Supplement - Food and Nutrition Information and Educational Materials Center** Food and Nutrition Information and Educational Materials Center (U.S.), Statistical Quality Control for the Food Industry Merton R. Hubbard, 2013-04-17 If an automobile tire leaks or an electric light switch fails if we are short changed at a department store or erroneously billed for phone calls not made if a plane departure is delayed due to a mechanical failure these are rather ordinary annoyances which we have come to accept as normal occurrences Contrast this with failure of a food product If foreign matter is found in a food if a product is discolored or crushed if illness or discomfort occurs when a food product is eaten the consumer reacts with anger fear and sometimes mass hysteria The offending product is often returned to the seller or a disgruntled letter is written to the manufacturer In an extreme case an expensive law suit may be filed against the company The reaction is almost as severe if the failure is a difficult to open package or a leaking container There is no tolerance for failure of food products Dozens of books on quality written for hardware or service industries discuss failure rates product reliability serviceability maintainability warranty and repair Manufacturers in the food industry cannot use these measurements food reliability must be 100% failure rate 0% Serviceability maintainability warranty and repair are meaningless terms to food processors

Food Safety in Shrimp Processing Laxman Kanduri, Ronald A. Eckhardt, 2008-04-15 Systems of producing food in safer ways including the use of the hazard analysis critical control point HACCP system are now being adopted widely throughout the world The ever growing global shrimp and prawn farming and processing industries are now beginning to realise the benefits of using HACCP and other food safety measures However until now there has not been one single book bringing together full details of how to implement these systems which are now seen as making an extremely important contribution to the safe production and processing of shrimps The authors of this book who have a great deal of practical experience working with industry and teaching food safety issues have drawn together a wealth of information and guidance for the proper implementation of food safety measures and the consequent processing of shrimps safely for the expanding market Included in the book is an introduction to HACCP how to implement sanitation programs and HACCP plans and details of sampling procedures and monitoring plans for organoleptic physical chemical and microbiological quality Food Safety in Shrimp Processing is an essential purchase for all those involved in producing and processing shrimps throughout the world Food scientists microbiologists and technologists in the seafood processing industry and government regulatory and public health personnel should have a copy of this book readily at hand All libraries in universities colleges and research establishments where food sciences food technology and aquaculture are studied and taught should have copies of this book
