

Paper Weaving

(art + history); (art + social studies);
(art + math)

Weaving is one of the most ancient forms of human creativity. Baskets and textiles would not have been possible without weaving. This project will give students experience working with the basic concept of weaving and is a supportive activity for Native American, Mexican and other cultural studies. The process of measuring and counting the weave will also strengthen math skills.

Grade Levels: 3-8

Teacher instructions and materials based on a class of 25 students. Adjust as needed.

Preparation

1. Prepare a sampler(s) ahead of time to use as a visual reference explaining the parts of the loom and the weaving process.

2. Introduce weaving terminology:

Weaving — The process of forming cloth or fabric on a loom by interlacing yarns or threads (or, as in this case, paper).

Loom — A frame for weaving yarn or thread into cloth or fabric.

Warp — Threads running lengthwise on the loom. The warp is placed on the loom prior to beginning the weaving process.

Weft — Threads that are weaved across the warp threads to form the web.

Web — The cloth or fabric produced by weaving.

Process

1. Students begin by making the loom and warp from a sheet of black construction paper. Fold sheet in half, with a graphite pencil, lightly draw a line about one inch from the open end of the folded paper. This defines the boundary where the cutting will need to stop.
2. From the fold, make irregular cuts up to the line. Cuts can be curvy, wavy, jagged or even created with decorative edge scissors. Unfold the sheet and lay it flat. This will serve as the "warp" and the "loom."
