Nature Study History Steele Commager:

The Nature and the Study of History Henry Steele Commager, Raymond H. Muessig, Vincent R. Rogers, 2015-01-01 An overview of the nature and methods of history as a field in social science written for educators

Vann Woodward, 1991-04-04 The late C Vann Woodward was one of America's most prominent historians His books have won every major history award including the Pulitzer Bancroft and Parkman Prizes and he has served as president of both the American Historical Association and the Organization of American Historians The Future of the Past collects two decades worth of Woodward's most significant essays addresses and major book reviews including two important presidential addresses The Future of the Past and Clio with Soul his trenchant assessment of Afro American history as well as essays on changing historical concerns of the past decades the value of comparative history the South in Reconstruction times and the South today and the use of fiction in history and history in fiction Woodward has written illuminating introductory comments on each section and offers an incisive general introduction about history and the direction the profession is taking today Whether reviewing William Safire's novel Freedom or evaluating Henry Adams's portrait of Jefferson Woodward's essays reflect a lifetime of thought on history and historical writing and are essential reading for anyone concerned with either

The Vital Past Stephen Vaughn, 1985 The importance of history and its relevance to the present have seldom gone unquestioned in modern times This is particularly true in the United States born as the quintessentially modern nation where the image of a vast open frontier and the unofficial state creed of limitless progress have diminished the importance of the past and where the writings of Ralph Waldo Emerson proclaimed that nature and personal experience made tradition irrelevant for the self-reliant American

Teaching History for the Common Good Keith C. Barton, Linda S. Levstik, 2004-07-13 In Teaching History for the Common Good Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students' historical thinking In many cases disagreements about what should be taught to the nation's children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education The authors review research on students' historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes and tools that influence students' developing understanding

of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In *Teaching History for the Common Good* Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and how it guides their analysis and describe research on children s and adults knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students learning explore four principal stances toward history identification analysis moral response and exhibition review research on the extent to which children and adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers knowledge and practice and argue that for teachers to embrace investigative multi perspectival approaches to history they need more than knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose *Teaching History for the Common Good* is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject

Archival Theory, Records, and the Public Trevor Livelton,Society of American Archivists,2003 Now in paperback Livelton considers the nature of public records from an archival perspective analyzing concepts rather than the daily realities with which public records archivists deal However his carefully reasoned conclusions provide a strong foundation on which principled rather than ad hoc decisions can be made and so will be of interest to teachers students and practitioners of archival science The author presents a general or theoretical view of public records as documents made or received and preserved by the sovereign or its agents in the conduct

of governance This analysis is illustrated by a variety of examples including a discussion of freedom of information

Historical Thinking and Other Unnatural Acts Samuel S. Wineburg, 2001 Table of Contents *Historical Thinking* Sam Wineburg, 2001-03 Since ancient times the pundits have lamented young people's lack of historical knowledge and warned that ignorance of the past surely condemns humanity to repeating its mistakes In the contemporary United States this dire outlook drives a contentious debate about what key events nations and people are essential for history students Sam Wineburg says that we are asking the wrong questions This book demolishes the conventional notion that there is one true history and one best way to teach it Although most of us think of history and learn it as a conglomeration of facts dates and key figures for professional historians it is a way of knowing a method for developing and understanding about the relationships of peoples and events in the past A cognitive psychologist Wineburg has been engaged in studying what is intrinsic to historical thinking how it might be taught and why most students still adhere to the one damned thing after another concept of history Whether he is comparing how students and historians interpret documentary evidence or analyzing children's drawings Wineburg's essays offer rough maps of how ordinary people think about the past and use it to understand the present Arguing that we all absorb lessons about history in many settings in kitchen table conversations at the movies or on the world wide web for instance these essays acknowledge the role of collective memory in filtering what we learn in school and shaping our historical thinking The Liberal Approach to the Past Michael J. Douma, 2020-09-10 What do we mean by liberalism or liberal history It seems that every scholar in the social sciences would like to define liberalism in their own way Certainly there is plenty of room for differences of opinion on this matter But defining any ism requires circumscribing a set of beliefs or drawing lines in such a way as to connect ideas that we believe form a coherent tradition Liberal history is primarily concerned with ideas and with the reasons why individuals acted as they did in the past Liberal historians prefer to study themes of power and liberty particularly as they relate to the rise and fall of political systems that protect liberties and individual rights As the selections in this reader show the liberal approach to the past is generally skeptical of laws of history and suggestions of historical determinism *The Study and Teaching of History* Henry Steele Commager, Raymond Henry Muessig, 1980 Daughters Of Canaan Margaret Ripley Wolfe, 2021-12-14 From *Gone with the Wind* to *Designing Women* images of southern females that emerge from fiction and film tend to obscure the diversity of American women from below the Mason Dixon line In a work that deftly lays bare a myriad of myths and stereotypes while presenting true stories of ambition grit and endurance Margaret Ripley Wolfe offers the first professional historical synthesis of southern women's experiences across the centuries In telling their story she considers many ordinary lives those of Native American African American and white women from the Tidewater region and Appalachia to the Mississippi Delta to the Gulf Coastal Plain women whose varied economic and social circumstances resist simple explanations Wolfe examines critical eras outstanding personalities and groups wives mothers pioneers soldiers suffragists politicians and

civil rights activists and the impact of the passage of time and the pressure of historical forces on the region's females. The historical southern woman argues Wolfe has operated under a number of handicaps bearing the full weight of southern history, mythology and legend. Added to these have been the limitations of being female in a patriarchal society and the constraining images of the southern belle and her mentor the southern lady. In addition, the specter of race has haunted all southern women. Gender is a common denominator but according to Wolfe it does not transcend race, class, point of view or a host of other factors. Intrigued by the imagery as well as the irony of biblical stories and southern history, Wolfe titles her work *Daughters of Canaan*. Canaan symbolizes promise and for activist women in particular, the South has been about promise as much as fulfillment. General readers and students of southern and women's history will be drawn to Wolfe's engrossing chronicle.

Human Nature, Cultural Diversity, and the French Enlightenment Henry Vyverberg, 1989. In this work, Henry Vyverberg traces the evolution and consequences of a crucial idea in French Enlightenment thought: the idea of human nature. Human nature was commonly seen as a broadly universal, unchanging entity, though perhaps modifiable by geographical, social, and historical factors. Enlightenment empiricism suggested a degree of cultural diversity that has often been underestimated in studies of the age. Evidence here is drawn from Diderot's celebrated *Encyclopedia* and from a vast range of writing by such Enlightenment notables as Voltaire, Rousseau, and d'Holbach. Vyverberg explains not only the age's undoubted fascination with uniformity in human nature but also its acknowledgment of significant limitations on that uniformity. He shows that although the Enlightenment's historical sense was often blinkered by its notions of a uniform human nature, there were also cracks in this concept that developed during the Enlightenment itself.
