Nfhs Soccer Rules 2013:

2013 NFHS Soccer Rules Book NFHS, *2013 NFHS Field Hockey Rules*, Sports-Related Concussions in Youth National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Sports-Related Concussions in Youth, 2014-02-04 In the past decade few subjects at the intersection of medicine and sports have generated as much public interest as sports related concussions especially among youth Despite growing awareness of sports related concussions and campaigns to educate athletes coaches physicians and parents of young athletes about concussion recognition and management confusion and controversy persist in many areas Currently diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity Sports Related Concussions in Youth Improving the Science Changing the Culture reviews the science of sports related concussions in youth from elementary school through young adulthood as well as in military personnel and their dependents This report recommends actions that can be taken by a range of audiences including research funding agencies legislatures state and school superintendents and athletic directors military organizations and equipment manufacturers as well as youth who participate in sports and their parents to improve what is known about concussions and to reduce their occurrence Sports Related Concussions in Youth finds that while some studies provide useful information much remains unknown about the extent of concussions in youth how to diagnose manage and prevent concussions and the short and long term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms The culture of sports negatively influences athletes self reporting of concussion symptoms and their adherence to return to play guidance Athletes their teammates and in some cases coaches and parents may not fully appreciate the health threats posed by concussions Similarly military recruits are immersed in a culture that includes devotion to duty and service before self and the critical nature of concussions may often go unheeded According to Sports Related Concussions in Youth if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered then the culture in which these athletes perform and compete will become much safer Improving understanding of the extent causes effects and prevention of sports related concussions is vitally important for the health and well being of youth athletes The findings and recommendations in this report set a direction for research to reach this goal Re-Designing Youth Sport John McCarthy, Lou Bergholz, Megan Bartlett, 2016-02-26 Many observers have pointed out what is wrong with youth sport an emphasis on winning at all costs parental over involvement high participation costs that exclude many families lack of vigorous physical activity lack of player engagement and no focus on development Currently most attempts at righting the wrongs of youth sport have focused on coach education and curriculum but in this book the authors offer a different approach one that involves changing the game itself Re Designing Youth Sport

combines vivid examples and case studies of innovative sport programs who are re designing their sport with a comprehensive toolkit for practitioners on how to change their game for bigger and better outcomes It offers a fresh and exciting perspective on the seemingly intractable issues in sport It presents a practical and empowering pathway for readers to apply the examples and tools to the outcomes that they aspire to achieve in their sport such as increased fun and excitement life skills building gender inclusion increased sportspersonship greater parity and avoidance of one sided competition and positive parental roles The book also reveals how community leagues as well as national and international sport governing bodies are using re design to accelerate player skill development tactical awareness and physical fitness
