Development of an Environmental and Economic Assessment Tool (Enveco Tool) for Fire Events Francine Amon,Jonatan

Gehandler,Selim Stahl,Mai Tomida,Brian Meacham,2016-08-02 This book investigates the feasibility of developing a tool that

enables fire departments to estimate the value of their services to a community in terms of environmental and financial

impact This book provides a summary of this effort which resulted in development of a prototype tool for fire department use

The impact of fire on a community is usually measured in terms of the number of fires human casualties and property

damage There are however more subtle impacts of fire that are not so easily estimated but contribute to the measure of

overall performance of the fire service in protecting a community While environmental and economic impact assessment

methodologies exist as separate systems they generally require a high level of knowledge that is outside the scope of most

fire departments A relatively simple methodology for estimating the environmental and economic impact of fires helps

communities understand the degree to which fire department activities can benefit a community s environmental and

economic well being The scope and approach for this prototype tool is explained including risk assessment cost benefit

analysis life cycle assessment integration and implementation and sensitivity and uncertainty analysis It includes multiple

case studies and offers statistical support for future expansion of the tool Fire service professionals will find this a useful new

approach to presenting value in a community as well as a method for examining their own financial and environmental plans
