U.

Lemke, Heinz U. Lemke, 2004 Almost 500 paper and poster contributions from more than 30 countries had to be evaluated for CARS 2004 In addition to the traditional CARS themes and topics emphasis has been given to developments such as IHE Surgical Workflow and PACS Operation Room of the Future and Strategic Thinking In special congress sessions partner societies such as SPIE and SCAR have joined these endeavours to assist in achieving progress in these fields While the increased reliance on multi source information is proceeding at a rapid rate it is interesting to note that the basis for the greater part of medical decision making is still medical imaging This may change as genomics and proteomics fulfil more of their potential but it is estimated that more than half of current hospital visits result in imaging studies In that respect it is true that the more things change the more they stay the same Alphonse Karr 1849 and that medical imaging is the cornerstone of the field This focus on medical imaging is evident throughout the CARS conference with sessions dedicated to Medical Imaging MI itself Image Processing and Display IPD Image Guided Radiological Therapy IGRT Image Guided Therapy IGT and separate symposia on Computer Aided Diagnosis based on imaging and both Cardiovascular and Maxillofacial Imaging Still it is up to you the engineers scientists clinicians and related personnel participating in CARS to ensure that innovation in technology and procedures is not developed just for the sake of change but instead to achieve progress and thereby provide better patient care
