The Educational Significance of Human and Non-Human Animal Interactions Suzanne Rice, A. G. Rud, 2016-04-29 The Educational Significance of Human and Non Human Animal Interactions explores human animal non human animal interactions from different disciplinary perspectives from education policy to philosophy of education and ecopedagogy The authors refute the idea of anthropocentrism the belief that human beings are the central or most significant species on the planet through an ethical investigation into animal and human interactions and real life examples of humans and animals living and learning together In doing so Rice and Rud outline the idea that interactions between animals and humans are educationally significant and vital in the classroom [The Educational Significance of Human and Non-Human Animal Interactions](#) Suzanne Rice, A. G. Rud, 2014-01-14 The lives of animals and humans are deeply intertwined and mutually influencing In recent years there has been a growing appreciation of ways in which the interactions of human animals and non human animals matter educationally This book seeks to contribute to the ongoing conversation about animals and education **Geography Education Promoting Sustainability** Eila Jeronen, 2020-04-15 Through out the current period of educational change Geography education has also changed The innovations may be the starting point to affect conceptual change and paradigm shifts Geography education assimilates and integrates knowledge skills and scientific methodologies The ten articles in this book illuminate a wide range of topics of interest to Geography education In their article Skarstein and Wolff discuss how the interplay between the environment society and economy pillars of sustainability thinking play out on scales of time space and multitude and how geography teachers can support the students understanding of sustainability Yli Panula et al analysed used teaching and learning methods to find out good ones for promoting sustainability in geography The same idea can be found in Duffin s and Perry s article on Place Based Ecology Education In their article Dr and Keller discuss the topics of quality of life sustainability and global justice based on the goals of Education for Sustainable Development Evaluation is an important part of learning It is reviewed by Schauss and Sprenger regarding climate change education The following two articles deal with students views of landscapes worth conserving In both studies students expressed concern about the state of the environment Yli Panula et al found that the Mexican students seldom considered their own activities in relation to the environment while Yli Panula et al stated that only some of the Finnish and Swedish students act as observers while others actively care for their environment The remaining three articles deal with teaching methods and models Benninghaus et al present a benchmark method which allows statements about the quality of the maps diagrams in general lvarez Otero and De L zaro y Torres on the other hand describe their Technological Pedagogical Content Knowledge model Kopnina and Saari discusses student assignments reflecting on the documentary film through critical pedagogy and ecopedagogy *Animals in Environmental Education* Teresa Lloro-Bidart, Valerie S. Banschbach, 2019-01-04 This book explores interdisciplinary approaches to animal focused curriculum and pedagogy in environmental education with

an emphasis on integrating methods from the arts humanities and natural and social sciences Each chapter whether addressing curriculum pedagogy or both engages with the extant literature in environmental education and other relevant fields to consider how interdisciplinary curricular and pedagogical practices shed new light on our understandings of and ethical moral obligations to animals Embracing theories like intersectionality posthumanism Indigenous cosmologies and significant life experiences and considering topics such as equine training meat consumption and production urban human animal relationships and zoos and aquariums the chapters collectively contribute to the field by foregrounding the lives of animals The volume purposefully steps forward from the historical marginalization of animals in educational research and practice

Learning Animals Nadine Dolby, 2022-03-15 We are surrounded by thousands of animals alive and dead They are an intimate and ever present part of our human lives As a society we privilege veterinarians as experts on these animals they are our educators and teachers in what they say what they do and the decisions that they make Yet within the field of education there is little research on the curriculum pedagogy and experiences of veterinary school and students What do veterinarians learn in veterinary school How do their experiences during those four years shape their perceptions of animals How do the structures curriculum and pedagogy of veterinary college create and influence these experiences *Learning Animals* opens up this conversation through an exploration of the complicated fascinating and often painful stories of a cohort of veterinary students as they make their four year journey from matriculation through graduation The book examines how the experiences of veterinary students shape how humans relate to animals from public policy and decision making about the environment and animals slaughtered for food to the most personal decisions about euthanizing companion animals The first full length critical qualitative study of the perspectives of our primary teachers about animals this will be a thought provoking read for those in the fields of both educational research and veterinary education

Animal Rights Education Kai Horsthemke, 2018-09-27 This book explores how the ethical treatment and status of other than human animals influence pedagogy teaching and learning in general aiming to fill what has been a gap in the philosophy of education It examines key trends in this regard including environmental education humane education posthumanist education ecopedagogy critical animal pedagogy critical animal studies animal standpoint theory and vegan education The book discusses animal minds and interests and how animals have been accommodated in moral theory Further it investigates whether anti racist and anti sexist education logically entail anti speciesist education and closes by proposing animal rights education as a viable and sound alternative a pedagogy that does justice not only to animals in general and as species but also to individual animals If animal rights education is philosophically and educationally meaningful then it can arguably offer a powerful pedagogical tool and facilitate lasting pro animal changes

Animals as Experiencing Entities Michael J. Glover, Les Mitchell, 2024-03-04 This volume explores the experiences of those with little or no power usually although not exclusively animals The theme of animals as experiencing entities is what links the chapters and characterises the volume Broadly each author in this volume

contributes in one of two ways The first group in Section 1 theoretically engages animal subjectivity animal experiences and ways in which these are to some extent accessible and knowable to humans The second group of authors in Section 2 offer narrative accounts about specific animals or groups of animals and explore to some extent their subjective historical experiences In summary the first section diversely theorises about animal experiences while the second section s authors assume animals subjective experiences and construct narratives that take into account how animals might have subjectively experienced historical phenomena

The Meaning of Death Kai Horsthemke,2024-07-23 If death is the cessation of life then as a concept it draws its meaning from the preceding life While death and dying are inextricably connected dying is still a part of life unlike death The Meaning of Death A Philosophical Investigation analyzes death and dying the biotechnical quest for immortality the afterlife and the rationality of self chosen death Assuming eternal life will one day become possible Kai Horsthemke argues that immortality is not obviously desirable and that even if the right to life in principle includes the right to eternal life it must also include the right to self determined dying and death Although there is no creationist basis for existence and the finality of death remains a universal inevitable prospect this need not undermine confidence in the personal and transpersonal value of human activities Life is valuable not only because of its uniqueness and unrepeatability but also because it is finite The meaning of death is essentially that it gives meaning to life

Prioritizing Sustainability Education Joan Armon,Stephen Scoffham,Chara Armon,2019-12-05 Prioritizing Sustainability Education presents theory to practice essays and case studies by educators from six countries who elucidate dynamic approaches to sustainability education Too often students graduate with exploitative consumer driven orientations toward ecosystems and are unprepared to confront the urgent challenges presented by environmental degradation Educators are prioritizing sustainability oriented courses and programs that

cultivate students knowledge skills and values and contextualize them within relational connections to local and global ecosystems Little has yet been written however about the comprehensive sustainability education that educators are currently designing and implementing often across or at the edges of disciplinary boundaries The approaches described in this book expand beyond conventional emphases on developing students attitudes knowledge and behaviors by thinking and talking about ecosystems to additionally engaging students with ecosystems in sensory affective psychological and cognitive dimensions as well as imaginative spiritual or existential dimensions that guide environmental care and regeneration This book supports educators and graduate and upper level undergraduate students in the humanities social sciences environmental studies environmental sciences and professional programs in considering how to reorient their fields toward relational sustainability perspectives and practices

Ecologizing Education Sean

Blenkinsop, Estella C. Kuchta, 2024-04-15 *Ecologizing Education* explores how we can reenvision education to meet the demands of an unjust and rapidly changing world. Going beyond green schooling programs that aim only to shape behavior, Sean Blenkinsop and Estella Kuchta advance a pedagogical approach that seeks to instill eco-conscious and socially just change at the cultural level. Ecologizing education, as this approach is called, involves identifying and working to overcome anti-ecological features of contemporary education. This approach, called ecologizing education, aims to develop a classroom culture in sync with the more-than-human world where diversity and interdependency are intrinsic. Blenkinsop and Kuchta illustrate this educational paradigm shift through the real-world stories of two public elementary schools located in British Columbia. They show that this approach to learning starts with recognizing the environmental and social injustices that pervade our industrialized societies. By documenting how ecologizing education helps children create new relationships with the natural world and move toward mutual healing, Blenkinsop and Kuchta offer a roadmap for what may be the most potent chance we have at meaningful change in the face of myriad climate crises. Timely, practical, and ultimately inspirational, *Ecologizing Education* is vital reading for any parent, caregiver, environmentalist, or educator looking for wholistic education that places nature and the environment front and center.

Feeling Animal Death, 2019-06-20 The emotional exchange between so-called humans and more-than-human creatures is an overlooked phenomenon in societies characterized by the ubiquitous deaths of animals. This text offers examples of people across diverse disciplines and perspectives, from biomedical research to black theology to art learning and performing, expanding their desires, discovering new ways to behave, and altering their sense of self, purpose, and community because of passionate but not romanticized attachments to animals. By articulating the emotional ties that bind them to specific animals' lives and deaths, these authors play host to creaturely ghosts who reorient their world vision and work in the world, offering examples of affect and feeling needed to enliven multispecies ethics.

Multispecies Futures Roman Bartosch, Liza B. Bauer, Alexandra Böhm, Micha Gerrit Philipp Edlich, Greta Gaard, Björn Hayer, Andreas Hübner, Michaela Keck, Maria Moss, Jobst Paul, Mieke Roscher, Pamela Steen, Nils Steffensen, 2022-06-14 In light of the dramatic growth and rapid institutionalization of human-animal studies in recent years, it is somewhat surprising that only a small number of publications have proposed practical and theoretical approaches to teaching in this inter- and transdisciplinary field. Featuring eleven original pedagogical interventions from the social sciences and the humanities, as well as an epilogue from ecofeminist critic Greta Gaard, the present volume addresses this gap and responds to the demand by both educators and students for pedagogies appropriate for dealing with environmental crises. The theoretical and practical contributions collected here describe new ways of teaching human-animal studies in different educational settings and institutional contexts, suggesting how learners equipped with key concepts such as agency or relationality can develop empathy and ethical regard for the more-than-human world and especially nonhuman animals. As the contributors to this volume show, these cognitive and affective goals can be achieved in many curricula in secondary and

tertiary education By providing learners with the tools to challenge human exceptionalism in its various guises and related patterns of domination and exploitation in and outside the classroom these interventions also contribute to a much needed transformation not only of today s educational systems but of society as a whole This volume is an invitation to beginners and experienced instructors alike an invitation to re consider how we teach human animal studies and how we could and should prepare learners for an uncertain future in ideally a more egalitarian and just multispecies world With contributions by Roman Bartosch Liza B Bauer Alexandra B hm Micha Gerrit Philipp Edlich Greta Gaard Bj rn Hayer Andreas H bner Michaela Keck Maria Moss Jobst Paul Mieke Roscher Pamela Steen and Nils Steffensen *Feminist Food Studies* Barbara Parker, Jennifer Brady, Elaine Power, Susan Belyea, 2019-08-21 This expansive collection enriches the field of food studies with a feminist intersectional perspective addressing the impacts that race ethnicity class and nationality have on nutritional customs habits and perspectives Throughout the text international scholars explore three areas in feminist food studies the socio cultural the corporeal and the material The textbook s chapters intersect as they examine how food is linked to hegemony identity and tradition while contributors offer diverse perspectives that stem from biology museum studies economics popular culture and history This text s engaging writing style and timely subject matter encourage student discussions and forward looking analyses on the advancement of food studies With a unique multidisciplinary and global perspective this vital resource is well suited to undergraduate students of food studies nutrition gender studies sociology and anthropology
