Pharmacology

You can not learn all the medications at once. But by learning drug categories and their corresponding name endings, memorization will become easier. This way you'll be able to eliminate many answer choices on your pharma questions.

Nclex Quick Pharmacology Study Guide:

Pharmacology Made Easy for NCLEX-RN Linda Waide, 2001 **Chicago Review Press Pharmacology Made Easy for NCLEX-PN** Linda Waide, Berta Roland, 2001 Pharmacology is the most difficult aspect of the NCLEX licensure examination for both practical and registered nurses With new drugs introduced every day and drug interactions a more serious concern than ever before nursing students need quick convenient access to up to date drug information in order to pass their licensure exams In a market dominated by lengthy tomes priced nearly double the Pharmacology Made Easy study guides are the most efficient and economical review choices available In each book 295 carefully prepared written test questions cover drug actions adverse reactions and side effects contraindications and precautions interactions nursing considerations and therapeutic benefits for more than 600 medications Complete rationales for correct and incorrect answers are provided Each book includes a 100 item interactive practice test on disk **Lippincott NCLEX-RN Pharmacology Review** Rebecca Hill, Emily Sheff, 2019-08-14 Master the Pharmacology Concepts You ll Encounter on Your Licensure Exam Reinforce your understanding and ready yourself for success with this comprehensive review of critical pharmacology content covered on the NCLEX RN Lippincott Pharmacology Review for NCLEX RN summarizes core medication classes and their associated conditions in an easy to use format accompanied by ample practice questions to help you excel on your exams and make a confident transition to clinical practice Streamlined bulleted format reinforces key information at a glance NCLEX style review questions test your retention of essential concepts and familiarize you with the exam experience Detailed answer key offers instant remediation including full rationales Bloom s Taxonomy levels and Client Need categories for each question Free 7 day Lippincott PassPoint trial provides personalized adaptive online test preparation to enhance your test taking confidence NCLEX-RN (r) - Pharmacology Study Guide Marnie Kramer-Kile, 2016-04 The purpose of this pharmacology study guide is to help nursing graduates work through the vast amount of pharmacological knowledge required for the NCLEX RN R in a systematic and purposeful way The breadth and detail of the knowledge required of pharmacological concepts often overwhelms new graduates when they are beginning their exam preparation This guide organizes content using the current NCLEX RN R Test Plan 2016 2019 and provides specific strategies to address pharmacological areas of review which may challenge new graduates in their exam preparation The guide was created by an experienced undergraduate nurse educator specializing in critical thinking development and application for high stakes exam writing Many candidates while studying for the NCLEX RN R often forgo studying pharmacological concepts in the detail required for the exam Unique to this Pharmacology Guide is a five step algorithm created by the author to help graduates approach drug to drug interaction questions This algorithm is designed to help uncover correct answers by using pharmacological principles rather than memorizing drugs that interact with one another The purpose of the modules in this Pharmacology study guide series are to Provide in depth review of the major drug classes from a systems approach e g respiratory nervous

system etc to help increase retention of key concepts and encourage application of pharmacological therapy in the context of disease management Summarize important information related to drug therapy and guide graduates to in depth review of serious adverse events associated with medications The modules will contain summary tables review questions and exercises for key concepts Direct the reader to important areas for client assessment during drug therapy This is a working pharmacology study guide so while key information will be presented and organized for review it is up to you to do the detailed work of content review by answering the questions and exercises in each module The following resources are recommended to use with this pharmacology study guide

- 1 Pharmacology textbook This resource will contain the detailed information pertaining to drug classes and specific nursing considerations related to drug therapy
- 2 Drug guide These resources contain alphabetized drug information and outline pharmacokinetic and pharmacodynamics characteristics of medications You will find important information related to the absorption distribution metabolism and excretions of drugs as well as protein binding and therapeutic index
- 3 An online drug repository if the resources above do not contain the information needed to answer the questions in the guide

Each module contains practice questions using NCLEX RN R formatted questions It is recommended that you seek additional practice questions from resources that challenge you to go into pharmacological concepts such as serious adverse events and drug to drug interactions in detail and test your knowledge specific nursing interventions related to drug therapy There are a total of 12 working Modules covered in the Pharmacology Study Guide

Module 1 Understanding Drug to Drug Interactions
Module 2 Drugs Affecting the Respiratory System
Module 3 Drugs Affecting the Nervous System
