## **Nature And History In Modern Italy Ecology History:**

*Nature and History in Modern Italy* Marco Armiero, Marcus Hall, 2010-08-31 Marco Armiero is Senior Researcher at the Italian National Research Council and Marie Curie Fellow at the Institute of Environmental Sciences and Technologies Universitat Aut noma de Barcelona He has published extensively on Italian environmental history and edited Views from the South Environmental Stories from the Mediterranean World

**Nature and History in Modern Italy** Marco Armiero, Marcus Hall, 2010-08-15 Is Italy il bel paese the beautiful country where tourists spend their vacations looking for art history and scenery Or is it a land whose beauty has been cursed by humanity s greed and nature s cruelty The answer is largely a matter of narrative and the narrator s vision of Italy The fifteen essays in *Nature and History in Modern Italy* investigate that nation s long experience in managing domesxadtxadacated rather than wild natures and offer insight into these conflicting visions Italians shaped their land in the most literal sense producing the landscape sculpting its heritage embedding memory in nature and rendering the two different visions inseparxadable The interplay of Italy s rich human history and its dramatic natural diversity is a subject with broad appeal to a wide range of readers

The Oxford Handbook of Environmental History Andrew C. Isenberg, 2017 The Oxford Handbook of Environmental History draws on a wealth of new scholarship to offer diverse perspectives on the state of the field

Coffee Is Not Forever Stuart McCook, 2019-10-02 The global coffee industry which fuels the livelihoods of farmers entrepreneurs and consumers around the world rests on fragile ecological foundations In *Coffee Is Not Forever* Stuart McCook explores the transnational story of this essential crop through a history of one of its most devastating diseases the coffee leaf rust He deftly synthesizes agricultural social and economic histories with plant genetics and plant pathology to investigate the increasing interdependence of the world s coffee producing zones In the process he illuminates the progress and prognosis of the challenges especially climate change that pose an existential threat to a crop that global consumers often take for granted And finally in putting a tropical plant disease at the forefront he has crafted the first truly global environmental history of coffee pushing its study and the discipline in bold new directions

International Perspectives in Feminist Ecocriticism Greta Gaard, Simon C. Estok, Serpil Oppermann, 2013-06-07 Exploring environmental literature from a feminist perspective this volume presents a diversity of feminist ecocritical approaches to affirm the continuing contributions relevance and necessity of a feminist perspective in environmental literature culture and science Feminist ecocriticism has a substantial history with roots in second and third wave feminist literary criticism women s environmental writing and social change activisms and eco cultural critique and yet both feminist and ecofeminist literary perspectives have been marginalized The essays in this collection build on the belief that the repertoire of violence conceptual and literal toward nature and women comprising our daily lives must become central to our ecocritical discussions and that basic literacy in theories about ethics are fundamental to these discussions The book offers an international collection of scholarship that includes ecocritical theory literary criticism and ecocultural

analyses bringing a diversity of perspectives in terms of gender sexuality and race Reconnecting with the histories of feminist and ecofeminist literary criticism and utilizing new developments in postcolonial ecocriticism animal studies queer theory feminist and gender studies cross cultural and international ecocriticism this timely volume develops a continuing and international feminist ecocritical perspective on literature language and culture *Mad Dogs and Meerkats* Karen Brown,2011-05-10 In *Mad Dogs and Meerkats* Karen Brown links the increase of rabies in Southern Africa to the HIV AIDS epidemic Her study shows that the most afflicted regions of South Africa have seen a dangerous rise in feral dog populations as people lack the education means or will to care for their pets or take them to inoculation centers Ineffective disease control which in part depends on management policies in neighboring states has exacerbated the problem The book traces the history of rabies in South Africa and neighboring states from 1800 to the present and shows how environmental and economic changes brought about by European colonialism and global trade have had long term effects Provided by publisher

**Waymarking Italy's Influence on the American Environmental Imagination While on Pilgrimage to Assisi**

Robert Lawrence France,2020-09-10 Undertaking a peripatetic pilgrimage that is equal parts a daily description of a 200 kilometre walk from the wounded mountain of La Verna to the tortured river in Assisi and an examination of the debt owed to Italy in terms of ecocultural and environmental scholarship this book provides an innovative addition to the nascent field of ecocritical narrative scholarship Through a process that has been referred to as deep travel or mind walking the text fulsomely reviews how time spent in Italy influenced the writings of notable North American environmental historians geographers scientists nature writers landscape architects and restoration theorists about the conception and manipulation of the natural world This literary field study highlights how the phenomenological co traversing of texts and trails can be a valued methodology for undertaking environmental criticism

**International Organizations and Environmental Protection**

Wolfram Kaiser,Jan-Henrik Meyer,2016-12-01 Pollution resource depletion habitat management and climate change are all issues that necessarily transcend national boundaries Accordingly they and other environmental concerns have been a particular focus for international organizations from before the First World War to the present day This volume is the first to comprehensively explore the environmental activities of professional communities NGOs regional bodies the United Nations and other international organizations during the twentieth century It follows their efforts to shape debates about environmental degradation develop binding intergovernmental commitments and following the seminal 1972

Conference on the Human Environment implement and enforce actual international policies **A History of**

**Environmentalism** Marco Armiero,Lise Sedrez,2014-07-31 Think globally act locally has become a call to environmentalist mobilization proposing a closer connection between global concerns local issues and individual responsibility A History of Environmentalism explores this dialectic relationship with ten contributors from a range of disciplines providing a history of environmentalism which frames global themes and narrates local stories Each of the chapters in this volume addresses

specific struggles in the history of environmental movements for example over national parks species protection forests waste contamination nuclear energy and expropriation A diverse range of environments and environmental actors are covered including the communities in the Amazonian Forest the antelope in Tibet atomic power plants in Europe and oil and politics in the Niger Delta The chapters demonstrate how these conflicts make visible the intricate connections between local and global the body and the environment and power and nature A History of Environmentalism tells us much about transformations of cultural perceptions and ways of production and consuming as well as ecological and social changes More than offering an exhaustive picture of the entire environmentalist movement A History of Environmentalism highlights the importance of the experience of environmentalism within local communities It offers a worldwide and polyphonic perspective making it key reading for students and scholars of global and environmental history and political ecology

*Workers of the Earth* Stefania Barca, 2024-06-20 Capitalism is destroying our planet but like most social progress in the last two centuries ecological justice can only be achieved through working class struggle In *Workers of the Earth* Stefania Barca uncovers the environmental history and political ecology of labour to shed new light on the potentiality of workers as ecological subjects Taking an ecofeminist approach this ground breaking book makes a unique contribution to the emerging field of environmental labour studies expanding the category of labour to include waged and unwaged industrial and meta industrial workers Going beyond conventional categories of production and reproduction as separate spheres of human experience Barca offers a fresh perspective on the place of labour in today's global climate struggle reminding us that the fight against climate change is a fight against capitalism

Future Remains Gregg Mitman, Marco Armiero, Robert S. Emmett, 2018-04-20 What can a pesticide pump a jar full of sand or an old calico print tell us about the Anthropocene the age of humans Just as paleontologists look to fossil remains to infer past conditions of life on earth so might past and present day objects offer clues to intertwined human and natural histories that shape our planetary futures In this era of aggressive hydrocarbon extraction extreme weather and severe economic disparity how might certain objects make visible the uneven interplay of economic material and social forces that shape relationships among human and nonhuman beings *Future Remains* is a thoughtful and creative meditation on these questions The fifteen objects gathered in this book resemble more the tarots of a fortuneteller than the archaeological finds of an expedition they speak of planetary futures Marco Armiero Robert S Emmett and Gregg Mitman have assembled a cabinet of curiosities for the Anthropocene bringing together a mix of lively essays creatively chosen objects and stunning photographs by acclaimed photographer Tim Flach The result is a book that interrogates the origins implications and potential dangers of the Anthropocene and makes us wonder anew about what exactly human history is made of

**Methodological Challenges in Nature-Culture and Environmental History Research** Jocelyn Thorpe, Stephanie Rutherford, L. Anders Sandberg, 2016-11-10 This book examines the challenges and possibilities of conducting cultural environmental history research today Disciplinary commitments certainly influence the questions

scholars ask and the ways they seek out answers but some methodological challenges go beyond the boundaries of any one discipline The book examines how to account for the fact that humans are not the only actors in history yet dominate archival records how to attend to the non visual senses when traditional sources offer only a two dimensional non sensory version of the past how to decolonize research in and beyond the archives and how effectively to use sources and means of communication made available in the digital age This book will be a valuable resource for those interested in environmental history and politics sustainable development and historical geography

*Old World and New World Perspectives in Environmental Philosophy* Martin Drenthen, Jozef Keulartz, 2014-07-28 This is the first collection of essays in which European and American philosophers explicitly think out their respective contributions and identities as environmental thinkers in the analytic and continental traditions The American European as well as Analytic Continental collaboration here bears fruit helpful for further theorizing and research The essays group around three well defined areas of questioning all focusing on the amelioration management of environmentally historically and traditionally diminished landscapes The first part deals with differences between New World and the Old World perspectives on nature and landscape restoration in general the second focuses on the meaning of ecological restoration of cultural landscapes and the third on the meaning of the wolf and of wildness It does so in a way that the strengths of each philosophical school continental and analytic comes to the fore in order to supplement the other's approach This text is open to educated readers across all disciplines particularly those interested in restoration adaptation ecology the cultural construction of place and landscape the ongoing conversation about wilderness the challenges posed to global environmental change The text may also be a gold mine for doctoral students looking for dissertation projects in environmental philosophy that are inclusive of continental and analytic traditions This text is rich in innovative approaches to the questions they raise that are reasonably well thought out The fact that the essays in each section really do resonate with one another directly is also intellectually exciting and very helpful in working out the full dimensions of each question raised in the volume

**The Nature State** Wilko Hardenberg, Matthew Kelly, Claudia Leal, Emily Wakild, 2017-07-14 This volume brings together case studies from around the globe including China Latin America the Philippines Namibia India and Europe to explore the history of nature conservation in the twentieth century It seeks to highlight the state a central actor in these efforts which is often taken for granted and establishes a novel concept the nature state as a means for exploring the historical formation of that portion of the state dedicated to managing and protecting nature Following the Industrial Revolution and post war exponential increase in human population and consumption conservation in myriad forms has been one particularly visible way in which the government and its agencies have tried to control manage or produce nature for reasons other than raw exploitation Using an interdisciplinary approach and including case studies from across the globe this edited collection brings together geographers sociologists anthropologists and historians in order to examine the degree to which sociopolitical regimes facilitate and shape the emergence and

development of nature states This innovative work marks an early intervention in the tentative turn towards the state in environmental history and will be of great interest to students and practitioners of environmental history social anthropology and conservation studies      **Urban Political Ecology in the Anthro-po-obscene** Henrik Ernstson,Erik Swyngedouw,2018-12-07 Urban Political Ecology in the Anthro-po-obscene Interruptions and Possibilities centres on how to organize anew the articulation between emancipatory theory and political activism Across its theoretical and empirical chapters written by leading scholars from anthropology geography urban studies and political science the book explores new political possibilities that are opening up in an age marked by proliferating contestations sharpening socio ecological inequalities and planetary processes of urbanization and environmental change A deepened conversation between urban environmental studies and political theory is mobilized to chart a radically new direction for the field of urban political ecology and cognate disciplines What could emancipatory politics be about in our time What does a return of the political under the aegis of equality and freedom signal today in theory and in practice How do political movements emerge that could reinvent equality and freedom as actually existing socio ecological practices The hope is to contribute discussions that can expand and rearrange critical environmental studies to remain relevant in a time of deepening depoliticization and the rise of post truth politics Urban Political Ecology in the Anthro-po-obscene will be of interest to postgraduates established scholars and upper level undergraduates from any discipline or field with an interest in the interface between the urban the environment and the political including geography urban studies environmental studies and political science      Habsburg Natures Jawad Daheur,Iva Lučić,2025-11-01 Within the Habsburg Empire of the late nineteenth century nature became a central focus of political economic and scientific attention A source of valuable natural resources and a platform for consolidating wider territorial rule its management and control was subsumed into a broader system of imperial governance In this exacting analysis of the correlation between the environment and power Habsburg Natures explores how the natural world fundamentally shaped the political and economic landscape within the Austro Hungarian Empire from 1850 to 1918 Ranging from forestry and coal mining to river politics and natural disasters this volume spotlights how deeply intertwined the histories of environmentalism and empire are      *Ecocritical Approaches to Italian Culture and Literature* Pasquale Verdicchio,2016-08-23 The essays in this volume provide a theorization of what we might call the denatured wild in other words a notion of environmental restoration or reinhabitation that recognizes and reconfigures the human factor as an interdependent entity Acknowledging the contributions of Marco Armerio Serenella Iovino Giovanna Ricoveri Patrick Barron and Anna Re among others Ecocritical Approaches to Italian Culture and Literature The Denatured Wild negotiates the ground within the historicizing theoretical perspectives and surveying spirit of these writers Despite the central role that nature has played in Italian culture and literature there has been an evident lack of critical approaches free of the bridles of the socio political manipulations of nationalism The authors in this collection by recognizing the groundbreaking work of

many non Italian ecocritics challenge the narrowly defined conventions of Italian Studies and illuminates the complexities of an Italian ecocriticism that reveals a rich environmentally engaged literary and cultural tradition A Monastery for the Ibex Wilko Graf von Hardenberg, 2021-02-23 Gran Paradiso National Park is Italy's oldest and was instrumental in preventing the extinction of the Alpine ibex between World War I and just after World War II Today there are more than 30 000 ibex living in the Alps all of which descended from that last colony protected in Gran Paradiso under Mussolini's rule Wilko Graf von Hardenberg merges the history of conservation with the area's social history and Italy's larger political history to produce a multifaceted narrative about the park as an institution the conflicts it triggered and practices adopted to manage the ibex despite hurdles placed by the fascist regime The book's central argument is that in fascist Italy preservation propaganda notwithstanding was a product of the regime's continuities with the previous liberal system Italy's total fascist transformation accomplished only more than a decade after Mussolini took power virtually unmade the early successes of preservation set in place by the nascent nature state in the regime's early years Despite this conflict conservationists succeeded in preserving the ibex Hardenberg positions this success within the broader history of science conservation and tourism in fascist Italy and the Alpine region creating a comprehensive historical background and comparative reference to ongoing debates about the role of nature conservation in general and in relation to the state and its agencies

**Mosquitopia** Marcus Hall, Dan Tamir, 2021-09-02 This edited volume brings together natural scientists social scientists and humanists to assess if or how we may begin to coexist harmoniously with the mosquito The mosquito is humanity's deadliest animal killing over a million people each year by transmitting malaria yellow fever Zika and several other diseases Yet of the 3 500 species of mosquito on Earth only a few dozen of them are really dangerous so that the question arises as to whether humans and their mosquito foe can learn to live peacefully with one another Chapters assess polarizing arguments for conserving and preserving mosquitoes as well as for controlling and killing them elaborating on possible consequences of both strategies This book provides informed answers to the dual question could we eliminate mosquitoes and should we Offering insights spanning the technical to the philosophical this is the go to book for exploring humanity's many relationships with the mosquito which becomes a journey to finding better ways to inhabit the natural world Mosquitopia will be of interest to anyone wanting to explore dependencies between human health and natural systems while offering novel perspectives to health planners medical experts environmentalists and animal rights advocates Environmental Sustainability and Global Change Luca Salvati, 2024-11-22 Environmental Sustainability and Global Change Forests Agriculture and Soils vis vis Human Disturbance offers an integrated approach to the socio environmental dynamics of the ecological economic nexus characteristic of Mediterranean landscapes Evidencing the role of policies targeting sustainable development goals in Southern Europe case studies from Italy Spain and Greece confirm the need of place specific approaches to socio ecological complexity and the partial effectiveness of generalized top down measures Authored by

leading scholars in Southern Europe with eminent contributions from Eastern Europe the book identifies the intrinsic peculiarity of the environmental economic nexus characteristic of the Northern Mediterranean basin along with important regional differences Stimulating a spatial planning for rural areas the book proposes a dynamic image of Mediterranean rural landscapes providing novel interpretations conceptual definitions and operational tools designed to reduce ecological fragility and economic vulnerability Offers a holistic multidisciplinary approach to ecological and economic issues including studies spanning agronomy demography ecology and economics Contains unique case studies from comparative cases and quali quantitative studies with extensive geographical coverage Includes updated ecological issues of complex rural systems in the Mediterranean region and provides specialized strategies for sustainable development in these less studied areas
