Accountability in education: meeting our commitments UNESCO,2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions

In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not

Back cover Behavioral Science & Policy: Volume 2, Issue 1 Craig Fox, Sim B. Sitkin, 2016-11-22 The success of nearly all public and private sector policies hinges on the behavior of individuals groups and organizations Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research However policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies The pages of this new journal will become a meeting ground a place where scientists and non scientists can encounter clearly described behavioral research that can be put into action By design the scope of BSP is broad with topics spanning health care financial decisionmaking energy and the environment education and culture justice and ethics and work place practices Contributions will be made by researchers with expertise in psychology sociology law behavioral economics organization science decision science and marketing The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution The mission of BSPA is to foster dialog between social scientists policymakers and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest BSPA does not advance a particular agenda or political perspective The first issue s contents follow Behavioral Science Policy vol 2 no 1 Table of Contents Editors Note Spotlight Pre Kindergarten Interventions American Policy on Early Childhood Education Development Many Programs Great Hopes Modest Prospects Ron Haskins Evidence for the Benefits of State Prekindergarten Programs Myth Misrepresentation Dale C Farran Mark W Lipsey Reforming Head Start for the 21st Century A Policy Prescription Sara Mead Ashley LiBetti Mitchel Home Visiting Programs Four Evidence Based Lessons for Policymakers Cynthia Osborne Launching Preschool 2 0 A Road Map to High Quality Public Programs at Scale Christina Weiland A 10 Year Strategy of Increased Coordination Comprehensive Investments in Early Child Development Ajay Chaudry Jane Waldfogel Reimagining Accountability in K 12 Education Brian P Gill Jennifer S Lerner Paul Meosky Featured Topic Healthy Through Habit Interventions for Initiating Maintaining Health Behavioral Change Wendy Wood David Neal Making the Truth Stick the Myths Fade Lessons from Cognitive Psychology Norbert Schwarz Eryn Newman William Leach Editorial Policy Monitoring Educational Equity National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Board on Testing and Assessment, Committee on Developing Indicators of Educational Equity, 2019-10-30 Disparities in educational attainment among population groups have characterized the United States throughout its history Education is sometimes characterized as the great equalizer but to date the country has not found ways to successfully address the adverse effects of socioeconomic circumstances prejudice and discrimination that suppress performance for some groups To ensure that the pursuit of equity encompasses both the goals to which the nation aspires for its children and the mechanisms to attain those goals a revised set of equity indicators is needed Measures of educational equity often fail to account for the impact of the circumstances in which students live on

their academic engagement academic progress and educational attainment Some of the contextual factors that bear on learning include food and housing insecurity exposure to violence unsafe neighborhoods adverse childhood experiences and exposure to environmental toxins Consequently it is difficult to identify when intervention is necessary and how it should function A revised set of equity indicators should highlight disparities provide a way to explore potential causes and point toward possible improvements Monitoring Educational Equity proposes a system of indicators of educational equity and presents recommendations for implementation This report also serves as a framework to help policy makers better understand and combat inequity in the United States education system Disparities in educational opportunities reinforce and often amplify disparities in outcomes throughout people s lives Thus it is critical to ensure that all students receive comprehensive supports that level the playing field in order to improve the well being of underrepresented individuals and the nation

Why Knowledge Matters E. D. Hirsch, 2019-01-02 In Why Knowledge Matters E D Hirsch Jr presents evidence from cognitive science sociology and education history to further the argument for a knowledge based elementary curriculum Influential scholar Hirsch author of The Knowledge Deficit asserts that a carefully planned curriculum that imparts communal knowledge is essential in achieving one of the most fundamental aims and objectives of education preparing students for lifelong success Hirsch examines historical and contemporary evidence from the United States and other nations including France and affirms that a knowledge based approach has improved both achievement and equity in schools where it has been instituted In contrast educational change of the past several decades in the United States has endorsed a skills based approach founded on Hirsch points out many incorrect assumptions about child development and how children learn He recommends new policies that are better aligned with our current understanding of neuroscience developmental psychology and social science The book focuses on six persistent problems that merit the attention of contemporary education reform the over testing of students in the name of educational accountability the scapegoating of teachers the fadeout of preschool gains the narrowing of the curriculum to crowd out history geography science literature and the arts the achievement gap between demographic groups and the reliance on standards such as the Common Core State Standards that are not linked to a rigorous curriculum Why Knowledge Matters makes a clear case for educational innovation and introduces a new generation of American educators to Hirsch s astute and passionate analysis

references and videos **Educational Inequality and School Finance** Bruce D. Baker, 2021-02-09 In *Educational Inequality and School Finance* Bruce D Baker offers a comprehensive examination of how US public schools receive and spend money Drawing on extensive longitudinal data and numerous studies of states and districts he provides a vivid and dismaying portrait of the stagnation of state investment in public education and the continuing challenges of achieving equity and adequacy in school funding Baker explores school finance the school and classroom resources derived from school funding and how and why those resources matter He provides a critical examination of popular assumptions that undergird the policy discourse around school funding notably that money doesn't matter and that we are spending more and getting less and shows how these misunderstandings contribute to our reluctance to increase investment in education at a time when the demands on our educational system are rising Through an introduction to the concepts of adequacy equity productivity and efficiency Baker shows how these can be used to evaluate policy reforms He argues that we know a great deal about the role and importance of money in schools the mechanisms through which money matters for student outcomes and the trade offs involved and he presents a framework for designing and financing an equitable and adequate public education system with balanced and stable sources of revenue *Educational Inequality and School Finance* takes an issue all too often relegated to technical experts and makes it accessible for broader public empowerment and engagement *Infants and Children* Laura E. Berk, 2022-07-26 In the Ninth Edition of *Infants and Children* Prenatal Through Middle Childhood renowned professor researcher and author Laura E Berk takes an integrated approach to presenting development in the physical cognitive emotional and social domains emphasizing the complex interchanges between heredity and environment providing exceptional multicultural and cross cultural focus and offering research based practical applications that students can relate to their personal and professional lives **An Age of Accountability** John L. Rury, 2023-10-13 *An Age of Accountability* highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree Learning Analytics in Higher Education Jaime Lester, Carrie Klein, Huzefa Rangwala, Aditya Johri, 2017-12-21 Learning analytics or educational big data tools are increasingly being deployed on campuses to improve student performance retention and completion especially when those metrics are tied to funding

Providing personalized real time actionable feedback through mining and analysis of large data sets learning analytics can illuminate trends and predict future outcomes While promising there is limited and mixed empirical evidence related to its efficacy to improve student retention and completion Further learning analytics tools are used by a variety of people on campus and as such its use in practice may not align with institutional intent This monograph delves into the research literature and issues associated with learning analytics implementation adoption and use by individuals within higher education institutions With it readers will gain a greater understanding of the potential and challenges related to implementing adopting and integrating these systems on their campuses and within their classrooms and advising sessions This is the fifth issue of the 43rd volume of the Jossey Bass series ASHE Higher Education Report Each monograph is the definitive analysis of a tough higher education issue based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication
