

Natural Selection Webquest

Name _____
Date _____ Period _____

Go to each of these websites. Once there, read the material to discover information about Natural Selection. To make the webquest easier, you can also visit MrTranScience.Weebly.com/documents.html for links!

Site 1: http://www.biology-online.org/2/10_natural_selection.htm

1. Who was Charles Darwin? What is he known for?

Charles Darwin was a biologist from England who is best known for traveling to the Gallapagos Islands on the HMS Beagle and proposing the theory of evolution by natural selection.

2. What does the phrase "survival of the fittest" mean?

The organism that is "fittest" is best able to 1) survive and 2) reproduce (pass on its genes that were successful for survival)

Site 2: http://www.biology-online.org/2/11_natural_selection.htm

3. Which part of the finch has changed over time?

Their beaks

4. For each of these diagrams, write what type of food the beak shape is best suited for.

a. seeds

b. insects

c. buds/fruit

d. leaves

5. Explain how industrial melanism has affected moths.

Darker moths survive better in polluted environments and lighter moths survive better in cleaner environments because they blend in better with each unique "background".

Site 3: <http://www.experiment-resources.com/darwins-finches.html>

Read the first two sections "Darwin's Finches" and "The Galapagos Islands"

8. Did Darwin first believe that each finch he found was a different species? Was he right or wrong?

At first, Darwin thought that each finch he found was a different species, however, he was wrong.

They were actually all the same species of finch that had evolved over time to be very unique!

9. How did organisms arrive at the Galapagos Islands?

They were blown off course from South America

Site 4: http://www.biology-online.org/2/12_selective_breeding.htm

6. Why is selective breeding useful to farmers?

It allows farmers to create plants with traits that they desire (bigger yields, tastier food, larger fruit/vegetables)

7. What does it mean to selectively breed an organism?

Choose only individuals with the features that you want to reproduce and do not allow the others to reproduce and pass on genes that are not desirable.

Natural Selection Webquest Answer Key

Michael Ruse

Natural Selection Webquest Answer Key:

Who Discovered Natural Selection? Anna Claybourne, 2012-12-01 Who Discovered Natural Selection explains how scientists worked out the way in which living things evolve Understanding Natural Selection Michael Ruse, 2022-11-17 Explains and defends Darwin's mechanism of natural selection and explores its connections to culture morality and religion
