Natures Government Science Imperial Britain And The Improvement Of The World:

Nature's Government Richard Drayton, Richard Harry Drayton, 2000-01-01 This daring attempt to juxtapose the histories of Britain western science and imperialism shows how colonial expansion from the age of Alexander the Great to the 20th century led to complex kinds of knowledge

Beatrix Potter Linda Lear, 2025-09-23 In this remarkable biography Linda Lear offers a new look at the extraordinary woman who gave us some of the most beloved children's books of all time Potter found freedom from her conventional Victorian upbringing in the countryside Nature inspired her imagination as an artist and scientific illustrator but *The Tale of Peter Rabbit* brought her fame financial success and the promise of happiness when she fell in love with her editor Norman Warne After his tragic and untimely death Potter embraced a new life as the owner of Hill Top Farm in the English Lake District and a second chance at happiness As a visionary landowner successful farmer and sheep breeder she was able to preserve the landscape that had inspired her art *Beatrix Potter A Life in Nature* reveals a lively independent and passionate woman whose art was timeless and whose generosity left an indelible imprint on the countryside

Sea and Land Philip D. Morgan, John Robert McNeill, Matthew Mulcahy, Stuart B. Schwartz, 2022 *Sea and Land* provides an in depth environmental history of the Caribbean to ca 1850 with a coda that takes the story into the modern era It explores the mixing movement and displacement of peoples and the parallel ecological mixing of animals plants microbes from Africa Europe elsewhere in the Americas and as far away as Asia It examines first the arrival of Native American to the region and the environmental transformations that followed It then turns to the even more dramatic changes that accompanied the arrival of Europeans and Africans in the fifteenth century Throughout it argues that the constant arrival dispersal and mingling of new plants and animals gave rise to a creole ecology Particular attention is given to the emergence of Black slavery sugarcane and the plantation system an unholy trinity that thoroughly transformed the region's demographic and physical landscapes and made the Caribbean a vital site in the creation of the modern western world Increased attention to issues concerning natural resources conservation epidemiology and climate have now made the environment and ecology of the Caribbean a central historical concern *Sea and Land* is an effort to integrate that research in a new general environmental history of the region Intended for scholars and students alike it aims to foster both a fuller appreciation of the extent to which environmental factors shaped historical developments in the Caribbean and the extent to which human actions have transformed the biophysical environment of the region over time The combined work of eminent authors of environment and Latin American and Caribbean history *Sea and Land* offers a unique approach to a region characterized by Edenic nature and paradisiacal qualities as well as dangers diseases and disasters

The SAGE Handbook of Geographical Knowledge John A Agnew, David N Livingstone, 2011-02-17 A refreshingly innovative approach to charting geographical knowledge A wide range of authors trace the social construction and contestation of geographical ideas through the sites of their production and their relational geographies of engagement This creative and comprehensive book

offers an extremely valuable tool to professionals and students alike Victoria Lawson University of Washington A Handbook that recasts geography's history in original thought provoking ways Eschewing the usual chronological march through leading figures and big ideas it looks at geography against the backdrop of the places and institutional contexts where it has been produced and the social cum intellectual currents underlying some of its most important concepts Alexander B Murphy University of Oregon The SAGE Handbook of Geographical Knowledge is a critical inquiry into how geography as a field of knowledge has been produced re produced and re imagined It comprises three sections on geographical orientations geography's venues and critical geographical concepts and controversies The first provides an overview of the genealogy of geography The second highlights the types of spatial settings and locations in which geographical knowledge has been produced The third focuses on venues of primary importance in the historical geography of geographical thought Orientations includes chapters on Geography the Genealogy of a Term Geography's Narratives and Intellectual History Geography's Venues includes chapters on Field Laboratory Observatory Archive Centre of Calculation Mission Station Battlefield Museum Public Sphere Subaltern Space Financial Space Art Studio Botanical Zoological Gardens Learned Societies Critical concepts and controversies includes chapters on Environmental Determinism Region Place Nature and Culture Development Conservation Geopolitics Landscape Time Cycle of Erosion Time Gender Race Ethnicity Social Class Spatial Analysis Glaciation Ice Ages Map Climate Change Urban Rural Comprehensive without claiming to be encyclopedic textured and nuanced this Handbook will be a key resource for all researchers with an interest in the pasts presents and futures of geography

Intrepid Women Jordana Pomeroy, 2017-07-05 Despite the increased visibility of Victorian women artists in museum exhibitions and historical studies the art produced by Victorian women has been viewed through a restrictive lens Scholars have focused on works produced for the marketplace but have overlooked art created and displayed outside of established venues and institutions of higher learning Drawing upon sketches paintings and photographs Intrepid Women Victorian Artists Travel is a groundbreaking study that examines the art that women produced whilst traveling as well as the circumstances that took these artists both amateurs and professionals far beyond the reaches of the traditional Grand Tour Traveling throughout the British Empire including the Middle East India Canada and North Africa and even to the Americas the artists adapted to new climes and foreign cultures partially by documenting the unfamiliar through their art sometimes at great physical risk This volume of essays offers fresh evidence that through their travel and art women extended both geographic and social boundaries Each author presents evidence that women overcame institutional as well as cultural obstacles to improve their artistic skills and to use their art to convey worlds most British citizens would never see for themselves

The Routledge Handbook of Science and Empire Andrew Goss, 2021-07-05 The Routledge Handbook of Science and Empire introduces readers to important new research in the field of science and empire This compilation of inquiry into the inextricably intertwined history of science and empire reframes the field showing that one could not have

grown without the other The volume expands the history of science through careful attention to connections exchanges and networks beyond the scientific institutions of Europe and the United States These 27 original essays by established scholars and new talent examine scientific and imperial disciplines networks of science scientific practice within empires and decolonised science The chapters cover a wide range of disciplines from anthropology and psychiatry to biology and geology There is global coverage with essays about China Southeast Asia the Pacific Australia and New Zealand India the Middle East Russia the Arctic and North and South America Specialised essays cover Jesuit science natural history collecting energy systems and science in UNESCO With authoritative chapters by leading scholars this is a guiding resource for all scholars of empire and science Free of jargon and with clearly written essays the handbook is a valuable path to further inquiry for any student of the history of science and empire

Frozen Empires Adrian Howkins, 2016-11-01 Perpetually covered in ice and snow the mountainous Antarctic Peninsula stretches southward towards the South Pole where it merges with the largest and coldest mass of ice anywhere on the planet Yet far from being an otherworldly Pole Apart the region has the most contested political history of any part of the Antarctic Continent Since the start of the twentieth century Argentina Britain and Chile have made overlapping sovereignty claims while the United States and Russia have reserved rights to the entire continent The environment has been at the heart of these disputes over sovereignty placing the Antarctic Peninsula at a fascinating intersection between diplomatic history and environmental history In *Frozen Empires* Adrian Howkins argues that there has been a fundamental continuity in the ways in which imperial powers have used the environment to support their political claims in the Antarctic Peninsula region British officials argued that the production of useful scientific knowledge about the Antarctic helped to justify British ownership Argentina and Chile made the case that the Antarctic Peninsula belonged to them as a result of geographical proximity geological continuity and a general sense of connection Despite various challenges and claims however there has never been a genuine decolonization of the Antarctic Peninsula region Instead imperial assertions that respective entities were conducting science for the good of humanity were reformulated through the terms of the 1959 Antarctic Treaty and Antarctica's frozen empires remain in place to this day In arguing for imperial continuity in the region Howkins counters the official historical narrative of Antarctica which rests on a dichotomy between bad sovereignty claims and good scientific research *Frozen Empires* instead suggests that science politics and the environment have been inextricably connected throughout the history of the Antarctic Peninsula region and remain so and shows how political prestige in the guise of conducting science for the good of humanity continues to influence international climate negotiations

Race, Nature, and the Politics of Difference Donald S. Moore, Jake Kosek, Anand Pandian, 2003-05-20 A collection of essays that show the interdependence of concepts of race and nature

Reassembling the Strange Thomas Anderson, 2018-10-15 This book examines how Westerners understood and processed Madagascar and its environment during the nineteenth century Madagascar's unique ecosystem crafted its reputation as a strange place full

of unusual species Westerners however often minimized Madagascar's peculiar features to stress the commonality of its fauna and flora with the world The attempt to understand the island through science led to a domestication of its environment that created the image of a tame and known world capable of being controlled and used by Western powers At the heart of the exploration of Madagascar and its transformation in Western eyes from a strange world to a cash crop colony were missionaries and naturalists who relied upon global experiences to master the island by normalizing the peculiar qualities of Madagascar's environment This book reveals how the environment played a dominant role in understanding the island and its people and how current environmental debates have evolved from earlier policies and discussions about the environment

Mobile Museums Felix Driver ,Mark Nesbitt,Caroline Cornish,2021-04-19 *Mobile Museums* presents an argument for the importance of circulation in the study of museum collections past and present It brings together an impressive array of international scholars and curators from a wide variety of disciplines including the history of science museum anthropology and postcolonial history to consider the mobility of collections The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re mobilisation notably in the context of Indigenous community engagement Contributors seek to explore processes of circulation historically in order to re examine inform and unsettle common assumptions about the way museum collections have evolved over time and through space By foregrounding questions of circulation the chapters in *Mobile Museums* collectively represent a fundamental shift in the understanding of the history and future uses of museum collections The book addresses a variety of different types of collection including the botanical the ethnographic the economic and the archaeological Its perspective is truly global with case studies drawn from South America West Africa Oceania Australia the United States Europe and the UK *Mobile Museums* helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to matter today Praise for *Mobile Museums* This book advances a paradigm shift in studies of museums and collections A distinguished group of contributors reveal that collections are not dead assemblages The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism travel and the history of knowledge and have implications for the remobilisation of museums in the future Nicholas Thomas University of Cambridge The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re mobilisation Arthur MacGregor

The Island Race Kathleen Wilson,2014-06-03 Rooted in a period of vigorous exploration and colonialism *The Island Race* Englishness empire and gender in the eighteenth century is an innovative study of the issues of nation gender and identity Wilson bases her analysis on a wide range of case studies drawn both from Britain and across the Atlantic and Pacific worlds Creating a colourful and original colonial landscape she considers topics such as sodomy theatre masculinity the symbolism

of Britannia the role of women in war Wilson shows the far reaching implications that colonial power and expansion had upon the English people's sense of self and argues that the vaunted singularity of English culture was in fact constituted by the bodies practices and exchanges of peoples across the globe Theoretically rigorous and highly readable *The Island Race* will become a seminal text for understanding the pressing issues that it confronts **Routledge International Handbook of Sustainable Development** Michael Redclift, Delyse Springett, 2015-03-02 This Handbook gives a comprehensive international and cutting edge overview of Sustainable Development It integrates the key imperatives of sustainable development namely institutional environmental social and economic and calls for greater participation social cohesion justice and democracy as well as limited throughput of materials and energy The nature of sustainable development and the book's theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume The Handbook employs a critical framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate It provides original contributions from international experts coming from a variety of disciplines and regions including the Global South Comprehensive in scope it covers amongst other areas Sustainable architecture and design Biodiversity Sustainable business Climate change Conservation Sustainable consumption De growth Disaster management Eco system services Education Environmental justice Food and sustainable development Governance Gender Health Indicators for sustainable development Indigenous perspectives Urban transport The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered *Domestic Wild: Memory, Nature and Gardening in Suburbia* Franklin Ginn, 2016-06-23 In *Domestic Wild* Franklin Ginn sets out to find a new sense of the wild at the heart of modernity Inspired by experienced skilful gardeners Ginn analyses what happens when plants animals and people meet in the suburbs of London Weaving major theories of landscape memory and nonhuman subjectivity with the practical wisdom of gardeners this book offers a radical new account of everyday gardening Amid spectacular horizons of planetary loss *Domestic Wild* argues that gardening offers a means to cultivate a renewed sense of intimacy with nature and ourselves **The Nature of Empire** Andrea Duffy, 2025-09-15 *The Nature of Empire* exposes the central role of modern imperialism in the development of contemporary environmentalism and environmental science It builds this case through an investigation of five major modern empires Britain France Russia the Ottoman Empire and Japan This book offers readers a global environmental history of modern imperialism that actively engages Western based and non Western based empires As this study shows imperialism ultimately transformed human perceptions of nature and the environment in significant lasting and conflicting ways It both inspired modern conservationist practices and fueled opposition to environmental policies in colonial contexts It also spurred the development of climate science which helped reveal the environmental toll of imperial exploitation and drive efforts to fight it The environmental and political legacies of empire

remain evident today through unmitigated anthropogenic climate change and the increasing incidence of extreme weather which tends to disproportionately impact marginalized peoples This book stands as a useful and accessible resource for students scholars and all those seeking to better understand environmental history imperial legacies and the roots of contemporary climate challenges *Handbook of the Historiography of the Earth and Environmental Sciences* Elena Aronova,David Sepkoski,Marco Tamborini,2025-09-30 This open access handbook aims to provide a definitive assessment of the historiography and the future of major themes and approaches within the history of the earth sciences understood broadly The volume is intended for a broad range of readers including graduate students other scholars and scientists both familiar with and new to the history of the earth and environmental sciences Essays in the collection reflect on various problems in the study of the history of the earth sciences emphasizing crosscutting themes such as economics technology politics gender etc and featuring innovative ways of framing historiographic perspectives Since scholarship in the history of science is increasingly becoming entangled with environmental economic and bureaucratic political gender and other historical approaches the volume as a whole emphasizes the breadth and diversity of scholarship on the earth and environmental sciences *Mahogany* Jennifer L. Anderson,2012-09-17 Colonial Americans were enamored with the rich colors and silky surface of mahogany As this exotic wood became fashionable demand for it set in motion a dark hidden story of human and environmental exploitation Anderson traces the path from source to sale revealing how prosperity and desire shaped not just people s lives but the natural world **The Anthropocene and the Global Environmental Crisis** Clive Hamilton,François Gemenne,Christophe Bonneuil,2015-05-15 The Anthropocene in which humankind has become a geological force is a major scientific proposal but it also means that the conceptions of the natural and social worlds on which sociology political science history law economics and philosophy rest are called into question The Anthropocene and the Global Environmental Crisis captures some of the radical new thinking prompted by the arrival of the Anthropocene and opens up the social sciences and humanities to the profound meaning of the new geological epoch the Age of Humans Drawing on the expertise of world recognised scholars and thought provoking intellectuals the book explores the challenges and difficult questions posed by the convergence of geological and human history to the foundational ideas of modern social science If in the Anthropocene humans have become a force of nature changing the functioning of the Earth system as volcanism and glacial cycles do then it means the end of the idea of nature as no more than the inert backdrop to the drama of human affairs It means the end of the social only understanding of human history and agency These pillars of modernity are now destabilised The scale and pace of the shifts occurring on Earth are beyond human experience and expose the anachronisms of Holocene thinking The book explores what kinds of narratives are emerging around the scientific idea of the new geological epoch and what it means for the politics of unsustainability **Women, Collecting, and Cultures Beyond Europe** Arlene Leis,2022-11-04 This book examines collecting around the world and how women have participated in and

formed collections globally The edited volume builds on recent research and offers a wider lens through which to examine and challenge women s collecting histories Spanning from the seventeenth century to the twenty first although not organized chronologically the research herein extends beyond European geographies and across time periods it brings to light new research on how artificialia and naturalia were collected transported exchanged and or displayed beyond Europe Women Collecting and Cultures Beyond Europe considers collections as points of contact that forged transcultural connections and knowledge exchange Some authors focus mainly on collectors and what was collected while others consider taxonomies travel patterns of consumption migration markets and the after life of things In its broad and interdisciplinary approach this book amplifies women s voices and aims to position their collecting practices toward new transcultural directions including women s relation to distinct cultures customs and beliefs as well as exposing the challenges women faced when carving a place for themselves within global networks This study will be of interest to scholars working in collections and collecting conservation museum studies art history women s studies material and visual cultures Indigenous studies textile histories global studies history of science social and cultural histories

Materials and medicine Pratik Chakrabarti, 2017-03-01 Medicine was transformed in the eighteenth century Aligning the trajectories of intellectual and material wealth this book uncovers how medicine acquired a new materialism as well as new materials in the context of global commerce and warfare Bringing together a wide range of sources this book argues that the intellectual developments in European medicine were inextricably linked to histories of conquest colonization and the establishment of colonial institutions This is the first book to trace the links between colonialism and medicine on such a geographical and conceptual scale Chakrabarti examines the texts plants minerals colonial hospitals dispensaries and the works of surgeons missionaries and travellers to demonstrate that these were shaped by the material constitution of eighteenth century European colonialism This book will appeal to experts and students in histories of medicine science and imperialism as well as south Asian and Caribbean history

Environments of Empire Ulrike Kirchberger, Brett M. Bennett, 2020-02-14 The age of European high imperialism was characterized by the movement of plants and animals on a historically unprecedented scale The human migrants who colonized territories around the world brought a variety of other species with them from the crops and livestock they hoped to propagate to the parasites invasive plants and pests they carried unawares producing a host of unintended consequences that reshaped landscapes around the world While the majority of histories about the dynamics of these transfers have concentrated on the British Empire these nine case studies focused on the Ottoman French Dutch German and British empires seek to advance a historical analysis that is comparative transnational and interdisciplinary to understand the causes consequences and networks of biological exchange and ecological change resulting from imperialism Contributors Brett M Bennett Semih Celik Nicole Chalmer Jodi Frawley Ulrike Kirchberger Carey McCormack Idir Ouahes Florian Wagner Samuel Eleazar Wendt Alexander van Wickeren Stephanie Zehnle
