Interactive Electronic NATOPS (IE-NATOPS) and Associated Graphic Interaction Concepts ,2002 This report presents the
results of a benchmark evaluation of a prototype design for an Interactive Electronic NATOPS IE NATOPS to support Navy
aircrews An investigation was conducted to identify aircrew information requirements for decision making associated with
monitoring of aircraft system health and management of in flight mechanical malfunctions It was determined in two
simulator based studies with H 46 aircrews that various types of aiding in support of mechanical and other subsystem health
monitoring and problem diagnosis are desirable and feasible but such information must be fully integrated into the Navy
helicopter NATOPS flight manual and checklists that represent training doctrine for aircraft operations The IE NATOPS
concept is to provide the pilot in the cockpit with a computer based presentation of the information in hard copy manuals
providing operating information and aircraft specific procedures For military and commercial aviation applications the
benefits are compelling context sensitivity fast and cheap updatability and the capacity for embedded intelligence and
embedded intelligent training A prototype IE NATOPS was developed for the SH 60F helicopter Multiple options are under
consideration for implementation of IE NATOPS in the cockpit including via an electronic kneeboard system that would
interface with other aircraft information and alerting systems **Natops Flight Manual** ,1995 *NATOPS Instrument
