**Micro-Spatial Histories of Global Labour** Christian G. De Vito, Anne Gerritsen, 2017-09-28 This volume suggests a new way of doing global history Instead of offering a sweeping and generalizing overview of the past we propose a micro spatial approach combining micro history with the concept of space A focus on primary sources and awareness of the historical discontinuities and unevennesses characterizes the global history that emerges here We use labour as our lens in this volume The resulting micro spatial history of labour addresses the management and recruitment of labour its voluntary and coerced spatial mobility its political perception and representation and the workers own agency and social networks The individual chapters are written by contributors whose expertise covers the late medieval Eastern Mediterranean to present day Sierra Leone through early modern China and Italy eighteenth century Cuba and the Malvinas Falklands the journeys of a missionary between India and Brazil and those of Christian captives across the Ottoman empire and Spain The result is a highly readable volume that addresses key theoretical and methodological questions in historiography Chapter 7 is open access under a CC BY 4.0 license via [link.springer.com](https://link.springer.com)

*The Material of World History* Tina Mai Chen, David S. Churchill, 2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in

studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes      Thinking History Globally Diego Olstein,2014-11-04 The book brings together many recent trends in writing history under a common framework thinking history globally By thinking history globally the book explains applies and exemplifies the four basic strategies of analysis the big C s comparing connecting conceptualizing and contextualizing using twelve different branches of history      **Handbook Global History of Work** Karin Hofmeester,Marcel van der Linden,2017-11-20 Coffee from East Africa wine from California chocolate from the Ivory Coast all those every day products are based on labour often produced under appalling conditions but always involving the combination of various work processes we are often not aware of What is the day to day reality for workers in various parts of the world and how was it in the past How do they work today and how did they work in the past These and many other questions comprise the field of the global history of work a young discipline that is introduced with this handbook In 8 thematic chapters this book discusses these aspects of work in a global and long term perspective paying attention to several kinds of work Convict labour slave and wage labour labour migration and workers of the textile industry but also workers organisation strikes and motivations for work are part of this first handbook of global labour history written by the most renowned scholars of the profession      **World Heritage Sites** Haiden Farrell,2018-11-11 A World Heritage Site is a landmark or area which is selected by the United Nations Educational Scientific and Cultural Organization UNESCO as having cultural historical scientific or other form of significance and is legally protected by international treaties The sites are judged important to the collective interests of humanity The main objectives were to define the World Heritage in both cultural and natural aspects to enlist Sites and Monuments from the member countries which are of exceptional interest and universal value the protection of which is the concern of all mankind and to promote co operation among all Nations and people to contribute for the protection of these universal treasures intact for future generations This beautiful book shows off these sites providing a brief text and photographs for each It is a stunning indication of the longevity and durability culture and spirit      History & Histography Glen Cunningham,2018-08-03      **The Oxford History of Historical Writing** Daniel R. as an esoteric subject by presenting an accessible and concise overview of the history of historical writing from the Renaissance to the present Historiography plays an integral role in aiding undergraduate students to better understand the nature and purpose of historical analysis more generally by examining the many conflicting ways that historians have defined and approached history By demonstrating how these historians have differed in both their interpretations of specific historical events and their definitions of history itself this book conveys to students the interpretive character of history as a discipline and the way that the historian's context and subjective perspective influence his or her understanding of the past
