development NGO can help the global North break free from the dominant and persistent charity paradigm and drift towards a justice based understanding of extreme poverty It offers an original explanation of why the charity paradigm persists and why the justice not charity messages from development NGOs have changed few minds The author argues that anyone concerned with a paradigm shift from charity to justice need to radically rethink the problem of political communication who should communicate what messages about extreme poverty in what ways Based on a rational choice critique of the competitive development NGO sector the author calls for sector wide reform and the emergence of a new political agent the Avant garde NGO which transcends the charity frame that NGOs currently find themselves locked in Further inspired by literary theory and social psychology he offers a fresh account of how the Avant garde NGO could through reflective public engagement induce attitude change and lead genuine social and political reform

International Disaster Response Law
Andrea de Guttery, Marco Gestri, Gabriella Venturini, 2012-08-31 With a Foreword by Kristalina Georgieva European Commissioner for International Cooperation Humanitarian Aid and Crisis Response

Over the last decades natural and man made disasters have been increasing in terms of frequency size number of people affected and material damage caused There is growing awareness of the importance of adequate national and international legal frameworks for disaster prevention mitigation and response The implementation of these frameworks however poses serious challenges This book analyses International Disaster Response Law as developed in recent times and identifies the main existing normative gaps The authors address the rights and duties of States in preventing and mitigating disasters in facilitating access to their territory for humanitarian relief actors as well as issues related to liability and compensation Due attention is paid to European Union law governing disaster response and to its reform in the light of the Lisbon Treaty and to the main trends in domestic legislation Human rights obligations are thoroughly examined and the potential relevance of international criminal law is assessed Additional topics such as the status of relief personnel the hindrances to the delivery of relief consignments by customs and excise administration the use of civilian and military defence assets in emergency situations the mechanisms and procedures available to offer financial support for recovery and rehabilitation risk insurance and the issue of corruption during disaster related activities are specifically addressed By drawing on the expertise of lawyers political scientists economists and humanitarian practitioners the book promotes much needed interdisciplinary dialog and sheds light on a largely uncharted field of research It is therefore essential reading for academics and practitioners in international and EU law policy makers civil protection and humanitarian operators and for anyone interested in exploring the legal facets of the international community's response to large scale calamitous events

Relative Effectiveness of Alternative Microfinance-driven Poverty Alleviation Programs in Bangladesh Dr. Tamgid Ahmed Chowdhury, 2014-06-26 In general the effectiveness of microfinance driven poverty alleviation programs run by Government Organizations GOs and Non Government Organizations NGOs in developing countries such as Bangladesh is assessed by repayment rates the number of beneficiaries the area coverage the amount of loans disbursed the cost of operations profitability and the financial sustainability of the projects This study argues that these methods are quite restrictive since none of them reflect the perceptions of poor people concerning the effectiveness of such projects Development agencies such as GOs and NGOs have never been compared on the basis of service delivery effectiveness a process based comparison nor have they ever been compared on the basis of their relative contribution to raising the living standards of the poor an outcome based comparison Both types of comparison are crucial to poverty reduction The main reason behind the absence of such comparisons is the unavailability of the appropriate parameters that could be used for such analysis For the process based comparison this study develops and validates a two dimensional multi item service delivery effectiveness scale through construct convergent discriminant and nomological validity The scale captures different aspects of effectiveness in the delivery of services These aspects are termed the credibility dimension and the focus towards beneficiaries dimension of service delivery in poverty alleviation programs For the output based comparison this study also develops and validates a multidimensional poverty model to compare the effectiveness of GOs and NGOs in contributing to the economic social political and cultural elements in the lives of the poor The methodology is based on 930 samples collected from 12 districts and 107 randomly chosen villages in Bangladesh during September-December 2009
