The Nature and affinities of tubercle Reginald Southey, 1867 *The Nature and Affinities of Tubercle ...* Reginald Southey (M.D.), 1867 **The Nature and Affinities of Tubercle; Being the Galstonian Lectures for ... 1867** Reginald Southey, 1867 The Athenaeum, 1867 **British and Foreign Medico-chirurgical Review**, 1868 **The British and Foreign Medico-chirurgical Review Or Quarterly Journal of Practical Medicine and Surgery**, 1868 **The Medical Press & Circular**, 1867 Medical Education at St. Bartholomew's Hospital, 1123-1995 Keir Waddington, 2003

Traces the evolution of medical education at Barts from its foundation in 1123 to the college's merger with The London Hospital and Queen Mary Westfield College in 1995. Medical Education at St Bartholomew's Hospital traces the evolution of medical education at Barts from its foundation in 1123 to the college's merger with The London and Queen Mary Westfield College in 1995. Drawing on the hospital's rich archives it investigates how training was institutionalised and organised at Barts to explore the shifting nature of medical education between the eighteenth and late twentieth century. Medical Education at St Bartholomew's Hospital in analysing the history of the medical college at Barts explores the relationship between clinical study, science and the institution to look at the rise of the hospital student, the growth of laboratory medicine and the evolution of a research culture. It places the changing nature of training at Barts in the context of metropolitan and national developments to analyse the structure of medical training, the University of London and its impact on medical education and the experiences of the students and staff. Questions are asked about how academic medicine developed and about the relationship between training, the bedside, teaching hospitals and the politics of healthcare and higher education. In looking at these areas, existing notions of the development of medical education are problematised to provide a study that explores the nature of medical education at Barts and in London. Investigation of the complex issues surrounding the links between bovine tuberculosis and infected meat with a contemporary resonance in the BSE scare. By the late 1890s the question of bovine tuberculosis (TB) and infected meat had become one of national importance, reflecting a national sense of fear. Although the extent of the threat to health proved uncertain, bovine TB had come to stand at the centre of debates about diseased meat and public health. The anxiety it caused was part of a longer story linked to concern over food safety, changes in how tuberculosis was understood and to worries over diseased meat and the evils of the urban meat trade. *The Bovine Scourge* explores the debates and fears that came to surround bovine TB, meat and public health between the 1860s and 1914. It traces how diseased meat and bovine TB emerged as a public health issue, examines the measures adopted to protect the public and addresses how, by the Edwardian era, milk had become the major source of concern in discussion of bovine TB. It also raises important questions about the history of food safety, the concerns generated by diseased meat and the role of the public health and veterinary profession in preventing
