**African American Lives** Henry Louis Gates Jr., Evelyn Brooks Higginbotham, 2004-04-29 African American Lives offers up to date authoritative biographies of some 600 noteworthy African Americans. These 1,000-3,000 word biographies selected from over five thousand entries in the forthcoming eight volume African American National Biography illuminate African American history through the immediacy of individual experience. From Esteban, the earliest known African to set foot in North America in 1528, right up to the continuing careers of Venus and Serena Williams, these stories of the renowned and the near forgotten give us a new view of American history. Our past is revealed from personal perspectives that in turn inspire, move, entertain, and even infuriate the reader. Subjects include slaves and abolitionists, writers, politicians, and business people, musicians and dancers, artists and athletes, victims of injustice, and the lawyers, journalists, and civil rights leaders who gave them a voice. Their experiences and accomplishments combine to expose the complexity of race as an overriding issue in America's past and present. African American Lives features frequent cross references among related entries, over 300 illustrations, and a general index supplemented by indexes organized by chronology, occupation, or area of renown, and winners of particular honors such as the Spingarn Medal, Nobel Prize, and Pulitzer Prize.

***The Hesperian*** Alexander Nicolas De Menil, 1905 **The Publishers Weekly**, 1892 ***The Irish Voice in America*** Charles Fanning, In this study Charles Fanning has written the first general account of the origins and development of a literary tradition among American writers of Irish birth or background who have explored the Irish immigrant or ethnic experience in works of fiction. The result is a portrait of the evolving fictional self-consciousness of an immigrant group over a span of 250 years. Fanning traces the roots of Irish American writing back to the eighteenth century and carries it forward through the traumatic years of the Famine to the present time, with an intensely productive period in the twentieth century beginning with James T. Farrell. Later writers treated in depth include Edwin O'Connor, Elizabeth Cullinan, Maureen Howard, and William Kennedy. Along the way, he places in the historical record many all but forgotten writers, including the prolific Mary Ann Sadlier. *The Irish Voice in America* is not only a highly readable contribution to American literary history but also a valuable reference to many writers and their works. For this second edition, Fanning has added a chapter that covers the fiction of the past decade. He argues that contemporary writers continue to draw on Ireland as a source and are important chroniclers of the modern American experience.

***The Female Poets of America ... Second Edition*** Rufus Wilmot Griswold, 1856 **The Cottrell Story** TC Cottrell, 2016-10-02 This is the story of the author's Cottrell heritage from the early 1700s to the present, with historical events woven into their lives as they arrived in Virginia from England and eventually moved westward into Kentucky, Missouri, and California. The author's inclusion of historical events and descriptions of the hardships likely endured by his ancestors makes *The Cottrell Story* more captivating. Although this book is not meant to be a genealogical reference, the events, dates, names, and locations are accurate and based on

accepted proof standards unless they include descriptors such as likely probable or possible This allowed the author to include additional information he believes to be true but lacks proof Primary surnames include Cottrell Brashear Lashbrook Taylor and Cosby Extensive sourcing is not included However a list of general references used by the author in his research of his Cottrell lineage is included There is also an index of names to aid in locating specific people *Nineteenth Century Short Title Catalogue* Averro Publications Limited,1984 *The Standard Home Reference Library*,1910 The female poets of America Rufus Wilmot Griswold,1853 Printing Trade News ,1912 **Public Opinion** ,1892 Western Christian Advocate ,1898 **Local and National Poets of America with Interesting Biographical Sketches and Choice Selections from Over One Thousand Living American Poets** Thomas William Herringshaw,1892 **The Lever of Riches** Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
