Sustainable Organic Agriculture for Developing Agribusiness Sector Nikola Puvača, Vincenzo Tufarelli, 2021-08-18 Developing sustainable organic agriculture and resilient agribusiness sector is fundamental keeping in mind the value of the opportunity presented by the growing demand for healthy and safe food globally with the expectation for the global population to reach 9.8 billion by 2050 and 11 billion by 2100 Lately the main threats in Europe and worldwide are the increasingly dynamic climate change and economic factors related to currency fluctuations While the current environmental policy provides several mechanisms to support agribusinesses in mitigating organic food for daily increasing human population and stability of the currency it does not contemplate the relative readiness of individuals and businesses to act correctly Organic farming is the practice that relies more on using sustainable methods to cultivate crops and produce food animals avoiding chemicals and dietary synthetic drug inputs that do not belong to the natural ecosystem Organic agriculture can also contribute to meaningful socioeconomic ecologically sustainable development and significantly in the development of the agribusiness sector especially in developing countries

Global Development of Organic Agriculture Niels Halberg, 2006-01-01 Agriculture and food systems including organic agriculture are undergoing a technological and structural modernization strongly influenced by growing globalization Organic agricultural movements can be seen as a tangible effort towards more sustainable development However there are large differences between on the one hand industrialized farming and consumption based on global food chains and on the other smallholder farmers and resource poor people primarily linked in local food markets in low income countries This book provides an overview of the potential role of organic agriculture in a global perspective The book discusses in depth political ecology ecological justice ecological economics and free trade with new insights on the challenges for organic agriculture This is followed by the potential role of organic agriculture for improving soil fertility nutrient cycling and food security and reducing veterinary medicine use together with discussions of research needs and the importance of non certified organic agriculture
