**Markets in Vice, Markets in Virtue** John Braithwaite, 2005 What have the market forces of supply and demand to do with making the tax system more equitable John Braithwaite argues that the competition policies that attack monopolies to ensure vigorous price competition and more efficient production of goods also drive more efficient production of bads Tax avoidance like any good or service follows market logic as the supply increases so does the demand Braithwaite makes this argument and explores its implications through a detailed comparative case study of taxation in the United States and Australia He shows that it is possible to flip markets in the vice of tax avoidance to markets in the virtue of tax system integrity Braithwaite sets out specific regulatory strategies and gives examples of how these might be applied The result is a blueprint

**Transnational Financial Associations and the Governance of Global Finance** Heather McKeen-Edwards, Tony Porter, 2013-02-11 The role of business in global governance is now widely recognized but exploration of its role in global financial governance has been more haphazard than systematic This book provides the first comprehensive analysis of the role of transnational financial associations TFAs in the organization of global finance This book develops three theoretical

themes of assemblage functionality and power as enrolment These themes challenge approaches that treat financial power as emanating from a single location or force Whilst existing approaches tend to treat TFAs as irrelevant or as merely transmitting power originating elsewhere this book argues that power must be created by painstakingly assembling actors networks and objects that are often quite autonomous and working at cross purposes to one another a process in which TFAs play a central role The book explores these themes in chapters examining the roles of TFAs in interacting with public authorities constructing global financial markets and creating financial communities The authors additionally analyse the roles of TFAs in the European Union in the Global South and in promoting goals other than profitability including Islamic finance microfinancing savings banks and cooperatives Making a distinctive contribution to our understanding of global finance and global governance Transnational Financial Associations and the Governance of Global Finance is an important book for students and scholars of international political economy finance global governance and international relations
