Ordinary Families Extraordinary Lives Assets And Poverty Reduction In Guayaquil 1978 2004:

Ordinary Families, Extraordinary Lives Caroline O.N. Moser, 2010-04-01 Fifty years after Oscar Lewis's famous depiction of five Mexican families caught in a culture of poverty Caroline Moser tells a very different story of five neighborhood women and their families strategically accumulating assets to escape poverty in the Ecuadoran city of Guayaquil In *Ordinary Families Extraordinary Lives* Moser shows how a more sophisticated understanding of the complexities of asset accumulation as well as poverty itself can help counter inaccurate stereotypes about global poverty It provides invaluable insight into strategies that may help people in developing countries improve their wellbeing The similar socioeconomic characteristics and economic circumstances of the Guayaquil families in 1978 when Moser began her research set the stage for a natural experiment By 2004 these circumstances varied widely Moser captures the causes and consequences of these developments through economic data anthropological narrative and personal photos She then places this compelling story within the broader context of political economic and spatial changes in Guayaquil and Ecuador Moser describes how households in a Third World urban slum relentlessly and systematically fought to accumulate human social and financial capital assets Her longitudinal account of their odyssey captures long term trends and changes in perception that are missed in snapshot assessments Chapters in this holistic story cover diverse issues such as housing and infrastructure community mobilization and political negotiation employment family dynamics violence and emigration *The City in Urban Poverty* C. Lemanski, C. Marx, 2015-05-12 The contributors respond to the absence of critical debate surrounding the ways in which spaces of the city do not merely contain but also constitute urban poverty The volume explores how the spaces of the city actively produce and reproduce urban poverty Latin American Urban Development into the Twenty First Century D. Rodgers, J. Beall, R. Kanbur, 2012-10-10 By the dawn of the 21st century more than half of the world's population was living in urban areas This volume explores the implications of this unprecedented expansion in the world's most urbanized region Latin America exploring the new urban reality and the consequences for both Latin America and the rest of the developing world **The Oxford Handbook of the Modern Slum** Alan Mayne, 2023 The Oxford Handbook of the Modern Slum explores the history of the modern slum connecting nineteenth century iterations through multiple pathways to its contemporary existence With chapters by 28 scholars this handbook brings an array of important and original perspectives and methodologies to bear on slums real and imagined across the globe Drawing upon anthropology archaeology architecture geography history politics sociology and urban planning the book delves into households and communities whose existence has been hidden by stereotypes **The Oxford Handbook of the Social Science of Poverty** David Brady, Linda Burton, 2016 The Oxford Handbook of the Social Science of Poverty builds a common scholarly ground in the study of poverty by bringing together an international inter disciplinary group of scholars to provide their perspectives on the issue Contributors engage in discussions about the leading theories and conceptual debates regarding poverty the most salient topics in poverty research

and the far reaching consequences of poverty on the individual and societal level **Betrayed** S. Kaplan, 2013-11-26

Betrayed takes a new approach to the subject of global poverty one that doesn't blame the West but also doesn't rely on the West for solutions Betrayed puts the poor themselves at center stage and shows how their entrepreneurial energies are shackled by political and social discrimination When these shackles are removed as is happening in places such as China and Vietnam the poor are able to seize opportunities and drive wealth creation Combining the latest research into poverty and state building with the author's personal observations drawn from years running businesses in the developing world Betrayed explains how leaders in the developing world can build more inclusive societies and more equitable governments thereby creating dynamic national economies and giving the poor the opportunity to accumulate the means and skills to control their own destinies This refreshing new approach will appeal to business people who are fed up with reading critiques of global poverty that see capitalism as the problem not the solution people in both the global North and South who want to see attention focused not on Western aid but on what developing countries and their citizens can do to help themselves scholars and practitioners in the development field who are looking for new practicable ideas and general readers who want accessible and engaging accounts of ordinary people struggling to overcome poverty International Encyclopedia of Housing and Home , 2012-10-09 Available online via SciVerse ScienceDirect or in print for a limited time only

by highly experienced academics research focused practitioners and professional planners Although the book concentrates on southern African cities the insights which are presented can be used to understand other urban centres in low and middle income countries outside of this region and around the world Indigenous Rights to the City Philipp Horn,2019-01-30 This book breaks new ground in understanding urban indigeneity in policy and planning practice It is the first comprehensive and comparative study that foregrounds the complex interplay of multiple organisations involved in translating indigenous rights to the city in Latin America focussing on the cities of La Paz and Quito The book establishes how planning for urban indigeneity looks in practice even in seemingly progressive settings such as Bolivia and Ecuador where indigenous rights to the city are recognised within constitutions It demonstrates that the translation of indigenous rights to the city is a process involving different actor groups operating within state institutions and indigenous communities which often hold conflicting interests and needs The book also establishes a set of theoretical methodological and practical foundations for envisaging how urban indigenous planning in Latin America and elsewhere should be understood studied and undertaken As a process which embraces conflict and challenges power relations within indigenous communities and between these communities and the state This book will appeal to practitioners researchers and students working within the fields of urban planning urban development and indigenous rights *On Norms and Agency* Ana María Muñoz Boudet,Patti Petesch,Carolyn

With more than half the world's population now living in urban areas urbanisation is undoubtedly one of the most important phenomena of the 21st century. However despite increasing recognition of the critical relationship between economic and social development in cities gender issues are often overlooked in understanding the complexities of current urbanisation processes. This book seeks to rectify this neglect. **Gender Asset Accumulation and Just Cities** explores the contribution that a focus on the gendered nature of asset accumulation brings to the goal of achieving just more equitable cities. To date neither the academic debates nor the formulated policy and practice on just cities has included a focus on gender based inequalities discriminations or opportunities. From a gender perspective a separate discourse exists closely associated with gender justice particularly in relation to urban rights and democracy. Neither however has addressed the implications for women's accumulation of assets and associated empowerment for transformational pathways to just cities. In this book contributors specifically focus on gender and just cities from a wide range of gendered perspectives that include households housing land gender based violence transport climate and disasters. **Untamed Urbanisms** Adriana Allen, Andrea Lampis, Mark Swilling, 2015-07-30. An electronic version of this book is available Open Access at www.tandfebooks.com. It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license. One of the major challenges of urban development has been reconciling the way cities develop with the mounting evidence of resource depletion and the negative environmental impacts of predominantly urban based modes of production and consumption. This book aims to re politicise the relationship between urban development sustainability and justice and to explore the tensions emerging under real circumstances as well as their potential for transformative change. For some cities are the root of all that is unsustainable while for others cities provide unique opportunities for sustainability oriented innovations that address equity

and ecological challenges This book is rooted in the latter category but recognises that if cities continue to evolve along current trajectories they will be where the large bulk of the most unsustainable and inequitable human activities are concentrated By drawing on a range of case studies from both the global South and global North this book is unique in its aim to develop an integrated social ecological perspective on the challenge of sustainable urban development Through the interdisciplinary and original research of a new generation of urban researchers across the global South and North this book addresses old debates in new ways and raises new questions about sustainable urban development **Family futures**
