*Naturalism Without Mirrors* Huw Price, 2011-05-26 This volume brings together fourteen major essays by one of contemporary philosophy's most challenging thinkers Huw Price links themes from Quine Carnap Wittgenstein and Rorty to craft a powerful critique of contemporary naturalistic metaphysics He offers a new positive program for philosophy cast from a pragmatist mold

Metaphysics and the Philosophy of Science Matthew H. Slater, Zanja Yudell, 2017 This volume of new essays written by leading philosophers of science explores a broadly methodological question what role should metaphysics play in our philosophizing about science The essays address this question both through ground level investigations of particular issues in the metaphysics of science and by more general methodological investigations

Wilfrid Sellars, Idealism, and Realism Patrick Reider, 2016-11-17 Wilfrid Sellars *Idealism and Realism* is the first study of its kind to address a range of realist and idealist views inspired by psychological nominalism Bringing together premier analytic realists and distinguished defenders of German idealism it reveals why psychological nominalism is one of the most important theories of the mind to come out the 20th century The theory first put forward by Wilfrid Sellars argues that language is the only means by which humans can learn the types of socially shared practices that permit rationality Although wedded to important aspects of German idealism Sellars theory is couched in bold realist terms of the analytic tradition Those who are sympathetic to German idealism find this realist's appropriation of German idealism problematic Wilfrid Sellars *Idealism and Realism* thus creates a rare venue for realists and idealists to debate the epistemic outcome of the mental processes they both claim are essential to experience Their resulting discussion bridges the gap between analytic and continental philosophy In providing original and accessible chapters on psychological nominalism this volume raises themes that intersect with numerous disciplines the philosophy of mind philosophy of language epistemology and metaphysics It also provides clarity on arguably the best available account of why humans can reason be self aware know and act as agents

Routledge Handbook of Ecocriticism and Environmental Communication Scott Slovic, Swarnalatha Rangarajan, Vidya Sarveswaran, 2019-02-01 Ecocriticism and environmental communication studies have for many years co existed as parallel disciplines occasionally crossing paths but typically operating in separate academic spheres These fields are now rapidly converging and this handbook aims to reinforce the common concerns and methodologies of the sibling disciplines The Routledge Handbook of Ecocriticism and Environmental Communication charts the history of the relationship between ecocriticism and environmental communication studies while also highlighting key new paradigms in information studies diverse examples of practical applications of environmental communication and textual analysis and the patterns and challenges of environmental communication in non Western societies Contributors to this book include literary film and religious studies scholars communication studies specialists environmental historians practicing journalists art critics linguists ethnographers sociologists literary theorists and others but all focus their discussions on key issues in textual

representations of human nature relationships and on the challenges and possibilities of environmental communication The handbook is designed to map existing trends in both ecocriticism and environmental communication and to predict future directions This handbook will be an essential reference for teachers students and practitioners of environmental literature film journalism communication and rhetoric and well as the broader meta discipline of environmental humanities

**Making a Difference** Helen Beebee, Christopher Hitchcock, Huw Price, 2017-06-03 Making a Difference presents fifteen original essays on causation and counterfactuals by an international team of experts Collectively they represent the state of the art on these topics The essays in this volume are inspired by the life and work of Peter Menzies who made a difference in the lives of students colleagues and friends Topics covered include the semantics of counterfactuals agency theories of causation the context sensitivity of causal claims structural equation models mechanisms mental causation causal exclusion argument free will and the consequence argument

**The Routledge Handbook of Essence in Philosophy** Kathrin Koslicki, Michael J. Raven, 2024-05-15 Essences have been assigned important but controversial explanatory roles in philosophical scientific and social theorizing Is it possible for the same organism to be first a caterpillar and then a butterfly Is it impossible for a human being to transform into an insect like Gregor Samsa does in Kafka's The Metamorphosis Is it impossible for Lot's wife to survive being turned into a pillar of salt Traditionally essences or natures have been thought to help answer such central questions about existence identity persistence and modality These questions are not only of great philosophical interest they also are of great interest to society at large This Handbook surveys the state of the art on essence Core issues about essence are discussed in 33 chapters all of them written exclusively for this volume by leading experts They are organized into the following four major parts each with its own introduction that provides a summary and comparison of the part's chapters History Essence and Essentialism's Themes and Variations Applications Anti Essentialist Challenges The volume is accessible enough for students while also providing enough details to make it a valuable reference for researchers While the notion of essence has been targeted for sustained criticisms since antiquity recent work has renewed interest in the topic This Handbook explains and synthesizes much of this current interest placing essence within its historical context and drawing connections to many contemporary areas of philosophy as well as to scholarly work in other disciplines With cross references in each chapter and a comprehensive index The Routledge Handbook of Essence in Philosophy is a useful resource and essential reading for anyone whether in or out of academic philosophy seeking clarification on one of philosophy's most distinctive and notorious notions

**Natural Born Monads** Andrea Altobrando, Pierfrancesco Biasetti, 2020-10-12 We are still looking for a satisfactory definition of what makes an individual being a human individual The understanding of human beings in terms of organism does not seem to be satisfactory because of its reductionistic flavor It satisfies our need for autonomy and benefits our lives thanks to its medical applications but it disappoints our needs for conscious and free self determination For similar reasons i.e. because of its anti libertarian tone an

organicistic understanding of the relationship between individual and society has also been rejected although no truly satisfactory alternative for harmonizing individual and social wellness has been put forth Thus a reassessment of the very concepts of individual and organism is needed In this book the authors present a specific line of thought which started with Leibniz concept of monad in 17th century continued through Kant and Hegel and as a result reached the first Eastern country to attempt to assimilate as well as confront with Western philosophy and sciences i e Japan The line of thought we are tracing has gone on to become one the main voices in current debates in the philosophy of biology as well as philosophical anthropology and social philosophy As a whole the volume offers a both historical and systematic account of one specific understanding of individuals and their environment which tries to put together its natural embedding as well as its dialectical nature Such a historical systematic map will also allow to better evaluate how life sciences impact our view of our individual lives of human activities of institutions politics and finally of humankind in general

**Oxford Studies in Metaphysics Volume 12** Karen Bennett, Dean W. Zimmerman, 2020-12-21 Much of the most interesting work in philosophy today is metaphysical in character Oxford Studies in Metaphysics is a forum for the best new work in this flourishing field OSM offers a broad view of the subject featuring not only the traditionally central topics such as existence identity modality time and causation but also the rich clusters of metaphysical questions in neighbouring fields such as philosophy of mind and philosophy of science Besides independent essays volumes will often contain a critical essay on a recent book or a symposium that allows participants to respond to one another s criticisms and questions Anyone who wants to know what s happening in metaphysics can start here

**Peirce's Empiricism** Aaron Bruce Wilson, 2016-10-19 Widely praised as a founder of modern semiotics and of the pragmatist tradition in philosophy Charles S Peirce 1839-1914 spent over forty years developing a philosophical system that addresses the fundamental problems of Western metaphysics epistemology and value theory Although never formally completed what emerges from Peirce s writings is a distinctive system that through an innovative semiotic or theory of signs and cognition combines a thoroughgoing form of empiricism with a robustly realist metaphysics that emphasizes the mind independence of laws and other universals Peirce s Empiricism Its Roots and Its Originality explains this marriage of empiricism with realism by tracing the roots of Peirce s thought in the history of Western philosophy with particular attention paid to his predecessors in the empiricist and the common sense traditions By purging modern empiricism of its nominalistic metaphysics and its Cartesian assumptions about mind and knowledge and by combining it with insights from sources as diverse as Duns Scotus and Charles Darwin Peirce reinvents the idea that all our knowledge depends on sense perception while reaffirming the place of philosophy as a foundational field of inquiry In Peirce s Empiricism Aaron Bruce Wilson defends an interpretation of Peirce s philosophical work as forming a systematic whole and develops the connections between Peirce Reid and the British empiricists Wilson provides focused analyses of Peirce s accounts of experience habit perception semeiosis truth and ultimate ends This book will be of great value to students and

scholars with interests in Peirce American philosophy more broadly modern philosophy and semiotics **Pragmatism and the European Traditions** Maria Baghramian, Sarin Marchetti, 2017-12-06 The turn of the twentieth century witnessed the birth of two distinct philosophical schools in Europe analytic philosophy and phenomenology The history of 20th century philosophy is often written as an account of the development of one or both of these schools as well as their overt or covert mutual hostility What is often left out of this history however is the relationship between the two European schools and a third significant philosophical event the birth and development of pragmatism the indigenous philosophical movement of the United States Through a careful analysis of seminal figures and central texts this book explores the mutual intellectual influences convergences and differences between these three revolutionary philosophical traditions The essays in this volume aim to show the central role that pragmatism played in the development of philosophical thought at the turn of the twentieth century widen our understanding of a seminal point in the history of philosophy and shed light on the ways in which these three schools of thought continue to shape the theoretical agenda of contemporary philosophy *Fictions* Markus Gabriel, 2024-03-12 From ancient philosophy to contemporary theories of fiction it is a common practice to relegate illusory appearances to the realm of the non-existent like shadows on the wall of Plato's cave Contrary to this traditional mode of drawing a metaphysical distinction between reality and fiction Markus Gabriel argues that the realm of the illusory fictional imaginary and conceptually indeterminate is as real as it gets Being in touch with reality need not and cannot require that we overcome appearances in order to grasp a meaningless reality which exists out there outside and maybe even beyond our minds Human mindedness Geist exists in the mode of fictions through which we achieve self-consciousness This novel approach provides a fresh perspective on our existence as subjects who lead their lives in the light of self-conceptions Fictions also develops a social ontology according to which the social unfolds as a constant renegotiation of dissent of different points of view onto the same reality Thus we cannot ever hope to ground human society in a fiction-free realm of objective transactions However this does not mean that truth and reality are somehow outdated concepts On the contrary we need to enlarge our conception of reality so that it fully encompasses ourselves as specifically minded social animals This major new work of philosophy will be of interest to students and scholars throughout the humanities and to anyone interested in contemporary philosophy and social thought *The New Yearbook for Phenomenology and Phenomenological Philosophy* Ludger Hagedorn, James Dodd, 2015-12-22 Religion War and the Crisis of Modernity A Special Issue Dedicated to the Philosophy of Jan Patočka The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl's groundbreaking work and the extension of this work by such figures as Scheler Heidegger Sartre Levinas Merleau-Ponty and Gadamer Contributors Ivan Chvatik Nicolas de Warren James Dodd Edo Evink Ludger Hagedorn Jean-Luc Marion Claire Perryman Holt Marcia S. Cavalcante Schuback Michael Staudigl Christian Sternad and Udo von K

*Rorty and Beyond* Randall Auxier, Eli Kramer, Krzysztof Piotr

Skowronski, 2019-12-19 For better or worse Rorty has shaped the trajectory of academic philosophy A decade after his passing his legacy is ever present especially in context of the growth of the far right the struggle over the meaning of justice and equity and the ecological crises we face Edited by Randall Auxier Eli Kramer and Krzysztof Piotr Skowronski Rorty and Beyond brings together leading international philosophers from the United States and Europe to reevaluate Rorty's legacy and explore what lies beyond his life and work This collection covers a diverse territory exploring Rorty's legacy regarding theories of truth accounts of nature and naturalism the historical situation of professional philosophy the private and public aspects of religion the place of literature in cultural politics and points beyond Rorty such as what we may hope for after his critical attack on certainty and ultimacy Scholars specialists and those new to Rorty will all find insight useful criticism and edification in this volume

Three paradoxes of personhood Joseph Margolis, 2017-09-14T00:00:00+02:00 The starting point of Joseph Margolis' last philosophical effort is represented by the problem of the human gap in animal continuity There appear to be no comparable variants of animal evolution effected by anything like the culturally enabled creation While we share with other animals more or less refined forms of societal life acquiring a natural language remains a distinctively human character although it is grounded in the completely natural favourable changes in the human vocal apparatus and brain the merely causal emergence of language in humans reacts back into human primates by transforming them into persons or selves The artifactuality of persons appears to be at the same time a natural and emergent phenomenon constituting the other side of the process of language acquisition both by early hominids and by human infants In this perspective the largely informal mongrel and approximate functionality of ordinary language is interpreted as a good tool for the cultural animal to cope with the world while the collective dimension of human forms of life appears as the shared context of external and internal constitution of the human selves

**Ecologies of Participation** Zayin Cabot, 2018-04-30 In this daring debut Zayin Cabot challenges the wise homebodies of academia A profoundly interdisciplinary approach to comparative scholarship Ecologies of Participation offers a methodology whereby we can face our shared planetary predicament It is grounded in process philosophy and asserts the importance of a new ontology of agency It traces the importance of L vy Bruhl and L vi Strauss's early work while offering new insight into the ontological turn in anthropology This book sets out to destabilize modern reductionist trends toward scientific materialism without falling into postmodern cultural constructivism It does not assume the givenness of nature or culture By advancing a multi ontology approach this work offers robust interventions into decolonial and critical studies Cabot takes contemporary scholarship in new and exciting directions offering an unstable ground from which to examine our shared worlds both human and other Throughout the last chapters of the book these threads are illuminated through a detailed ethics of comparison and participation

**Philosophy at 3:AM** Richard Marshall, 2014-05 The 25 interviews collected in this volume were carried out with the aim of confronting widespread ignorance about contemporary philosophy Contemporary philosophical issues are presented

through engaging but serious dialogues that taken together offer a glimpse into key debates across the discipline *From Empiricism to Expressivism* Robert Brandom, 2015-01-06 Wilfrid Sellars ranks as one of the leading critics of empiricism a philosophical approach to knowledge that seeks to ground it in human sense experience Robert Brandom clarifies what Sellars had in mind when he talked about moving analytic philosophy from its Humean to its Kantian phase and why such a move might be of crucial importance today *Facts and Norms in Law* Sanne Taekema, Bart van Klink, Wouter de Been, 2016-07-27 *Facts and Norms in Law* Interdisciplinary Reflections on Legal Method presents an innovative collection of essays on the relationship between descriptive and normative elements in legal inquiry and legal practice What role does empirical data play in law New insights in philosophy the social sciences and the humanities have forced the relationship between facts and norms on to the agenda especially for legal scholars doing interdisciplinary work This timely volume carefully combines critical perspectives from a range of different disciplinary traditions and theoretical positions

*Meaning Without Representation* Steven Gross, Nicholas Tebben, Michael Williams, 2015 Challenges the idea that representation of how the world is should play a fundamental explanatory role in any explanation of language Examines deflationary accounts of truth the role of language in expressing mental states and the normative and the natural as they relate to issues of representation **Naturalism Without Mirrors** Huw Price, 2010-11-03 This volume brings together fourteen major essays on truth naturalism expressivism and representationalism by one of contemporary philosophy's most challenging thinkers Huw Price weaves together Quinean minimalism about truth Carnapian deflationism about metaphysics Wittgensteinian pluralism about the functions of declarative language and Rortyian skepticism about representation to craft a powerful and sustained critique of contemporary naturalistic metaphysics In its place he offers us not nonnaturalistic metaphysics or philosophical quietism but a new positive program for philosophy cast from a pragmatist mold This collection will be essential reading for anyone interested naturalism pragmatism truth expressivism pluralism and representationalism or in deep questions about the direction and foundations of contemporary philosophy It will be especially important to practitioners of analytic metaphysics if they wish to confront the presuppositions of their own discipline Price recommends a modest explanatory naturalism in the sense of Hume naturalism about own linguistic behavior regarded as a behavior of natural creatures in a natural environment He shows how this viewpoint privileges use and function over truth and reference and expression over representation as useful theoretical categories for the core philosophical project and thereby undermines the semantic presuppositions of contemporary analytic metaphysics At the same time it offers an attractive resolution of the so called placement problems that so preoccupy metaphysical naturalists a global expressivism with affinities both to the more local expressivism of writers such as Blackburn and Gibbard and to Brandom's global inferentialism
