Fossil Capital Andreas Malm, 2016-01-12 The more we know about the catastrophic implications of climate change the more fossil fuels we burn How did we end up in this mess In this masterful new history Andreas Malm claims it all began in Britain with the rise of steam power But why did manufacturers turn from traditional sources of power notably water mills to an engine fired by coal Contrary to established views steam offered neither cheaper nor more abundant energy but rather superior control of subordinate labour Animated by fossil fuels capital could concentrate production at the most profitable sites and during the most convenient hours as it continues to do today Sweeping from nineteenth century Manchester to the emissions explosion in China from the original triumph of coal to the stalled shift to renewables this study hones in on the burning heart of capital and demonstrates in unprecedented depth that turning down the heat will mean a radical overthrow of the current economic order

renewable energy is far from a twentieth century discovery Bell cuts through complicated jargon and jumbles of numbers to show how we're getting to grips with what is now the defining issue of our time The message she relays is ultimately hopeful harnessing the ingenuity and intelligence that has driven the history of climate change research can result in a more sustainable and bearable future for humanity *Australia in AUKUS* Erik Paul,2024-05-13 This book focuses on the making and implication of AUKUS for Australians in their relations with their own state and governance the Asia Pacific region and the rest of the world AUKUS is an incipient military state and a highly dangerous development moving rapidly to integrate society the state and the economy in the US imperial project of warfare and global domination It constitutes the crucible of a Leviathan state militarising climate change The study in this book is framed in a geopolitical analytical paradigm of revolutionary and counterrevolutionary movement and power energising together the existential threat of climate change to humans and capitalism questioning the viability of the nation state system highlighting the predicament confronting Australians as a nation The book's analysis is presented in four chapters broadly indicated in the contents page The book's architecture is framed in the political philosophy and intellectual legacy of Eric Hobsbawm Rosa Luxemburg and George Orwell and their contribution to the understanding of the contradictions of the nation state and imperialism capitalism and socialism in the emancipation of humanity from war **Energy's History** Daniela Russ,Thomas Turnbull,2025-03-25 Energy history is an approach to understanding the past that takes changes in the human exploitation of Earth's energies as its object of inquiry This interdisciplinary field documents and analyzes how humans thought about harnessed stored and exploited stocks and flows of energy In recent decades in response to evidence of the effect of fossil fuel use in our climatic system and coinciding with an energy turn across the humanities a new urgency and purpose has been ascribed to such work Energy's History challenges abstract and universalizing conceptions of energy's history making capacities This collection contains twelve chapters that present analyze and contextualize a primary source The contributors focus on ideas events and statements that recorded and critiqued the distinct historical paths of energy thereby broadening the scope of where and what constitutes energy history As energy's world making has enmeshed ever more of the planet into a dangerous compact with fossil fuels energy histories must be revised within this new energy historical reality This volume both presents persuasive visions of energy driven development beyond the Western capitalist model and provides an expansive and critical account of the ways in which energy histories have shaped the past and impact the present **Rich Crime, Poor Crime** Colin Webster,2023-03-16 An important and challenging book comprehensively spanning across the establishment of power systems Rich Crime Poor Crime is a vital read for academics professionals and those interested in the fields of history sociology criminology and politics **The Creation of Wealth and Poverty** Hassan Bougrine,2016-11-25 The Creation of Wealth and Poverty is a study of the means and ways by which wealth and poverty are created in both developed and developing countries It puts a particular emphasis on the role played by economic policy in shaping the stratification of

modern societies through specific programmes dealing with issues of job creation poverty and environmental degradation This book is concerned with the social effects of the ongoing crisis in finance development and the environment By focusing on the political legal and financial institutions that govern society and the economy the book provides an analysis of wealth and poverty from a historical perspective It shows how economic and social policies of the neoliberal model have led to a rise in unemployment poverty and inequality and therefore made societies more polarized This volume will be of great interest to policymakers academics and students who study political economy development economics and macroeconomics *Capital and Politics* Greg Albo, Alfredo Saad-Filho, Nicole Aschoff, 2022-12-01 The 59th annual volume of the Socialist Register examines the growth of corporate power and other important organizational trends in global capitalism Rejecting such notions as stakeholder capitalism it reviews the organization and strategies of unions and the left as it searches for new routes to socialism *The Nutmeg's Curse* Amitav Ghosh, 2021-10-14 The author of *The Great Derangement* finds the origins of our climate crisis in Western colonialism's violent exploitation of human life and the environment A powerful work of history essay testimony and polemic Amitav Ghosh's new book traces our contemporary planetary crisis back to the discovery of the New World and the sea route to the Indian Ocean *The Nutmeg's Curse* argues that the dynamics of climate change today are rooted in a centuries old geopolitical order constructed by Western colonialism At the center of Ghosh's narrative is the now ubiquitous spice nutmeg The history of the nutmeg is one of conquest and exploitation of both human life and the natural environment In Ghosh's hands the story of the nutmeg becomes a parable for our environmental crisis revealing the ways human history has always been entangled with earthly materials such as spices tea sugarcane opium and fossil fuels Our crisis he shows is ultimately the result of a mechanistic view of the earth where nature exists only as a resource for humans to use for our own ends rather than a force of its own full of agency and meaning Writing against the backdrop of the global pandemic and the Black Lives Matter protests Ghosh frames these historical stories in a way that connects our shared colonial histories with the deep inequality we see around us today By interweaving discussions on everything from the global history of the oil trade to the migrant crisis and the animist spirituality of Indigenous communities around the world *The Nutmeg's Curse* offers a sharp critique of Western society and speaks to the profoundly remarkable ways in which human history is shaped by non human forces *The Great Awakening* Anna Grear, 2020 As we enter a time of climate catastrophe worsening inequality and collapsing market state systems can human societies transcend the old dysfunctional paradigms and build the world anew There are many signs of hope In *The Great Awakening* twelve cutting edge activists scholars and change makers probe the deep roots of our current predicament while reflecting on the social DNA for a post capitalist future We learn about seed sharing in agriculture blockchain technologies for networked collaboration cosmolocal peer production of houses and vehicles creative hacks on law and new ways of thinking and enacting a rich collaborative future This surge of creativity is propelled by the social practices of commoning new modes of

life for creating and sharing wealth in fair minded ecologically respectful ways It is clear that the multiple entangled crises produced by neoliberal capitalism cannot be resolved by existing political and legal institutions which are imploding under the weight of their own contradictions Present and future needs can be met by systems that go beyond the market and state With experiments and struggle a growing pluriverse of commoners from Europe and the US to the Global South and cyberspace are demonstrating some fundamentally new ways of thinking being and acting This ontological shift of perspective is making new worlds possible

Free Gifts Alyssa Battistoni,2025-08-19 A timely new critique of capitalism s persistent failure to value nature Capitalism is typically treated as a force for relentless commodification Yet it consistently fails to place value on vital aspects of the nonhuman world whether carbon emissions or entire ecosystems In Free Gifts Alyssa Battistoni explores capitalism s persistent failure to value nature arguing that the key question is not the moral issue of why some kinds of nature shouldn t be commodified but the economic puzzle of why they haven t been To understand contemporary ecological problems from biodiversity collapse to climate change she contends we have to understand how some things come to have value under capitalism and how others do not To help us do so Battistoni recovers and reinterprets the idea of the free gift of nature used by classical economic thinkers to describe what we gratuitously obtain from the natural world and builds on Karl Marx s critique of political economy to show how capitalism fundamentally treats nature as free for the taking This novel theory of capitalism s relationship to nature not only helps us understand contemporary ecological breakdown but also casts capitalism s own core dynamics in a new light Battistoni addresses four different instances of the free gift in political economic thought each in a specific domain natural agents in industry pollution in the environment reproductive labor in the household and natural capital in the biosphere In so doing she offers new readings of major twentieth century thinkers including Friedrich Hayek Simone de Beauvoir Garrett Hardin Silvia Federici and Ronald Coase Ultimately she offers a novel account of freedom for our ecologically troubled present developing a materialist existentialism to argue that capitalism limits our ability to be responsible for our relationships to the natural world and imagining how we might live freely while valuing nature s gifts

**In Search of Climate Politics** Matthew Paterson, 2021-08-26 In what ways is climate change political This book addresses this key but oddly neglected question It argues that in order to answer it we need to understand politics in a three fold way as a site of authoritative public decision making as a question of power and as a conflictual phenomenon Recurring themes center on de and re politicization and a tension between attempts to simplify climate change to a single problem and its intrinsic complexity These dynamics are driven by processes of capital accumulation and their associated subjectivities The book explores these arguments through an analysis of a specific city Ottawa which acts as a microcosm of these broader processes It provides detailed analyses of conflicts over urban planning transport and attempts by city government and other institutions to address climate change The book will be valuable for students and researches looking at the politics of climate change

**Birth of the Financial Thriller** Mikkel Krause Frantzen, 2025-03-31 Discover the untold story of the financial thriller a genre pioneered by Canadian banker turned author Paul Erdman from a Swiss prison cell Starting with the publication of *The Billion Dollar Sure Thing* in 1973 this book explores the genre s evolution as a popular and even vulgar genre of financialisation characterised by volatile plots centred on currency speculation where the central mystery is money not murder By contextualising the rise of financial thrillers within the dramatic events of the 1970s such as the abolition of the Bretton Woods system and the oil crises this book illustrates how a genre found the world of finance during a particular historical moment but also how the world of finance found its genre This compelling narrative connects the past to our present financial landscape making it essential for anyone interested in the intersection of economic literary and cultural history

**Karl Marx in America** Andrew Hartman, 2025-05-27 The vital and untold story of Karl Marx s stamp on American life To read Karl Marx is to contemplate a world created by capitalism People have long viewed the United States as the quintessential anti Marxist nation but Marx s ideas have inspired a wide range of people to formulate a more precise sense of the stakes of the American project Historians have highlighted the imprint made on the United States by Enlightenment thinkers such as Adam Smith John Locke and Thomas Paine but Marx is rarely considered alongside these figures Yet his ideas are the most relevant today because of capitalism s centrality to American life In *Karl Marx in America* historian Andrew Hartman argues that even though Karl Marx never visited America the country has been infused shaped

and transformed by him Since the beginning of the Civil War Marx has been a specter in the American machine During the Gilded Age socialists read Marx as an antidote to the unchecked power of corporations In the Great Depression communists turned to Marx in hopes of transcending the destructive capitalist economy The young activists of the 1960s were inspired by Marx as they gathered to protest an overseas war Marx s influence today is evident too as Americans have become increasingly attuned to issues of inequality labor and power After decades of being pushed to the far left corner of intellectual thought Marx s ideologies have crossed over into the mainstream and are more alive than ever Working class consciousness is on the rise and as Marx argued the future of a capitalist society rests in the hands of the people who work at the point of production A valuable resource for anyone interested in Marx s influence on American political discourse Karl Marx in America is a thought provoking account of the past present and future of his philosophies in American society

Huber, 2022-05-10 How to build a movement to confront climate change The climate crisis is not primarily a problem of believing science or individual carbon footprints it is a class problem rooted in who owns controls and profits from material production As such it will take a class struggle to solve In this ground breaking class analysis Matthew T Huber argues that the carbon intensive capitalist class must be confronted for producing climate change Yet the narrow and unpopular roots of climate politics in the professional class is not capable of building a movement up to this challenge For an alternative strategy he proposes climate politics that appeals to the vast majority of society the working class Huber evaluates the Green New Deal as a first attempt to channel working class material and ecological interests and advocates building union power in the very energy system we need to dramatically transform In the end as in classical socialist movements of the early 20th Century winning the climate struggle will need to be internationalist based on a form of planetary working class solidarity
