that floods the internet yet comes to haunt the actualised buildings Like holograms these digital monuments which violently push physics and engineering to their limits flicker eerily between the real and the unreal invoking fantasies of omnipotence immortality and utopian cities But this experience of iconic architecture as a digital dream on the ground conceals from the urban spectator the social reality of the buildings and the rigidity of their ideology In 18 micro essays *Digital Monuments* exposes the stereotypes of iconic architecture while depicting the savagery of the industry from the Greek and Spanish crises triggered by financialised iconic development to mass labour deaths on construction sites in the UAE **The Changing**

significant places This book is beneficial to academics students and professionals of architecture Curve Simon Unwin,2019-04-03 Each of these Analysing Architecture Notebooks is devoted to a particular theme in understanding the rich and varied workings of architecture They can be thought of as addenda to the foundation volume Analysing Architecture which first appeared in 1997 and has subsequently been enlarged in three further editions Examining these extra themes as a series of Notebooks rather than as additional chapters in future editions allows greater space for more detailed exploration of a wider variety of examples whilst avoiding the risk of the original book becoming unwieldy Curve is a divisive issue in architecture Some see curves as expensive and decadent others as an expression of transcendence a way that the human mind can express its freedom from quotidian constraints Yet others use curves to emulate some of the most beautiful forms in nature This Notebook considers the various authorities to which architects look for the generation of their curves It also considers the aspirations curves manifest in architectural form **Australia** Harry Margalit,2019-11-15 This book tells the story of the architects and buildings that have defined Australia s architectural culture since the founding of the modern nation through Federation in 1901 That year marked the beginning of a search for better city forms and buildings to accommodate the changing realities of Australian life and to express an emerging distinctive and eventually confident Australian identity While Sydney and Melbourne were the settings for many of the major buildings all states and territories developed architectural traditions based on distinctive histories and climates Harry Margalit explores the flowering of these many architectural variants from the bid to create a model city in Canberra through the stylistic battles that opened a space for modernism to the idealism of postwar reconstruction and beyond to the new millennium Australia reveals a vibrant and influential culture of the built environment at its best when it matches civic idealism with the sensuality of a country of stunning light and landscapes Entrepreneurial Renaissance Piero Formica,2017-04-05 This book explores the parallels between the Renaissance during the 14th to 16th centuries and the upheavals in human and physical sciences in the 21st Century that herald an insurgent entrepreneurial renaissance The first Renaissance conceived and developed in an urban environment with the Medici family in Florence as pioneers was a melting pot of art culture science and technology It is in that context that entrepreneurship derived from artisan tradition and hence customized was born to meet the demands and anticipate the needs of individual consumers Starting with the mechanical technologies of the first industrial revolution art culture and science became separated from entrepreneurship The latter took on Fordist features which depersonalized and therefore standardized the producer consumer relationship The emerging model of entrepreneurship returns to its origins in customization e g 3D printing technologies sharing on demand economy strongly linked to the sequence art culture science technology The road to a new entrepreneurial renaissance is traveled by cities with creative communities These communities actively participate in promoting international talent mobility encouraging connections among the knowledge nomads who move around the world and the resources and talents rooted locally Brought back to life under the conditions of the current

age entrepreneurship is once again woven into the fabric of art culture science and technology and contributing to civic identity and pride Featuring case studies from local experts that highlight innovative initiatives and developments in diverse cities around the world this book aims to stimulate deep thought theories and applications in the fields of entrepreneurship and innovation
