New Practice Manual For Ipcc May 2015:

Special Types of Life Cycle Assessment Matthias Finkbeiner, 2016-07-27 This book presents specialised methods and tools built on classical LCA. In the first book length overview their importance for the further growth and application of LCA is demonstrated for some of the most prominent species of this emerging trend: Carbon footprinting, Water footprinting, Eco efficiency assessment, Resource efficiency assessment, Input output and hybrid LCA, Material flow analysis, Organizational LCA. Carbon footprinting was a huge driver for the market expansion of simplified LCA. The discussions led to an ample proliferation of different guidelines and standards including ISO TS 14067 on Carbon Footprint of Product. Atsushi Inaba, Kogakuin University Tokyo, Japan and his eight co authors provide an up to date status of Carbon Footprint of Products. The increasing relevance of Water Footprinting and the diverse methods were the drivers to develop the ISO 14046 as international water footprint standard. Markus Berger, Technische Universität Berlin, Germany; Stephan Pfister, ETH Zurich, Switzerland; and Masaharu Motoshita, Agency of Industrial Science and Technology, Tsukuba, Japan present a status of water resources and demands from a global and regional perspective. A core part is the discussion and comparison of the different water footprint methods, databases and tools. Peter Saling from BASF SE in Ludwigshafen, Germany broadens the perspective towards Eco efficiency Assessment. He describes the BASF specific type of eco efficiency analysis plus adaptations like the so called SEEBALANCE and AgBalance applications. Laura Schneider, Vanessa Bach and Matthias Finkbeiner, Technische Universität Berlin, Germany address multi dimensional LCA perspectives in the form of Resource Efficiency Assessment. Research needs and proposed methodological developments for abiotic resource efficiency assessment and especially for the less developed area of biotic resources are discussed. The fundamentals of Input output and Hybrid LCA are covered by Shinichiro Nakamura, Waseda University Tokyo, Japan and Keisuke Nansai, National Institute for Environmental Studies, Tsukuba, Japan. The concepts of environmentally extended IO, different types of hybrid IO LCA and the waste model are introduced. David Laner and Helmut Rechberger, Vienna University of Technology, Austria present the basic terms and procedures of Material Flow Analysis methodology. The combination of MFA and LCA is discussed as a promising approach for environmental decision support. Julia Martinez Blanco, Technische Universität Berlin, Germany, now at In dit Barcelona, Spain; Atsushi Inaba, Kogakuin University Tokyo, Japan and Matthias Finkbeiner, Technische Universität Berlin, Germany introduce a recent development which could develop a new trend, namely the LCA of Organizations.

Social Work and Disasters Margaret Alston, Tricia Hazeleger, Desley Hargreaves, 2019-01-11 Disasters are increasing in frequency and intensity across the world causing significant destruction to individuals and communities. Yet many social workers are ill prepared for the demands of this field of practice. This book discusses the role of social workers in disaster work including in disaster preparedness during the disaster and in post disaster practice. It addresses the complexities of social work disaster practice noting the need for social workers to understand the language of trauma and to respond effectively. The authors discuss

disaster theory and practice drawing out elements of practice at macro meso and micro levels and at various stages of the disaster They examine the factors that shape vulnerability in disasters and draw out the possibility of post traumatic growth The final section discusses strategies for self care in disaster practice noting the organisational and personal strategies that can be adopted to facilitate the wellbeing of workers in the field With real life case studies from top scholars in the field this book is essential reading for social work practitioners working in the field of disaster practice as well as social work students and academics It will also be useful to other health professionals who wish to understand this field of practice

Sufficiency Thinking Gayle C. Avery,2020-07-17 Our world is under pressure with growing inequalities in wealth and access to food and clean water We depend too heavily on polluting fuels and diminishing natural resources Traditional cultural practices are being swamped by global popular culture The Thai model of sufficiency thinking aims to transform the mindset of a whole population to achieve the seemingly impossible enriching everyone's lives in a truly sustainable way Innovative management practices developed by King Bhumibol Adulyadej of Thailand have been applied across Thailand in agriculture education business government and community organisations for over two decades In this book chapters written by eminent Thai scholars explain sufficiency thinking and review its implementation in different sectors including community development business agriculture health care schools and even in prisons Is Thailand unique in having discovered the holy grail of a more responsible form of capitalism No it is not but it is the first country whose government has adopted this kind of thinking as national policy we obviously need to revise dramatically our thinking about the outlines of a just economy and a decent society in which everyone can lead dignified lives Sufficiency Thinking provides creative approaches to this quandary and this important volume is a brilliant addition to the growing literature critical of mainstream business as usual ideology John Komlos Professor Emeritus University of Munich

Ballou,Katherine Ralls,Mark Eldridge,Michele R. Dudash,Charles B. Fenster,Robert C. Lacy,Paul Sunnucks,2019-10-23 The habitats of most species have been fragmented by human actions isolating small populations that consequently develop genetic problems Millions of small isolated fragmented populations are likely suffering from inbreeding depression and loss of genetic diversity greatly increasing their risk of extinction Crossing between populations is required to reverse these effects but managers rarely do so A key reason for such inaction is that managers are often advised to manage populations in isolation whenever molecular genetic methods indicate genetic differences among them Following this advice will often doom small populations to extinction when the habitat fragmentation and genetic differences were caused by human activities A paradigm shift is required whereby evidence of genetic differentiation among populations is a trigger to ask whether any populations are suffering genetic problems and if so whether they can be rescued by augmenting gene flow Consequently there is now an urgent need for an authoritative practical guide to facilitate this paradigm shift in genetic management of fragmented populations **Green Savings** Marilyn A. Brown,Yu Wang,2015-09-29 This landmark work lauds the benefits of decreased energy consumption investigating its relationship to public policy and analyzing its potential billion dollar benefits to the U S economy U S consumers tend to use energy indiscriminately something they may no longer be able to do with impunity This game changing book asserts that reducing energy consumption should be a frontline strategy to address global climate change threats to energy security and the challenge of grid reliability The book supports two bold arguments that

policies motivating greater investment in high energy efficiency should be a priority and that energy efficiency can help the nation in times of crisis To make their case for the necessity of prioritizing demand reduction the authors examine the policies and markets operating in a number of leading cities states and nations across the globe to uncover the keys to their success These examples show how demand side strategies can significantly reduce pollution cut costs and make the electric grid more resilient The authors explain why these technologies are not widely adopted and assess the potential savings they can produce The book will be an eye opener for policymakers energy professionals and the public as it demonstrates how cost effective demand reduction policies can improve air quality strengthen electricity markets and generate jobs

Environmental Politics for a Changing World Ronnie D. Lipschutz, Doreen Stabinsky, 2018-07-12 This book argues that environmental problems are first and foremost political and therefore about power Using a framework of political economy and political ecology the authors deconstruct current environmental problems to identify root causes and address those problems through mobilization of collective action and social power The second edition also offers Updated examples and stories of political struggles and the actors involved Explicit attention to various forms of power in environmental politics including structural and social power Local politics and collective action as related to global environmental politics Discussion of emerging issues such as synthetic biology commodification and financialization of nature including carbon markets and geoengineering

A Practical Guide to Industrial Ecology by Input-Output Analysis

Shinichiro Nakamura, 2023-11-01 This book addresses the growing need for a standard textbook on input output analysis IO within the context of industrial ecology IE IE is a discipline dedicated to providing system wide quantitative and science based solutions for sustainable development challenges and its global importance has been rapidly increasing The primary analytical tools of IE are life cycle assessment LCA and material flow analysis MFA IO has been widely utilized for LCA since the late 1990s and is increasingly being applied to MFA as well This trend is being driven by the greater availability and application of global IO data which now includes an ever expanding number of countries and regions Despite the presence of excellent textbooks on IO and IE individually there is a lack of resources that integrate these two fields This book seeks to fill that gap by focusing on the practical application of IO to IE specifically in the context of LCA and MFA By combining these methodologies readers can gain valuable insights into sustainable development issues and contribute to more effective solutions in the field of IE
