Transnational Families, Migration and Gender Elisabetta Zontini,2010-02-01 By linking the experiences of immigrant families with the increased reliance on cheap and flexible workers for care and domestic work in Southern Europe this study documents the lived experiences of neglected actors of globalization migrant women as well as the transformations of Western families more generally However while describing in detail the structural and cultural contexts within which these women have to operate the book questions dominant paradigms about women as passive victims of patriarchal structures and brings out instead their agency and the creative ways in which they take control of their lives in often difficult circumstances Based on extensive ethnographic fieldwork and interviews the author offers a valuable dual comparison between two Southern European countries on the one hand and between two migrant groups one Christian and one Muslim on the other thus bringing to light unique detailed data on migration decision making settlement

and on the multiple ways in which different women cope with the consequences of their transnational lives

**Topographies of Globalization** Valur Ingimundarson, Kristín Loftsdóttir, Irma Erlingsdóttir, 2004 The term globalization has been used to describe the intensification of cross border flows whether in the realm of ideas culture finance trade or human mobility Like many other vital ideas such as nationalism and modernization globalization is fraught with controversy But no matter where one stands it is a site of an ongoing intellectual endeavor of definition interpretation and redefinition a contested terrain that continues to have profound if unequal impact on people's lives around the world Given the inherent tension between the global and local this phenomenon is perhaps more accurately explained by the conceptual hybrid globalization The diverse contributions in this volume are an attempt to come to grips with some of the implications of this process by problematizing and engaging it It grew out of an interdisciplinary conference on globalization held at the University of Iceland in late autumn 2002 as part of an international research project coordinated by GERM Groupe d'Etudes et de Recherches sur les Mondialisations involving a large group of academics universities and institutions The volume emphasizes specific aspects of the globalization debate politics culture gender and language translation One focus articulated among others by Zygmunt Bauman is on the reconfigurations of political power relationships between the West and the Rest the war on terror and conflict resolution whether in the name of peacekeeping nation building or identity changes Another theme involves the problematization of the culture concept its place in the public domain and the redefinition of identities as a result of globalization A third aspect deals with attempts to illuminate how globalization processes may deepen gender class and race inequalities in the absence of binding rules and collective social responsibility Finally the focus is on the changing attitudes toward language translation in a heavily mediatized and accelerated world

No Turning Back Estelle Freedman, 2007-12-18 Repeatedly declared dead by the media the women's movement has never been as vibrant as it is today Indeed as Stanford professor and award winning author Estelle B Freedman argues in her compelling new book feminism has reached a critical momentum from which there is no turning back A truly global movement as vital and dynamic in the developing world as it is in the West feminism has helped women achieve authority in politics sports and business and has mobilized public concern for once taboo issues like rape domestic violence and breast cancer And yet much work remains before women attain real equality In this fascinating book Freedman examines the historical forces that have fueled the feminist movement over the past two hundred years and explores how women today are looking to feminism for new approaches to issues of work family sexuality and creativity Freedman begins with an incisive analysis of what feminism means and why it took root in western Europe and the United States at the end of the eighteenth century The rationalist humanistic philosophy of the Enlightenment which ignited the American Revolution also sparked feminist politics inspiring such pioneers as Mary Wollstonecraft and Susan B Anthony Race has always been as important as gender in defining feminism and Freedman traces the intricate ties between women's rights and abolitionism in the United

States in the years before the Civil War and the long tradition of radical women of color stretching back to the impassioned rhetoric of Sojourner Truth As industrialism and democratic politics spread after World War II feminist politics gained momentum and sophistication throughout the world Their impact began to be felt in every aspect of society from the workplace to the chambers of government to relations between the sexes Because of feminism Freedman points out the line between the personal and the political has blurred or disappeared and issues once considered merely private abortion sexual violence homosexuality reproductive health beauty and body image have entered the public arena as subjects of fierce ongoing debate Freedman combines a scholar's meticulous research with a social critic's keen eye Sweeping in scope searching in its analysis global in its perspective No Turning Back will stand as a defining text in one of the most important social movements of all time
