Chapter 6

Exam-style questions

- 1 a i** transcription ; [1]
ii transfer RNA / tRNA ; [1]
iii ribosome ; [1]
iv R is an anticodon ; temporarily binds with complementary codon on mRNA ; tRNA with a particular R / anticodon carries a specific amino acid ; ensures that the correct amino acid is placed in the growing polypeptide chain ; [max 3]
b deletion of one nucleotide changes the triplet code ; so a different amino acid is coded for / inserted into the polypeptide ; reference to frame shift ; all subsequent triplets / amino acids affected ; different primary structure of protein so a different tertiary structure ; active site no longer able to bind with substrate ; [max 4]
[Total: 10]

- 2 a i** CCA TAG CAC GTT ACA ACG
TGA AGG TAA
all bases correct ; shown as triplets ; [2]
ii CCA UAG CAC GUU ACA ACG
UGA AGG UAA
all A, C and G bases correct ; all U bases correct ; [2]
b i insulin molecule is too large ; is hydrophilic / cannot move between phospholipids ; [2]
ii glycoprotein ; [1]
iii glucose cannot pass through the phospholipid bilayer ; can only move into a cell through transporter proteins ; by facilitated diffusion ; allow active transport ; glucose moves

down concentration gradient (into the cell) ; [max 2]

- c i** a random / unpredictable change in the base sequence of DNA ; change in the number / structure, of chromosomes ; [2]
ii Note: only one amino acid changed – no frame shift change in the amino acid sequence / primary structure, of insulin ; resulting in a change in its tertiary structure ; shape of binding site no longer complementary to the shape of the receptor ; [3]
iii they have two chromosomes carrying an insulin gene ; the other gene may be normal ; so they can still make some normal insulin ; [max 2]
[Total: 16]
3 a i smaller in prokaryotes ; [1]
ii free in cytoplasm in prokaryotes but also on endoplasmic reticulum in eukaryotes ; some in chloroplasts/ mitochondria, in eukaryotes ; [2]
b holds tRNA in position next to the complementary mRNA codon ; two tRNAs in position at any one time ; reference to P site and E site for binding of tRNA ; so peptide bond forms between adjacent amino acids ; ribosome moves along mRNA strand ; so tRNAs bind in sequence determined by the sequence of codons on mRNA ; any other valid point, e.g. detail of recognition of start and stop codons ; [max 4]
c i pancreatic cells are very active in protein synthesis ; [1]
ii so that labelled amino acids travelled through the cell as a 'pulse' ;

The Nature of Time J. Woods Halley, 2022-12-02 This book reviews and contrasts contemporary and historical perceptions of time from scientific and intuitive human points of view Ancient and modern clocks Augustinian ideas the deterministic Newtonian universe biological clocks deep time thermodynamics quantum mechanics and relativity all contribute to the perspective The focus is on what can be inferred from established technologies and science as opposed to futuristic speculation Chapter 1 describes clocks including the cesium atomic clocks establishing the current global time standard a history of clock development biological

clocks phylogenetic trees radioactive dating and astronomical methods to determine the age of the universe Chapter 2 poses ancient questions about time not fully addressed by an understanding of the technical nature of clocks An early summary of some of these questions as described by Augustine in the 3rd century CE is followed by a description of how Newton 1300 years later introduced a conception of time which provided some answers such as the nature of an infinitesimally short present Implications concerning the reality of events in the past present and future are also discussed The Newtonian picture is contrasted with the intuitive human one and the possibilities of time travel and temporal recurrence are briefly discussed Chapter 3 introduces the second law of thermodynamics and addresses how it is compatible with a time reversible Newtonian description of a universe even though it appears to define an arrow of time The nature of entropy and its relation to coarse graining and emergence play a central role in the discussion Chapter 4 discusses ways in which quantum mechanics has altered the Newtonian perspective accounting for various interpretations of the meaning of quantum mechanics with regard to time Chapter 5 describes basic elements of special relativity and their implications for the nature of time Examples of time dilation and the changing order of space such as separated events in different frames are described The examples are chosen to avoid evocation of currently unattainable technologies An afterword in chapter 6 reviews questions raised by Augustine and summarizes how the development of science since then has addressed them This book was originally developed for an interdisciplinary seminar for beginning undergraduates at the University of Minnesota It uses a small amount of algebra mainly in supplementary appendices and does not assume any prior knowledge of physics chemistry biology or astronomy In contrast to many semipopular books on time it avoids speculation either about engineering technology or physical theory strings loop quantum gravity black hole entropy Instead it takes a more grounded approach and describes what is currently known and not known to help both students and the general reader make better sense of time

Lerner, R. C. Lewontin, Benno Muller-Hill, 2010-11 The nature nurture debate continues to stir controversy in the social and behavioral sciences How much of human behavior and development can be attributed to biology and how much to the environment Can either be said to determine human development And what are the implications of each view for society In this important study a noted developmental psychologist contributes to this debate by confronting the difficult issue of doctrines of human development and the consequences for society of deriving political programs and public policy from them Beginning with the premise that scientific ideas are not neutral but can be used for either good or evil Richard Lerner considers the recent history of one such idea biological determinism which at times has had the backing of respected scientists intellectuals and political leaders During this century biological determinism has been coupled with political philosophies that hold that some people are inherently better than others This has meant that certain groups of people Jews Blacks Native Americans women have been stigmatized because of supposedly innate even biological differences with sometimes disastrous consequences The most notorious instance was Nazi Germany where racial science given legitimacy by the scientific community became a cornerstone of the Nazi Final Solution Meanwhile theories of biological determinism continue to find adherents within the scientific community Konrad Lorenz who was awarded a Nobel Prize in 1973 was a critical figure in the development of the most recent manifestation of biological determinism sociobiology Lerner examines the work of Lorenz and current sociobiologists and the implications of their claims for modern society He fears that biological determinism may again be co-opted to serve the political agenda of today's reactionary politicians In fact Lerner notes sociobiologists have had to face the fact that organizations such as the fascist National Front party in Britain and its counterparts in France and the United States have selectively seized upon sociobiology to fuel their notions of genetically superior and inferior races Feminist Politics and Human Nature (Philosophy and Society) Alison M. Emotion Annett Schirmer,2014-07-07
Emotion is a comprehensive text that integrates traditional psychological theories and cutting edge neuroscience research to explain the nature and role of emotions in human functioning Written in an engaging style the book explores emotions at the behavioral physiological mental and neurofunctional i e chemical metabolic and structural levels and examines each in a broad context touching on different theoretical perspectives regulatory processes development and culture among others Providing greater insight and depth than existing texts the book offers a holistic view of the field giving students a broader

understanding of the mechanisms underlying emotions and enabling them to appreciate the role emotions play in their lives In dedicated chapters the text covers past and current theories of emotion individual emotions and their bodily representation the role of emotions for behavior and cognition as well as interindividual differences **The Collegian and Progress of India** ,1920 The Athenaeum ,1879 Pharmacognosy and Phytochemistry-I Dr. Baljinder Singh Bajwa,Dr. Rashmika Patel,Dr. Nasiruddin Ahmad Farooqui,2023-06-15 Discover the comprehensive Pharmacognosy and Phytochemistry I e book for B Pharm 4th Semester published by Thakur Publication and meticulously aligned with the PCI syllabus Immerse yourself in the world of natural products and explore the intricate relationship between plants and medicine Gain access to comprehensive content practical examples and key concepts in this invaluable resource Stay ahead in your studies with Thakur Publication s trusted expertise Purchase the e book now and embark on a transformative learning journey in pharmacognosy and phytochemistry Enhance your understanding and excel in your academic pursuits today **Hunters and Bureaucrats** Paul Nadasdy,2011-11-01 Based on three years of ethnographic research in the Yukon this book examines contemporary efforts to restructure the relationship between aboriginal peoples and the state in Canada Although it is widely held that land claims and co management two of the most visible and celebrated elements of this restructuring will help reverse centuries of inequity this book challenges this conventional wisdom arguing that land claims and co management may be less empowering for First Nation peoples than is often supposed The book examines the complex relationship between the people of Kluane First Nation the land and animals and the state It shows that Kluane human animal relations are at least partially incompatible with Euro Canadian notions of property and knowledge Yet these concepts form the conceptual basis for land claims and co management respectively As a result these processes necessarily end up taking for granted and so helping to reproduce existing power relations First Nation peoples participation in land claim negotiations and co management have forced them at least in some contexts to adopt Euro Canadian perspectives toward the land and animals They have been forced to develop bureaucratic infrastructures for interfacing with the state and they have had to become bureaucrats themselves learning to speak and act in uncharacteristic ways Thus land claims and co management have helped undermine the very way of life they are supposed to be protecting This book speaks to critical issues in contemporary anthropology First Nation law and resource management It moves beyond conventional models of colonialism in which the state is treated as a monolithic entity and instead explores how state power is reproduced through everyday bureaucratic practices including struggles over the production and use of knowledge *In Search of Madness* R. Walter Heinrichs,2001 This book evaluates the progress of schizophrenia science by summarizing what is known about how patients with the illness differ from healthy people The tools of meta analysis are first explained and then employed to make the strength and consistency of these differences explicit Beginning with the study of symptoms then moving through the search for objective disease markers findings on the cognitive functions structure physiology chemistry and development of the

brain this book is a journey into the enigma of madness and its science What emerges is an illness that reveals itself most strongly in thought processes not biology Schizophrenia is an anomaly at the frontier of mind and brain but In Search of Madness points the way to its solution **The Conflict of the Ages Student II The Origin of Evil in the World that Was** Michael J. Findley, Mary C. Findley, God made everything very good so how did evil come into being Is original sin real or just a myth Could man talk to animals There might be myths around the world that echo the creation story but did ancient people believe in the fall of angels Who are the sons of God What does their eyes were opened really mean Student text with review questions and vocabulary plus special projects **Undeniable** Douglas Axe, 2016-07-12 In this engaging book Axe uses common science to consider the biggest mystery To what or to whom do we owe our existence Dean Koontz A World Magazine Best Book of the Year Throughout his distinguished and unconventional career engineer turned molecular biologist Douglas Axe has been asking the questions that much of the scientific community would rather silence Now he presents his conclusions in this brave and pioneering book Axe argues that the key to understanding our origin is the design intuition the innate belief held by all humans that tasks we would need knowledge to accomplish can only be accomplished by someone who has that knowledge For the ingenious task of inventing life this knower can only be God Starting with the hallowed halls of academic science Axe dismantles the widespread belief that Darwin s theory of evolution is indisputably true showing instead that a gaping hole has been at its center from the beginning He then explains in plain English the science that proves our design intuition scientifically valid Lastly he uses everyday experience to empower ordinary people to defend their design intuition giving them the confidence and courage to explain why it has to be true and the vision to imagine what biology will become when people stand up for this truth Armed with that confidence readers will affirm what once seemed obvious to all of us that living creatures from single celled cyanobacteria to orca whales and human beings are brilliantly conceived utterly beyond the reach of accident Our intuition was right all along Douglas Axe s Undeniable is bold insightful and world changing It s also a joy to read I recommend it highly Phillip E Johnson Professor Emeritus of Law at U C Berkeley and author of Darwin on Trial An important addition to the debate on the origins of life It provides a middle way between religious and scientific explanations of how life began A must read for everyone who is interested in the origins of our universe The Washington Book Review
