Nature First Outdoor Life The Friluftsliv Way:

Nature First Bob Henderson, Nils Vikander, 2007-07-31 Friluftsliv is an approach to creating a relationship between humans and nature. *Nature First* explores ways of applying this wisdom to everyday out of doors life. **Nature First** Bob Henderson, Nils Vikander, 2007-07-31 *Nature First* combines the Scandinavian approach to creating a relationship with nature known as friluftsliv with efforts by Canadian and international educators to adapt this wisdom and apply it to everyday life experiences in the open air. The word friluftsliv literally refers to free air life or outdoor life. A word saturated with values the concept can permeate deeply and playfully into one's cultural being and personal psyche thus influencing the way one perceives and interacts with nature on a daily basis. For centuries the North American approach has been one of domination and bringing nature under control in many cases abusing our natural environment in the process. The friluftsliv way of being on talking terms with nature developing an insider's relationship with nature offers the rich potential of allowing us as cohabiters on the Earth to recreate rejuvenate and restore the balance among all living things. *Nature First* is the first English language anthology to bring together the perspectives and experiences of North American Norwegian Swedish and other international outdoor writers all friluftsliv thinkers and doers. Here the thirty contributors use of history sociology psychology philosophy and outdoor education writings blend to provide an understanding of how friluftsliv applies to everyday life. The book presents an alternative to much of the personal growth adventure based literature that tends to dominate our current approach to the outdoor activity. Folklore heritage adventure travel crafts place based education and the daily outings of families all have a role to play in promoting an understanding of both the ordinary and the mystical importance of this Nordic tradition. Dedicated to parents travel guides educators and generally to participants in the outdoors *Nature First* provides a compellingly fresh approach to life in the out of doors. **Sourcebook of Experiential Education** Thomas E. Urban Green Colin Fisher, 2015-05-11 In early twentieth century America affluent city dwellers made a habit of venturing out of doors and vacationing in resorts and national parks Yet the rich and the privileged were not the only ones who sought respite in nature In this pathbreaking book historian Colin Fisher demonstrates that working class white immigrants and African Americans in rapidly

industrializing Chicago also fled the urban environment during their scarce leisure time. If they had the means they traveled to wilderness parks just past the city limits as well as to rural resorts in Wisconsin and Michigan. But lacking time and money they most often sought out nature within the city itself at urban parks and commercial groves along the Lake Michigan shore even in vacant lots. Chicagoans enjoyed a variety of outdoor recreational activities in these green spaces and they used them to forge ethnic and working class community. While narrating a crucial era in the history of Chicago's urban development Fisher makes important interventions in debates about working class leisure, the history of urban parks, environmental justice, the African American experience, immigration history and the cultural history of nature.

Learning Outside the Classroom Simon Beames, Peter Higgins, Robbie Nicol, 2012-03-22 *Learning Outside the Classroom* outlines theory and practice that will enable and encourage teachers to systematically and progressively incorporate meaningful outdoor learning opportunities into their daily teaching activities in a wide variety of environments and with diverse populations of pupils. This is the first textbook based around the curriculum for prospective and practising primary and secondary teachers and other outdoor educators. The principles and examples presented are intended to be adapted by teachers to suit the needs of their students in ways that draw upon content offered by the local landscape and its natural and built heritage. Although the focus of this book is the real world beyond the classroom it is also about good teaching wherever it takes place. While there are chapters on practical issues such as risk management and supervising groups outdoors the chapters on curriculum, sustainability, curiosity, responsibility and educational communities will serve as a valuable guide for anyone interested in applying educational theory to practice.
