Grade/ Grade Band: Grade 3	Topic: From Molecules to Organisms	Lesson: Structures and Processes
Brief Lesson Description: The students will be expected to identify parts of plant and how these part help plant.		
Performance Expectation(s): Develop models to describe that organisms have unique and diverse life cycles, but all have in common birth, growth, reproduction, and death.		
Specific Learning Outcomes: The students will be able to describe how roots and stems take in, transport or store water and nutrients the plant needs to grow.		
Narrative / Background Information		
Prior Student Knowledge: The students have considerable knowledge about part of the plant. The students have observed the plant growth.		
Science & Engineering Practices: Developing and Using Models, Modeling in 3-5 builds on K-2 experiences and progresses to building and revising simple models and using models to represent events and design solutions. Develop models to describe phenomena. (3-LS1-1)	Disciplinary Core Ideas: <u>PS2.A: Forces and Motion</u> LS1.B: Growth and Development of Organisms Reproduction is essential to the continued existence of every kind of organism. Plants and animals have unique and diverse life cycles. (3-LS1-1)	Crosscutting Concepts: Patterns of change can be used to make predictions. (3-LS1-1)
Possible Preconceptions/Misconceptions: Students may think that a celery stalk is a stem. However, to be a stem, a cross section must be circulated to square in shape. A celery stalk cross section has a crescent shape. In addition, the word stalk is short for leaf stalk. So, the celery stalk is part of the leaf. If you have a bunch of celery and you remove each stalk one by one, you will find the conical stem in the center.		
LESSON PLAN - 5-E Model ENGAGE: Opening Activity - Access Prior Learning / Stimulate Interest / Generate Questions: Review the pervious lesson by giving each group a small card with a marker and ask them a question. Then they should discuss their answer in a group. Moreover, using a frog board to give them a smile face or point when they are participating.		
EXPLORE: Lesson Description - Materials Needed / Probing or Clarifying Questions: Using PowerPoint to explain the lesson for how roots and stems help the plant. I ask students about the new vocabulary by sharing and discuss the ideas.
