in nature and touches upon the subject of metamorphosis of the whole trajectory of APAIS 1991: Australian public affairs information service, attitudes in modern societies The British National Central American Biodiversity Falk Huettmann, 2015-08-04 This book highlights **Bibliography** Arthur James Wells, 2009 key results and lessons learnt from two field sites La Suerte in Costa Rica and Ometepe Nicaragua It provides long term data on species abundance and distribution Primates receive specific attention in this book as they are flagship species and good indicators for the health of an ecosystem but as well a money maker Many primate species are sensitive to habitat alteration and are often hunted out first But they play an important role as seed dispersal agents for the regeneration of the forest The book then compares results from the two field sites with regional trends and explores potential solutions such as REDD This book strongly calls for new approaches in conservation it makes the case for looking beyond the pure species biology and classic conservation angle and to take into account the economic and political realities Wildlife, Conservation, and Human Welfare Richard D. Taber, Neil F. Payne, 2003 This work provides historical information on wildlife and its conservation relative to human welfare the dependence human society had on wildlife historically and the dependence society still has on wildlife and wildlife habitats as the natural resource base for a healthy ecosystem In writing this book the authors have attempted to provide society with the perspective it needs to evaluate historical experiences both successes and failures Assessment, management and future directions for coastal fisheries in Asian countries Silvestre, G. et al,2003-12-08 In Asia the fisheries sector is important in terms of food security livelihoods and foreign exchange earnings However as in many parts of the world there are signs that capture fisheries are fully exploited or overfished Management of fisheries in the region is often hampered by lack of information on the status of fisheries in terms of biological social economic policy and governance aspects This regional project documents an alarming decline on coastal fishery resources based on historic research surveys in South and Southeast Asia Socio economic analyses and policy reviews highlight the importance of the fisheries sector but also the challenges facing it Potential interventions to improve fisheries management in the countries are outlined and defined with environmental socioeconomic and institutional objectives Newhall Ranch Resource Management and Development Plan and Spineflower Conservation Plan, 2009
